# PREFACE

### **PREFACE**

#### **Acknowledgments**

This Economic Development Strategic Plan is the outcome of collaborative process among numerous community leaders and stakeholders throughout Fairfield County who have helped shape the Plan's findings and recommendations. Genesis Consulting Group particularly wishes to thank the members of the Fairfield County Economic Development Plan "Steering Committee" (and alternates and representatives) who participated in a series of meetings and work sessions, identified key areas for consideration, and shared their insights in multitude of ways throughout the planning process. We are also very grateful to Fairfield County's Office of Economic Development and its director Ms. Tiffany Harrison for assistance in planning various meetings and assembling baseline data and other information available about the County. We further wish to thank all of those who attended a half-day planning work session on August 19, 2010, who were instrumental in validating and expanding upon the work of the Steering Committee in order to further guide the creation of this strategic "road map" for increasing the level of economic activity and expand employment opportunities within the County.

Ultimately, the responsibility for the final Strategic Plan and associated recommendations rests with the Plan authors; however, the support and input of those discussed above was vital for ensuring the completed Plan has been tailored to (and focuses on) the specific and unique needs/preferences of County residents. It is our hope that all individuals with a vested interest in the economic health of Fairfield County will continue to support the strategies and initiatives called out in this plan as they are implemented.

#### Genesis Consulting Group Project Team

Genesis Consulting Group is a Columbia, SC-based economic development and engineering services consultant founded in 2006. The firm is a specialized niche provider of strategic economic development and growth planning services strongly backed by pragmatic yet creative infrastructure and civil engineering expertise. By design, Genesis Consulting Group was founded by assembling a small core team of planning experts with "large firm" backgrounds and decades of experience to focus solely on selected critical planning projects primarily within the Southeast. Genesis Consulting Group's core services include providing clients with an effective blend of short- to long-range strategic planning expertise along with pragmatic land-use and infrastructure services that ensure economic development strategic plans are capable of meeting both the demands of the marketplace and needs of individual communities. The specific individuals from Genesis Consulting Group's professional staff that supported this planning effort include the following:

Project Manager & Lead Economic Development Strategic Planner

James R. Morris, Jr., Ed.D.

Economic Development Strategic Planning & Infrastructure Evaluation, Logistics & Engineering Support

David K. Brandes, P.E.

Economic Development Strategic Planning & Economic Data Analysis/Deliverables Support

Jeffrey M. Neuman

Economic Development Strategic Planning & Meeting Facilitation/Deliverables Support

Sarah H. Askins

#### Fairfield County Economic Development Plan Steering Committee

The establishment of a representative group of key Fairfield County officials, community leaders, and other business/community stakeholders that formed a "Steering Committee" for this economic development plan was critical to the initiative's success. In coordination with Genesis Consulting Group, this Steering Committee spearheaded the overall planning process. The composition of the Steering Committee represented a broad array of County economic and business interests, as well as educational, financial, utility, and civic interests, and was intended to generally reflect the interests of the entire community. The individuals that comprise the "Steering Committee" for this planning effort are listed in the following table.

Contact Type	Company/Organization	Name	
Banking	First Citizens	Robert Drake	
Banking	Provident Community Bank	Susan D. Taylor

	Added to Committee Following Second Meeting		

#### **Project Funding**

Funding for this economic development strategic plan was provided by Fairfield County primarily through a grant from the South Carolina Power Team (the economic development alliance of the state-owned, electric utility, Santee Cooper, and the state's 20 electric cooperatives).

# SUMMARY OF RECOMMENDATIONS/OBSERVATIONS

# SUMMARY OF RECOMMENDATIONS/OBSERVATIONS

In February of 2010, Fairfield County retained Genesis Consulting Group to assist with the preparation of a county-wide strategic economic development plan to guide Fairfield County's Economic Development efforts over the next five to ten years. Over the following 9 months, in conjunction with local stakeholders, Genesis Consulting Group developed this Plan that determines for implementation the best and most reasonable strategies, initiatives, methodologies to encourage 1) capital investment, 2) job creation in appropriate industry sectors, 3) increases in personal wealth for the local workforce and 4) maximize sustainable economic growth in the County. Specific elements of the planning process for the Economic Development strategic plan included:

- Assessment of past and present economic development strategic plans
- Analysis of development and economic trends and demographics data
- Completion of a SWOT analysis with a project-specific Steering Committee
- Identification and assessment of preliminary economic development strategies and initiatives
- Completion of a community stakeholder "work session" to validate and detail priority strategies
- Finalization of the written economic development strategic plan

As a culmination of the overall economic development strategic planning process described in this plan, Genesis Consulting Group, in close coordination with the Steering Committee, has developed various recommendations/observations (with associated initiatives, tasks, responsible parties, and other implementation measures) for Fairfield County to help guide the region's economic development. The recommendations have been grouped into the major categories as identified during the SWOT analysis: Physical Infrastructure; Education & Workforce; Community Coordination & Cultural Relations; and Compatible Industries & Business Development. An additional "Organizational Recommendations" category has been added to capture further recommendations that have emerged based on the data and input presented during the project, as well as Genesis Consulting Group's professional expertise. Each of these strategies is intended to help fulfill the County's economic development mission as formulated through the planning process:

The mission of the Fairfield County Economic Development Department is to provide an enhanced quality of life for all citizens of Fairfield County by fostering and encouraging responsible and sustainable economic development activities that promote job creation, support our existing businesses, and strive to increase and diversify the County's tax base.

Full details of these recommendations are provided in the Recommendations/Observations section of this Plan.

It should be noted that these recommendations are made within the context of a continuum of economic development efforts throughout Fairfield County over many years. Although some of these recommendations represent entirely new strategies/initiatives, several have appeared in various forms within multiple planning documents and have already reached some stages of implementation. In those cases, the recommendations presented here are primarily geared toward building on the previous successful work in the County and focusing the direction of future tasks in support of the previously established objectives.

#### Organizational Recommendations

#### Recommendation #1

- Create a Fairfield County Economic Development Board
  - Funding from County with Participation of Private Sector
  - Better Continuity in Addressing Long-Term Issues & Opportunities
  - Private-Sector/Community Validation & Buy-in for ED Decisions & Incentive Recommendations

#### Recommendation #2

Create a Private-Sector Committee to Raise Private Funds for Exclusive Support of ED Board

#### Recommendation #3:

- Complete a Formal Target Industry Study that Dovetails with Research/SWOT Analysis of ED Plan
  - Leverage Transportation Infrastructure & Utilities
  - Leverage Natural Resources (Timber, Cold, Sand, Granite, etc.)
  - Leverage Clustering Opportunities (Nuclear/Automotive Supply/Biodiesel)
  - Explore Innovative New (Small) Industries (Organic Farming, Wood Briquette Fuel, etc.)
  - Coordination with County's existing and future BAR efforts

#### Recommendation #4

- Develop for County ED Organization a Comprehensive "Marketing Plan" to Brand County in Relation to ED Efforts
  - Based on ED Mission/Vision
  - Dovetails with County Vision Statement
  - Dovetails with Target Industry Study
  - Includes Key "Messaging" Regarding Education/Workforce
  - Includes Recommendations for Website, Marketing Materials, Marketing/Advertising
     Campaigns, Multi-Media Materials, Trade Show Collaterals, etc.

#### Recommendation #5

- Maintain Existing Strong Relationship and Financial Commitment to Central SC Alliance
  - Continued Access to Regional Marketing Organization working on behalf of Multiple Jurisdictions
- As Part of Relationship & Financial Commitment, Verify and Ensure Central SC Alliance Marketing
   Efforts Dovetail with County ED Mission and Future Developed County-Wide Vision Statements

#### Other Related Organizational Recommendations:

- Establish Long-Term Parameters for Suitable Office Location for ED Efforts
  - Location & Ease of Access
  - Adequacy and Quality / Overall Impression on Prospects & Potential Investors
  - Cost & Maintenance
- Promote "Sub-Regional" Alliance with Richland / Lexington Counties (and the Town of Blythewood) for Targeted ED Initiatives
  - Multi-County Industrial Parks (with fair and reasonable tax revenue sharing)
  - Shared Infrastructure Improvement Projects
  - Joint Funding Applications
- Promote Cooperative Relationship with Chester County (and Charlotte Regional Partnership)

#### Recommendations - Physical Infrastructure

#### Recommendation #1:

 Establish a Water/Sewer Coordinating Council to Spearhead Water/Sewer Master Plan (w/ Commensurate Priority Areas such as I-77 Corridor; Lake Monticello Area, etc.)

#### Recommendation #2:

- Establish yearly "set-asides" for general economic development uses
  - ED Prospect "Closing Fund"
  - General Land Acquisition for Industrial Uses
  - Land Acquisition of 1-2 Rail Sites
  - General Infrastructure Improvement Fund (Water/Sewer)
  - "Site Certification" / Site Infrastructure Information Program
  - "Virtual" Spec Building / Real Estate Development Program

#### Recommendation #3:

As a key element of general economic development "set-asides," create a local-level public/private
partnership to undertake critical need infrastructure improvements for broadband initiatives (in
accordance with existing models such as the "Connect South Carolina" State Broadband Data and
Development (SBDD) Program and/or the Rutherford County (NC) "Foothills Connection
Broadband")

#### Recommendation #4:

- Establish yearly "set-asides" for specific economic development uses
  - Pre-Grade Existing Industrial Sites
  - Retro-fit Existing Industrial Buildings for Adaptive Re-use
  - Demolition of Obsolete Building Structures
  - Revolving Loan Program for Private Land Owners (Curb Appeal, Facades, Landscaping, Other Improvements)

#### Recommendation #5:

- Validate/Verify Existing Listing/Inventory of Available Industrial Properties & Buildings Represented on County ED Website & Develop New Future Inventory
  - Compare Inventory with Central SC Alliance & SC Department of Commerce Listings
  - Develop Inventory of Available Commercial Real Estate
  - Develop Comprehensive "Inventory" of Attractive Sites for Potential Industrial Development
  - Aggressive Zoning/Land-Use Planning Zoning Changes
  - Target Individual Sites for Purchase (or Purchase/Lease Options)

#### Other Related Physical Infrastructure Recommendations:

- Pursue Regional (Beyond County Borders) Alliances or Cooperating Relationships to Pursue State/Federal Grant Funding
- Pursue Inclusion of Fairfield County (or portion thereof) in COATS Planning Boundary
- Identify Specific Secondary Roadway System Improvement Projects & Actively Lobby to Include Projects in COATS and Other CMCOG Planning Documents
- For Key Projects Already Included in COATS / CMCOG / SCDOT Planning Documents, Actively Lobby to Move Them Up in Priority

#### **Education & Workforce Recommendations**

#### Recommendation #1:

 Establish a "Curriculum Advisory Committee(s)" of Business/Industry Leaders for the Career & Technology Center

#### Recommendation #2:

- Establish yearly "set-asides" for targeted efforts aligned with ED (using this Plan's "Suggestions") to enhance accountability for results
  - School District to work with ED community to identify specific program requirements
  - Set-Asides to be taken from the additional VC Summer Revenues

#### Recommendation #3:

- Selectively Market via Specific "Talking Points":
  - Education/Workforce Themes that Highlight Availability, Educational Attainment & Workforce Skills Represented by Entire Region (Particularly Richland/Lexington Counties)
  - Education/Workforce Themes that Highlight Upper Quartile of Fairfield County Students
- Prepare scripted answer to RFI's for regional Education/Workforce Themes

#### Other Related Education & Workforce "Suggestions":

- Long-Term Concerted Effort of School Board & Faculty (in concert with ED Community) to Change Culture to Expect and Demand Better Performance from All Students
- Implement Corollary Programs Aligned with Rigorous but Realistic "Baseline" Expectations
  - Honors/Gifted Programs & AP Course Offerings
  - Continuation of "Magnet" Programs in Higher Grades
  - "TRIO" Program for 1st Generation 4- & 2-yr College Students
  - After School Programs for "At-Risk" Students
- Fully Incorporate Soft Skill Training in all C&T Center Tracts ("University 101" / "Life Skills 101" / "WorkEthic Certification")
- Establish/Enhance Close Alliance Among School Board & C&T Center with MTC, MWIB, MEBA and MREC
- Implement Programs Specifically Targeted to Attract/Recruit and Retain Highly Qualified & Motivated K-12 Faculty

#### Community Coordination & Cultural Relations Recommendations

#### Recommendation #1:

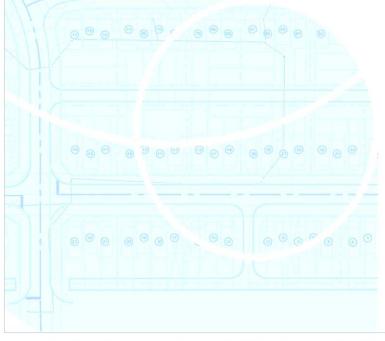

- Implement a Community Improvement Council to Address Key Issues Head On
  - Led by County Chamber
  - Chaired by Member of Private Sector
  - Include Representatives from County/Municipal Councils, School Board, Recreation Commission, Sheriff's Department, Private Sector, Churches, and Citizenry, etc.

#### Recommendation #2:

- Formal Initiative by County Council to Develop & Adopt a "Vision Statement" for the County (as part of overall "Strategic Planning Effort"
  - Key to Galvanizing Community and Garnering Broad-Based Support for Key Improvement Initiatives
- Dovetail a "Strategic Planning Effort" Covering Wide Range of Covernment/Community Planning
  - Water/Sewer Infrastructure; Recreation (completed); Transportation; Economic Development (completed), etc.

#### Other Related Community Coordination & Cultural Relations Recommendations:

- Concerted Effort to Publicize/Communicate Schedules and Key Issues Under Consideration by County Council & School Board
  - Mailings, Web Postings, Newspapers, Flyers, e-Mail Blasts, Church Announcements, TV News,
     Parent Notices
  - Institute "Mobile" Meeting Rotation and Day/Evening Scheduling to Accommodate Participation
  - Convene a "Public Summit" and "Roll-Out" Meeting (with other communication means) to present initiatives/strategies in ED Plan (and other future key initiatives such as the "Strategic Planning Effort")

#### Compatible Industries & Business Development Recommendations

#### Recommendation #1:

- Re-Energize the "CEO Round Table" of C-Level Leaders for Industrial/Commercial Enterprises in Fairfield County (and surrounding Counties)
  - Inclusion of SC Dept of Commerce & Central SC Alliance
  - Commitment to Regular Meetings
  - Narrow Focus on Matching Existing/Future Labor Needs w/ Existing Resources in County & Region

#### Recommendation #2:

Implement through ED Organization a Formal BRE Program w/ Regular Visitation Schedule

#### Recommendation #3:

- Establish Specific Liaison(s) Between the County's Quick Jobs Center and VC Summer for Ongoing Identification and Matching of Labor Needs
  - Identification of "Pre-Training" Requirements
  - Forward-Looking New Technical Areas (such as Health Professionals for the Nuclear Industry)
  - Links to Other Resources (Outside the County if Necessary)

#### Other Related Compatible Industries & Business Development Recommendations:

- Chamber as "Clearinghouse" / Coordinator for understanding and facilitating "linkage" to small business development entities (regionally)
  - SBA, SCORE, SCSBDC, MBDC, SCLaunch!, SCRA, CIECD, etc.
- Establish a County government "Business Service Center" that clusters administrative functions pertaining to starting/operating businesses in the County
  - Planning, Codes, Zoning, Mapping, Business Licensing, Utilities, and Other Permitting
- Implementation through County Chamber of Target Advertising/Public Information Campaign
  - "Shop Locally" / "Support Local Events"
  - Targeted to Steer Residents, In-coming Workforce, and Tourists to support local existing (and new) merchants/businesses
- Leverage Fairfield Memorial Health Care System to target businesses/industries that serve aging population
- Increase Coordination with New Carolina "Innovative Economies" pilot program
- Focus on Immediate/Lower-Cost Improvements for Existing Assets but Understand Lower Priority Level and Specifically Spearhead through County Museum Board efforts for Increased Visibility and Eye Appeal of the SC Railroad Museum / Winnsboro Town Clock
  - Painting/Cleaning/Landscaping
  - Signage & Publicity
- Identify and Catalog "Quality of Life" Attributes on a Regional Basis (Beyond County Borders)
  - Attractions/Destinations, Natural Features, Historical Features, Events, etc.
  - Use as Additional "Selling Point" Similar to "Regional Education/Workforce"
  - Marketing Blast of Fairfield's Retirement Possibilities

# STRATEGIC PLANNING PROCESS

#### STRATEGIC PLANNING PROCESS

#### Introduction

The strategic planning process for Fairfield County consisted of basically six general phases as described below. In facilitating the planning process, Genesis Consulting Group adhered to the following core guiding principals:

- Engage the Private Sector
- Focus on Existing Business Retention and Expansion
- Emphasize the Importance of Regional Alliances
- Mix Traditional and Non-Traditional Strategies
- Recognize the Parameters/Limitations of the "Recovery"
- Develop a "Knowledge-Based" Infrastructure Beyond Sites and Buildings
- Forge Education and Workforce Development Partnerships

The primary objectives of the planning process included:

- 1) Analyzing the area's unique attributes, infrastructure, and opportunities to identify the full range of economic development initiatives and alternatives that will spur positive economic trends throughout the region.
- 2) Establishing realistic economic goals for Fairfield County while developing creative, non-traditional projects that can effectively bring new capital investment; create jobs in desired sectors/industries; stimulate sustainable economic growth; expand the local tax base; and increase per capita wealth within the County.

The overall purpose of the approach was to work collaboratively with Fairfield County and its stakeholders in the preparation of a strategic economic development plan that includes the most achievable and cost-effective strategies, initiatives, methods, and techniques to encourage/enhance private-sector capital investment, create jobs in preferred sectors, and stimulate sustainable economic growth throughout the incorporated and unincorporated areas of the County.

#### **Project Phases I-VI**

**Phase I** kicked-off the project with the assembly of a project "Steering Committee" comprised of 15-20 members who represented a broad range of business, government, and civic interests from throughout the County. Genesis Consulting Group served as the primary point of contact for the planning process, assisted in providing an overall context for the process, provided initial input, contributed feedback, established preliminary strategies and priorities, and identified additional stakeholders to become part of an expanded group that provided further input and details for the Plan.

A key initial task of the "Steering Committee" was the designation of a sub-committee for the development of a mission statement for economic development efforts within the County that would accurately depict in clear terms the County economic development priorities and goals. This mission statement established the context for developing future Plan recommendations to ensure these recommendations were fully aligned with County objectives.

Phase II consisted of an assessment of the County's general development and economic trends, and fiscal impact of economic development uses, as well as comparing Fairfield County's trends with those of similar and/or "competing" jurisdictions in South Carolina. This assessment was used to describe the change(s) in recent past and present conditions in the County, and provide a basis and context for future economic planning. Similarly, detailed demographic analyses were performed to provide additional baseline information.

The relevant assessments and demographic data were presented to the Steering Committee members, and certain clarifications and revisions were made. This data allowed for the ensuing SWOT Analysis to be conducted within a more realistic context for assessing traditional and non-traditional economic development initiatives.

Phase III consisted of Genesis Consulting Group facilitating with the Steering Committee a detailed Strengths, Weaknesses, Opportunities and Threats (SWOT) Analysis. The Steering Committee was asked to identify and prioritize the most important issues related to economic development in Fairfield County, be they strengths, weaknesses, opportunities or threats. Using these preliminary findings, Genesis Consulting Group identified four preliminary categories under which the various strengths, weaknesses, opportunities, and threats could logically be grouped. These categories identified were:

- 1. Physical Infrastructure
- 2. Education & Workforce
- 3. Community Coordination & Cultural Relations
- 4. Compatible Industries & Business Development

Phase IV consisted of the conduct of a half-day planning "work session" whereby Genesis Consulting Group invited more than 150 potential stakeholders in Fairfield County's economic development to attend and participate in a facilitated, interactive break-out groups. The half-day session was used to present the preliminary work of the Steering Committee through the SWOT analysis and to further discuss, prioritize, and detail various implementation strategies, tasks, and sub-tasks for consideration. This session was held on August 19, 2010, and more than 70 stakeholders participated in the multiple work sessions. The work sessions corresponded to the four preliminary categories that were established through the SWOT analysis.

Phase V consisted of Genesis Consulting Group preparing a comprehensive set of preliminary Plan recommendations and observations and presenting these to the Steering Committee for review. Through a Steering Committee work session, these recommendations/observations were further discussed, and specific implementation tasks, responsible parties, and budget/schedule detail were fleshed out.

**Phase VI** included Genesis Consulting Group revising and finalizing the details of the Plan, assembling the final draft of the report document, and readying it for submission to the County for a final review.

# FAIRFIELD COUNTY PROFILE

#### FAIRFIELD COUNTY PROFILE

#### **County Overview**

Fairfield County is a primarily rural County located in the upper Piedmont region of South Carolina. The County was established in 1785 and has a land area of approximately 687 square miles. The County is bounded by the Broad River on the west and the Wateree River (now Lake Wateree) on the east. Neighboring Counties include Richland and Lexington Counties to the south, Newberry and Union Counties to the west, Lancaster and Kershaw Counties to the east, and Chester County to the north. Interstate 77 runs north and south through the County with the larger metropolitan areas of Charlotte, NC, located to the north of the County boundaries and Columbia, SC, to the south. Monticello Reservoir, Lake Wateree State Park, and the eastern portion of Sumter National Forest lie within Fairfield County. The elevation of the County ranges from approximately 200 feet above see level at the confluence of the Broad and Little Rivers to about 625 feet above see level in the upper part of the County, with greatly varying topography throughout the County.

The County seat is the Town of Winnsboro (named for Revolutionary officer, Colonel Richard Winn), which was incorporated in 1832. The County uses a Council-Administrator form of government (with 7 single-member officials on County Council elected to 4-year terms) and is a member of the Central Midlands Regional Council of Governments.

#### County Demographic and Economic Characteristics

In developing an economic development strategic plan, it is imperative that considerable attention be given to the structure of the community in terms of its demographics and development history. Consequently, as a key component of the economic development strategic planning process, Genesis Consulting Group compiled relevant demographic and economic development data for the County as a basis and context for future economic development planning. The range of data compiled was geared toward assessing the ability of Fairfield County to accommodate certain industrial sectors and/or prospects – both as new locations/re-locations and through "organic" growth of existing sectors – and to support and sustain other means of economic growth that potentially results in new investment, employment generation, increased wages, and an expanded tax base.

Also where appropriate, it is useful to develop data comparisons among other communities. The compilation of such data, though, is often limited by the availability of consistent source material across multiple jurisdictions. Furthermore, some data are more "qualitative" in nature than "quantitative" and do not lend themselves fully to "apples to apples" comparisons. However, to the extent possible, Genesis Consulting Group established a group of comparison jurisdictions for the majority of the compiled data sets. Where possible, data for Fairfield County were compared to similar data for the State of South Carolina overall and to data for the entire United States. Other jurisdictions included bordering or nearby South Carolina counties that often compete for economic development prospects (Richland, Lexington, Chester, York, Newberry, Kershaw, Lancaster, Orangeburg, and Chesterfield County). Other Counties included for comparison purposes were several similarly rural Counties to Fairfield that are also in close proximity to more major metropolitan areas (Pickens, Colleton, and Berkeley Counties). In some cases, though, data is presented for Fairfield County only.

The specific data sets include the following:

#### **Demographics**

- Population
- Race
- Sex
- Age Group
- Labor Force & Unemployment
- Number of Jobs
- Per Capita Income
- Median Household Income
- Average Wage Per Job
- Estimated Travel Time for Workers Not Working at Home
- Commuting Patterns (Fairfield County)
- Average Monthly Employment by Sector (Fairfield County)
- Major Employers (Fairfield County)

#### **Tax Revenues**

- Property Tax Rates
- Property Tax Revenues
- Total Tax Revenues & Expenditures (Including School Districts)
- SC Department of Revenue 2010 Jobs Tax Credit Rankings

#### Education - General

- Colleges/Universities
- K-12 Public Schools
- K-12 Private Schools

#### Education - Specific Data

- Enrollment
- Dollars per Student
- Student/Teacher Ratio
- Graduation Rate
- SAT/ACT Scores @ @ @ @
- Educational Attainment

#### Other Economic Development Information

- Available Industrial Sites/Parks & Industrial Buildings (Fairfield County)
- Land Use Planning and Zoning
- Water/Sewer Infrastructure
- Industrial/Commercial Development Activity
- Residential Development Activity

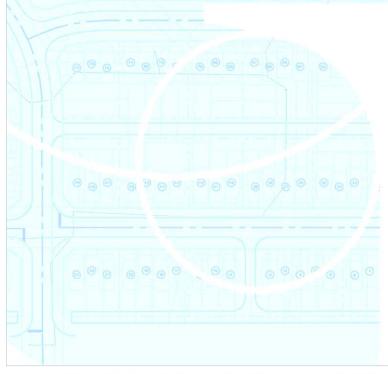

- Potential Economic Development Allies & Resources
- County-Level Economic Development Organizations

#### **Quality of Life**

- Accessibility and Location
- Churches
- Climate
- Entertainment Venues
- Historic Districts, Structures, and Properties
- Retail & Shopping
- Medical Care/Facilities
- Museums
- Natural Resources
- Parks and Recreation
- Scenic Resources
- Arts & Cultural Groups
- Special Events & Festivals

The relevant assessments and demographic data compiled during the planning process (and detailed in this section of the Plan) were presented to the Steering Committee members as a means to provide a more realistic context for completing the ensuing Strengths, Weaknesses, Opportunities, and Threats (SWOT) analysis for the County, as well as for assessing the most potentially effective traditional and non-traditional economic development initiatives for moving the County forward.

#### **Demographics**

#### **Population**

Current population figures and population growth trends over time are important factors to be analyzed in order to assess the economic health of a community. In general, economically healthy communities grow in population while less healthy communities contract. Positive trends in population growth typically correlate to an increase in a community's tax base, number of retail and service providers, and overall economic activity, as well as "quality of life" features such as art/cultural amenities and recreational facilities. Population growth, however, can also present certain challenges for a community. Some of the direct impacts that can result from a community's population growth include an increased demand for government services (especially public schools), higher crime rates, and additional stress on existing infrastructure (i.e., road systems, water/sewer systems, etc.).

For this study, Genesis Consulting Group compiled population data for Fairfield County and the comparison jurisdictions for the period between 1970 and 2015. Specific data sets were compiled for the years 1970, 1980, 1990, 2000, 2008, and 2015 based primarily on available U.S. Census Data (complete counts and estimates) with augmentation from a variety of other relevant data sources. Trends in population growth (% change per year) were also calculated for the periods between 1970 and 1980, 1980 and 1990, 1990 and 2000, 2000 and 2008, and 2008 and 2015. The cumulative % change in population, as well as the % change per year, was further calculated for the period between 1970 and 2015.

Fairfield County's estimated population for 2008 is 23,435 with a projected population increase to 24,470 by the year 2015. In 1970, the County's population was 19,999. The full set of population data is provided in Appendix 1 of this Plan.

#### **Key Findings**

- Fairfield County was the smallest County by population among the comparison group in 2008 (23,435), and will remain the smallest according to 2015 projections (24,470).
- Fairfield, Chester, and Orangeburg Counties had negative population growth between 2000 and 2008, with Chester County shrinking the most (-0.54% per year)
- Fairfield County's population from 1970-2015 grew at a rate of approximately 1/4 of the SC growth rate over that period and close to 1/3 of the U.S. growth rate over that period.
- Only Chester County has had a lower overall cumulative growth rate since 1970 as Fairfield County (13.48% vs 22.36% and 0.28% per year vs 0.45% per year).
- Chesterfield and Orangeburg are the next slowest growing Counties in the comparison group at 32.68% and 34.58%.
- Lexington and Berkeley County populations have grown by over 200% since 1970; Richland County by over 175%; and Pickens County by over 115%.

#### Race

For this study, Genesis Consulting Group compiled population by race data for Fairfield County and the comparison jurisdictions for each year from 2000 to 2008 based on available U.S. Census Data (estimates). For each year, the raw number of residents and percentage of the total residents by race is presented for each jurisdiction. Specific race categories include: White Alone; Black Alone; American

Indian and Alaska Native Alone; Asian Alone; Native Hawaiian and Other Pacific Islander Alone; Two or More Races; Hispanic or Latino Origin; and Not Hispanic, White Alone.

The full set of population by race data is provided in Appendix 2 of this Plan.

#### Key Findings

- The percentage breakdown of White Alone/Black Alone in Fairfield County in 2008 was 42.1%/56.8%. The White Alone percentage is up 2.1% since 2000. The Black Alone percentage is down 2.5% since 2000.
- Within the comparison group, only Orangeburg had a lower percentage of White Alone population (35.9%) and a higher percentage of Black Alone population (62.2%) in 2008.
- Fairfield and Orangeburg were the only 2 Counties in the comparison group with a majority (>50%) Black Alone population. Richland County was the next closest at 49.7% White Alone and 46.2% Black Alone.
- The County in the comparison group with the highest percentage of White Alone population and lowest percentage of Black Alone population was Pickens County (90.3% and 7.0%), followed by Lexington (82.3% and 14.8%).
- The SC and U.S. percentage breakdown of White Alone/Black Alone in 2008 was 68.7%/28.5% and 79.8%/12.8%, respectively.
- The percentage of the Hispanic or Latino Origin population in Fairfield County in 2008 was 1.6%, which has increased from 1.1% in 2000.
- Only Chester (1.2%) and Orangeburg (1.4%) within the comparison group had a smaller percentage
  of Hispanic or Latino Origin population in 2008. Newberry had the largest percentage at 8.4%. The
  SC percentage was 4.1%; the U.S. percentage was 15.4%.
- No other race categories represented more than 0.6% of the population in Fairfield County in 2008.

#### Sex

For this study, Genesis Consulting Group compiled population by sex data for Fairfield County and the comparison jurisdictions for each year from 2000 to 2008 based on available U.S. Census Data (estimates). For each year, the raw number of residents and percentage of the total residents by sex is presented for each jurisdiction.

The full set of population by sex data is provided in Appendix 3 of this Plan.

- Fairfield County's 2008 male/female percentage ratio in 2008 was 47.4%/52.6%, which is a
  decrease of 0.2% in the male population from 2000.
- Only Orangeburg had a lower percentage of male population/higher percentage of female population in 2008 (46.4%/53.6%).
- The SC average in 2008 was 48.7% male and 51.3% female; the U.S. average was 49.3% male and 50.7% female.

#### Age Group

The age of a community's population is an important consideration for companies when making decisions on whether to locate or expand in a particular area. A community with a relatively high percentage of population that is young can often offer potential employers with a steady pool of available workers over a considerable period of time (perhaps 20 to 40 years). Conversely, employers located in communities with an aging population can be faced with turnover issues due to retirement (and associated loss of institutional knowledge and stability), as well as higher costs for hiring and training of replacement employees. An aging population can sometimes further result in a shortage of workers to fill available positions, which can often result in increased costs of labor.

For this study, Genesis Consulting Group compiled population by age data for Fairfield County and the comparison jurisdictions for the years 1980, 1990, 2000, 2005, and 2008 based on available U.S. Census Data (complete counts and estimates). For each year, the raw number of residents and percentage of the total residents by age group is presented for each jurisdiction. The specific age groups reported via the U.S. Census have changed over time.

For 1980, the available age group categories include Under 5 Years; 5 to 14 Years; 5 to 17 Years; Under 18 Years; 18 Years and Older; 20 to 24 Years; 25 to 29 Years; 25 to 34 Years; 30 to 34 Years; 35 to 44 Years; 45 to 54 Years; 55 to 59 Years; and 60 to 64 Years. The Median Age of the population is also reported. By 1990, several additional categories were available: 35 to 39 Years; 40 to 44 Years; 45 to 49 Years; 50 to 54 Years; 65 to 74 Years; 65 Years and Older; and 75 to 84 Years. By 2000, even more categories were available: 5 to 9 Years; 10 to 14 Years; and 15 to 19 Years. By 2005, Median Age was no longer reported.

In order to better determine the population by age group as it relates to potential workers within the prime working years, additional age group categories (raw number of residents and percentage of the total residents) were calculated for each of the years for each jurisdiction using the available data: 20 to 64 Years; 20 to 34 Years; 20 to 44 Years; 35 to 64 Years; and 45 to 64 Years.

The full set of population by age group data is provided in Appendix 4 of this Plan.

- The percentage of Fairfield County's population that is within the prime working years of 20-64 years has grown from 51.7% in 1980 to 60.1% in 2008.
- This increase is greater than the increase between 1980 to 2008 in SC (56.3% to 59.9%) and the U.S. (56.7% to 60.0%).
- Within the comparison group, Richland (61.8%), York (61.5%), Lancaster (61.1%), Berkeley (61.1%), Lexington (60.9%), Pickens (60.9%), and Chesterfield (60.5%) had a larger percentage than Fairfield in the 20-64 years category for 2008.
- All Counties within the comparison group realized increases in the percentage of the population between 20-64 years from 1980 to 2008. Only Lexington County realized a decrease in the percentage of the population between 20-64 between 2000 and 2008 (61.3% vs 60.9%).
- In 1980 in Fairfield County, the percentage of the population between 20-34 Years was 23.2%; the percentage of the population between 35-64 Years was 28.6%.
- In 2008 in Fairfield County, the 20-34 Years percentage had dropped to 18.4%, and the 35-64 Years percentage had increased to 41.6%.

#### **Key Findings**

- In 2008 in Fairfield County, the 45-64 Years percentage was 28.6%, which is higher than all other Counties in the comparison group, as well as the SC and U.S. averages.
- In 2008 in Fairfield County, the percentage of the population 65 Years and Over was 14.1%. Only Orangeburg (14.8%), Newberry (14.7%), and Colleton (14.4%) had a larger percentage in the 65 Years and Over category within the comparison group.

#### **Labor Force and Unemployment**

For this study, Genesis Consulting Group compiled labor force and unemployment data for Fairfield County and the comparison jurisdictions for the years 1990 – 2009 based primarily on available data from the South Carolina Employment Security Commission (recently renamed the South Carolina Department of Employment and Workforce) and the U.S. Department of Labor – Bureau of Labor Statistics. For each year for Fairfield County, the total civilian labor force, the labor force employed, and the labor force unemployed are listed, along with the corresponding yearly unemployment rate for the County. Yearly unemployment rates for all other jurisdictions in the comparison group from 1990 – 2009 are also provided.

In addition to yearly data, Genesis Consulting Group compiled monthly unemployment rate data for Fairfield County and the comparison jurisdictions for the period between January 2005 and April 2010. Average monthly unemployment rates for each jurisdiction was also calculated over the same time period.

The full set of labor force and unemployment data is provided in Appendix 5 of this Plan.

- Fairfield County's highest level of yearly unemployment between 1990 2009 was 13.4% in 2009.
   The next highest year was 1991 at 12.3%.
- Fairfield County's lowest level of yearly unemployment between 1990 and 2009 was in 2000 at 4.9%.
- Fairfield County's average yearly unemployment since 1990 is 9.3%. Only Chester (10.7%) and Orangeburg (9.4%) had higher average yearly unemployment within the comparison group.
- Fairfield County's average yearly unemployment is 3.3% higher than the SC average and 3.7% higher than the U.S. average.
- In 2009, 6 Counties in the comparison group had higher unemployment rates than Fairfield (13.4%): Chester (20.5%), Lancaster (17.9%), Chesterfield (17.1%), Orangeburg (15.9%), York (14.2%), and Colleton (13.5%).
- Since January of 2005, Fairfield County's monthly unemployment rate average is 10.1%. 4 Counties in the comparison group have higher monthly unemployment rate averages over that period: Chester (13.1%), Lancaster (11.7%), Chesterfield (11.0%), and Orangeburg (11.0%).
- Since January of 2005, Fairfield reached its highest unemployment rate (14.8%) in June of 2009 and January 2010. During that period, Fairfield County reached its lowest unemployment rate (7.2%) in May of 2005.
- Since January of 2005, only Lexington County from the comparison group has had an average monthly unemployment rate lower than the U.S. average (5.6% vs 6.1%).

#### Number of Jobs

For this study, Genesis Consulting Group compiled number of jobs data for Fairfield County and the comparison jurisdictions for the period between 1980 and 2007. Specific data sets were compiled for the years 1980, 1985, 1990, 1995, 2000, 2005, 2006, and 2007 based primarily on available data from the U.S. Department of Commerce, Bureau of Economic Analysis and the South Carolina Association of Counties. The % change per year in the number of jobs per jurisdiction was further calculated for the periods between 1980 and 2007, 1990 and 2007, and 2000 and 2007.

The full set of number of jobs data is provided in Appendix 6 of this Plan.

#### **Key Findings**

- There were fewer jobs in Fairfield County in 2007 than in 1980 (6,997 vs. 7,329).
- Between 2000 and 2007, Fairfield County had a net loss of 1,402 jobs. This represents a decrease of 2.81% per year, the second biggest decrease within the comparison group. Chester County had a net loss of 2,890 jobs (-3.31% per year).
- Other Counties in the comparison group showing a net loss of jobs between 2000 and 2007 include Lancaster (-2.20% per year), Chesterfield (-1.72% per year), Orangeburg (-0.67% per year), and Colleton (-0.06% per year).
- Between 1990 and 2000, Fairfield County had a net gain of 55 jobs, though the number of jobs grew by 161 by 1995 before decreasing. In the period between 1980 and 1990, Fairfield County had a net increase of 893 jobs, though the number of jobs shrank by 336 by 1985 before increasing.
- York County and Lexington County had the largest job gains by percentage since 2000 (2.54% and 2.37% per year), but still trailed the SC average over that timeframe (2.66% per year).
- Since 1980, the growth rate in the number of jobs in SC has averaged almost 2x the growth rate in jobs nationwide.

#### Per Capita Income

For this study, Genesis Consulting Group compiled per capita income data for Fairfield County and the comparison jurisdictions for the period between 2000 and 2007. Specific data sets were compiled for the years 2000, 2005, 2006, and 2007 based primarily on available data from the U.S. Census Bureau and the U.S. Department of Commerce, Bureau of Economic Analysis. The cumulative % change and the % change per year in per capita income per jurisdiction were further calculated for the period between 2000 and 2007.

The full set of number of per capita income data is provided in Appendix 7 of this Plan.

- Per Capita Income in Fairfield County has grown 3.63% per year between 2000 and 2007, which is just slightly below the SC average (3.77% per year).
- This growth rate for Fairfield County Ranks 7th within the comparison group behind Berkeley (5.25% per year), Kershaw (4.52% per year), Orangeburg (4.27% per year), Colleton (4.16% per year), Chester (4.14% per year), and Newberry (3.66% per year).
- Lancaster County had by far the lowest growth rate in per capita income between 2000 and 2007 (1.00% per year). The next lowest was Lexington County at 2.67% per year.

#### **Key Findings**

 However, Lexington County had the highest per capita income in 2007 (\$34,744) within the comparison group. Fairfield County was 10th at \$25,725, ahead of Lancaster (\$22,076), Chesterfield (\$24,533), and Colleton (\$25,402).

#### Median Household Income

For this study, Genesis Consulting Group compiled median household income data for Fairfield County and the comparison jurisdictions for the period between 1989 and 2007. Specific data sets were compiled for the years 1989, 1999, and 2007 based primarily on available data from the U.S. Census Bureau and the U.S. Department of Commerce, Bureau of Economic Analysis. The % of the U.S. Median Household Income per year in Median Household Income per jurisdiction was further calculated for 1989, 1999, and 2007.

The full set of median household income data is provided in Appendix 8 of this Plan.

#### **Key Findings**

- Only 2 Counties in the comparison group had median household income in 2007 above the U.S. average – York (\$54,092) and Lexington (\$51,040).
- Fairfield County's median household income in 2007 (\$34,174) was 67.4% of the U.S. average, which was higher than only Orangeburg (65.4% of the U.S. average) and Chesterfield (65.9% of the U.S. average). The SC average in 2007 was 85.7% of the U.S. average.
- Between 1989 and 1999, Fairfield County gained ground on the U.S. average (71.5% in 1989 vs 72.3% in 1999). The County then lost ground on the U.S. average between 1999 and 2007.
- Between 1999 and 2007, only Berkeley (95.0% to 96.15), York (106.1% to 106.6%), and Newberry (78.3% to 78.4%) within the comparison group gained ground on the U.S. average.

#### Average Wage Per Job

For this study, Genesis Consulting Group compiled average wage per job data for Fairfield County and the comparison jurisdictions for the period between 2000 and 2007. Specific data sets were compiled for the years 2000, 2006, and 2007 based primarily on available data from the U.S. Department of Commerce, Bureau of Economic Analysis and the South Carolina Association of Counties. The % of the U.S. Average Wage per Job per year and the % of the S.C. Average Wage per Job per Year in Average Wage per Job per jurisdiction were further calculated for 2000, 2006, and 2007. The % Change per Year in the Average Wage per Job per jurisdiction was also calculated for the period between 2000 and 2007.

The full set of average wage per job data is provided in Appendix 9 of this Plan.

- In 2000, Fairfield County's average wage per job was 123.9% of the SC average and 98.9% of the U.S. average.
- Fairfield County's average wage per job in 2000 (\$34,326) was the highest within the comparison group followed by Richland (\$29,414), Berkeley (\$28,817), and York (\$28,439) all of which were above the SC average (\$27,712).

#### **Key Findings**

- By 2007, Fairfield County's average wage per job was still above the SC average, but had dropped to 3rd within the comparison group behind Richland County and Berkeley County, and to 84.3% of the U.S. average.
- Fairfield County had the lowest % Change Per Year (1.07%) of all counties in the comparison group by more than a full percentage point (next lowest was Chesterfield at 2.20%). All but two counties had growth rates above 3% (and one of those counties – York – had an annual growth rate of 2.98%). The U.S. average grew by 3.41% per year, and the SC average grew by 3.43% per year.
- Colleton County had the lowest average wage per job in 2000, 2006, and 2007.

#### Estimated Travel Time for Workers Not Working at Home

For this study, Genesis Consulting Group compiled estimated travel time data for workers not working at home in Fairfield County and the comparison jurisdictions for the year 2000 based on available U.S. Census Data (estimates) and data from the North Carolina Department of Commerce. The raw number of workers not working at home is presented for each jurisdiction, as well as the raw number of workers in each travel time category. The % of total workers not working at home in each travel time category is also presented. Specific travel time categories include: Travel Time to Work < 5 Minutes; Travel Time to Work 5-14 Minutes; Travel Time to Work 15-29 Minutes; Travel Time to Work 30-44 Minutes; Travel Time to Work 45-59 Minutes; Travel Time to Work 60-89 Minutes; and Travel Time to Work 90+ Minutes. The average travel time in minutes for workers not working at home per jurisdiction was further provided.

The full set of estimated travel time data for workers not working at home is provided in Appendix 10 of this Plan.

- Workers in Fairfield County have an average travel time of 28 minutes compared to the average across the comparison group of 27 minutes.
- The lowest average travel time within the comparison group is Richland County at 22 minutes; the highest is Colleton at 33 minutes.
- Fairfield County is below the average for the comparison group in the <5 Minutes, 5-14 Minutes, 15-29 Minutes, and the 90+ Minutes categories.
- Fairfield County is above the average for the comparison group in the 30-44 Minutes, 45-59
   Minutes, 45-59 Minutes, and 60-89 Minutes categories.
- Colleton County has the highest percentage of workers that travel 90+ Minutes at 6.5%, followed by Chesterfield County at 4.0%.
- Colleton County and Chesterfield County also have the highest percentage of workers that travel
   5 Minutes at 4.1%.

#### **Commuting Patterns (Fairfield County)**

For this study, Genesis Consulting Group compiled in-county and out-of-county work travel data for Fairfield County and the comparison jurisdictions for the year 2000 based on available U.S. Census Data (estimates) and data from the North Carolina Department of Commerce. The total workforce is presented for each jurisdiction, as well as the raw number of workers in each work travel category. The % of total workers in each work travel time category is also presented. Specific work travel categories include: Work in State / in County of Residence; Work in State / Outside County of Residence; and Work Outside State of Residence.

Genesis Consulting Group also compiled data on more detailed worker commuting patterns solely for Fairfield County. This data included a listing of the top 10 counties that workers commute from in order to reach their jobs in Fairfield County and the top 10 counties that workers commute to from their residences in Fairfield County in order to reach their jobs outside of Fairfield County.

The full set of in-county and out-of-county work travel data is provided in Appendix 11 of this Plan. The full set of worker commuting pattern data for Fairfield County is provided in Appendix 12 of this Plan

#### **Key Findings**

- 49.6% of Fairfield County's workforce works within the County, which is the 2nd lowest % within the comparison group (Berkeley County's percentage is 45.1%).
- No other counties in the comparison group have percentages below 50%.
- The County with the highest percentage of the workforce that works within the County is Richland County at 82.7%, followed by Orangeburg County (76.9%), Chesterfield County (66.8%), Newberry County (65.1%), and Colleton County (65.0%).
- York County has the highest percentage of its workforce that works out of state (36.2%), followed by Lancaster (18.7%), Chesterfield (17.1%), Chester (11.4%), and Fairfield (3.0%).
- Of the Fairfield County workforce that works outside the county, the largest number work in Richland County (2,758 or 60.5%), followed by Lexington (481 or 10.4%), Chester (439 or 9.5%), and Newberry (363 or 7.8%).
- The percentage of Fairfield County's total workforce that works in Richland County is 27.9%.
- The largest percentage of workers that commute into Fairfield County comes from Richland County (45.4%), followed by Lexington (16.8%) and Kershaw (16.7%).
- The percentage of the total employment within Fairfield County represented by workers from Richland County is 17.6%.

### Average Monthly Employment by Sector (Fairfield County)

For this study, Genesis Consulting Group compiled average monthly employment by sector data for Fairfield County for the period between 2005 and the 3rd Quarter of 2009. Specific data sets were compiled for the years 2005 and 2006, as well as for the 3rd Quarter of 2009, based on available data from the South Carolina Employment Security Commission (recently renamed the South Carolina Department of Employment and Workforce). The average monthly employment for each period is listed by NAICS code. Also presented is the % change by NAICS code from 2005 to the 3rd Quarter of 2009.

The full set of average monthly employment by sector data is provided in Appendix 13 of this Plan.

#### Key Findings

- Reporting by NAICS is inconsistent throughout the reporting period (e.g., Administrative and Support and Waste Management and Remediation Services). Some sectors are not reported based on "proprietary data" (e.g., Mining, Utilities).
- Total Average Monthly Employment in Fairfield County had declined 6.8% since 2005.
- The largest employment sectors in Fairfield County in the 3rd Quarter of 2009 are Local Government (1,334); Health Care and Social Assistance (607); Retail Trade (602); and Wholesale Trade (466).
- Manufacturing has shown the most significant decline (-66.9%) since 2005.
- Health Care and Social Assistance has shown the most significant increase since 2005 (22.6%) not including Professional, Scientific & Technical Services anomaly.
- The majority of sectors have seen a decline since 2005, with Finance and Insurance declining 43.9% and Construction down 15.8%.

#### Major Employers (Fairfield County)

For this study, Genesis Consulting Group compiled a listing of major employers (over approximately 100 FTEs) and other significant employers (over approximately FTEs) in Fairfield County based on available data for 2008 through 2010 from multiple sources, including the Harris SC Manufacturing Directory, SC Chamber of Commerce, Fairfield County Chamber of Commerce, Central SC Alliance, SC Department of Employment and Workforce, SC Department of Commerce, and Fairfield County Economic Development Office.

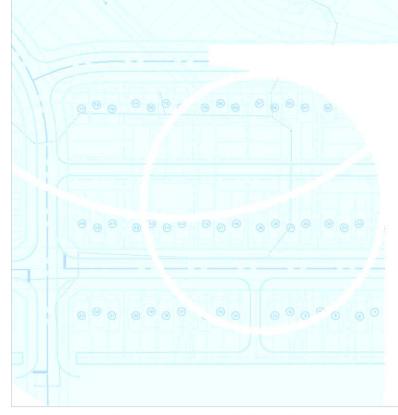

- Largest by Employment (2008/2009/2010):
  - SCE&C/V.C. Summer Nuclear Station (926)
  - Fairfield County School District (650)
  - Ben Arnold Beverage (426)
  - Fairfield County Government (265)
  - INVISTA/Performance Fibers (225)
  - Isola (170)
  - Lang Mekra (153)
  - Fairfield Memorial Hospital (130)
  - Guardian Fiberglass (108)
- Other Significant Employers
  - Elite Electronic Systems
  - Heritage Healthcare of Ridgeway LLC
  - Wal-Mart Associates Inc.
  - The Wackenhut Corporation
  - Saint-Gobain Technical Fabrics
  - Town of Winnsboro
  - Fluor Daniel Inc
  - Fairfield County Board of Disabilities
  - Winnsboro Petroleum Company Inc
  - The Blythewood Oil Company Inc.
  - Fairfield Healthcare Center LLC

- A T Williams Oil Company Inc
- United Hospice Inc
- Fujicopian (USA) Inc
- MC2 Finishing Solutions
- Hacker Instruments Inc.
- Palmetto Imaging Technology
- Palmetto Technical Fabrics International Inc.
- Phillips Granite Co
- RTEV Inc (Ruff & Tuff Electric Vehicles)
- Safelite AutoGlass
- SC Dept of Transportation
- SC Department of Social Service

The full set major employer data for Fairfield County is provided in Appendix 14 of this Plan.

- Several of the County's largest employers are in relatively stable sectors with comparatively higher pay (i.e., government, healthcare, power supply)
- The top 10 employers in the County account for approximately 50% of all jobs within the County

#### Tax Revenues

#### **Property Tax Rates**

For this study, Genesis Consulting Group compiled property tax rate data for Fairfield County and the comparison jurisdictions for the latest available year (2009) based on data from the South Carolina Association of Counties. Specific data sets included base millage rate; municipal millage; school district millage; other millages not included in County base; special fees (additional charges); industrial abatements (exemption for qualified industries); and value of one mil.

The full set of property tax rate data is provided in Appendix 15 of this Plan.

#### **Key Findings**

- Fairfield County's millage rate in 2009 was 0.1759 for base operations. Only Chester had a higher base rate; however, Fairfield had fewer additional special purpose millage or fees (i.e., for water/sewer, stormwater, sanitation, solid waste, recreation, fire protection, emergency services, transportation, street pavement, road maintenance, street lights, landscaping, targeted subdivision improvements, etc.
- The value of One Mil (County Operations Only) in Fairfield County in 2009 was \$112,291).
   Counties in the comparison group with lower values include Chester (\$80,540), Newberry (\$103,354), and Chesterfield (\$107,000).
- The under developed Counties like Fairfield, Chester, and Chesterfield have mil values that are approximately 10% of the more developed Counties like Richland, Lexington, and York. They also have lower millage rates than the developed Counties.
- Fairfield's school district millage rate of 0.213 is among the lowest in the comparison group (Chester – 0.22140; Lexington 2 – 0.1787; Lancaster – 0.17530; Chesterfield – 0.18951; Pickens 0.16810; and Colleton 0.15088). Lexington 4 and Richland 2 were the highest at 0.3836 and 0.3423, respectively.

#### **Property Tax Revenues**

For this study, Genesis Consulting Group compiled property tax return data for Fairfield County and the comparison jurisdictions for the period between FY 2002 and 2008 based on data from the South Carolina Budget and Control Board. Specific data sets for each of the 7 seven years included total property tax revenues and the following tax revenue categories: owner occupied; agricultural (private); agricultural (corporate); commercial/rental; personal property (vehicles); other personal property; manufacturing; utility; business personal; motor carrier; and fee-in-lieu and joint industrial park. Also calculated were the cumulative % change from 2002 to 2008 and the % change per year from 2002 to 2008. For each tax revenue category, the % of the total property tax revenue was calculated for each fiscal year.

The full set of property tax return data is provided in Appendix 16 of this Plan.

#### **Key Findings**

- Fairfield County's FY08 Total Property Tax Revenues were approximately \$38.6M, which is comparable to several counties in the comparison group (Colleton - \$37.1M; Newberry - \$38.9M; Kershaw - \$41.4M).
- Fairfield County's FY08 Revenues were higher than Chesterfield (\$25.8M), Chester (\$30.2M), and Colleton (\$37.1).
- 53.3% of Property Tax Revenue for Fairfield County in FY08 was from the Utility category the next highest is York County at 19.6% and Orangeburg County at 16.0%.
- The percentage of Utility contribution to Fairfield County was at its highest in 2004 at 59.2%.
- Other primary contributors to the Total Revenues in Fairfield County in 2008 were Commercial/Rental (18.3%), Owner Occupied (11.1%), Personal Property (Vehicles) (7.1%), and Manufacturing (5.3%).
- The percentage statewide contribution of Utility was 8.5%, Manufacturing statewide was 8.1%;
   Commercial/Rental was 37.9%, and Owner Occupied was 23%.
- The percentage contribution of Manufacturing in Chester County was 25.9% in 2008 (and was as high as 30% in 2003).
- Tax Revenues from Manufacturing in Fairfield County are down 27.4% since 2002; Owner Occupied is up 85.5% and Commercial/Rental is up 76.5%.
- Statewide averages in Manufacturing are down 10.8% since 2002; Owner Occupied is up 82.6% and Commercial/Rental is up 56.7%.
- Fairfield County receives \$0 in revenue from Fee-in-Lieu and Joint Industrial Park; the SC average is 4.7% of revenues in 2008.
- Fairfield County receives approximately 2% of revenues from Agricultural (Private) and Agricultural (Public) combined. The SC state average is 0.7%.

#### Total Tax Revenues & Expenditures (Including School Districts)

For this study, Genesis Consulting Group compiled tax revenue and expenditure data for Fairfield County and the comparison jurisdictions for the period between FY 2002 and 2008 based on data from the South Carolina Budget and Control Board. Specific data sets for each of the 7 seven years included total revenues (school district, county, city); total expenditures (school district, county, city); total revenues (school district only); total expenditures (school district only); total expenditures (school district only); total revenues (city only); and total expenditures (city only). Also calculated were the cumulative % change from 2002 to 2008 and the % change per year from 2002 to 2008.

The full set of tax revenue and expenditure data is provided in Appendix 17 of this Plan.

- Total Tax Revenues (School District, County, City) in Fairfield County have increased by 34.7% from 2002 to 2008, while Total Expenditures have increased 40.1% over that same period.
- The average increases for Revenues and Expenditures statewide from 2002 to 2008 are 26.1% and 41.2% respectively.
- Only Chesterfield County within the comparison group has shown a decrease in Total Tax Revenues from 2002 to 2008 (-7.4%).
- For 4 of the years between 2002 and 2008, Fairfield County's Total Expenditures were lower than its Total Tax Revenues (2002, 2003, 2007, and 2008).

#### **Key Findings**

- Only in 2003, however, were Total Revenues (County Only) higher than Total Expenditures (County Only).
- Total Expenditures (County Only) have risen 92.2% between 2002 and 2008, while Total Revenues (County Only) have risen 49.5% during that period.
- Approximately 60-70% of Fairfield County's Total Tax Revenues are for the School District (60.8% in 2008; 64.5% in 2007; 64.1% in 2006; 70.7% in 2005; 69.2% in 2004; 69.1% in 2003; and 67.6% in 2002). These percentages are basically in line with the average across the state.

#### SC Department of Revenue 2010 Jobs Tax Credit Rankings

For this study, Genesis Consulting Group compiled the most recent (2010) South Carolina jobs tax credit rankings data for Fairfield County and all other counties in the state based on data from the South Carolina Department of Revenue. Specific jobs tax credit ranking categories as established by South Carolina law include "Distressed"; "Least Developed"; "Under Developed"; "Moderately Developed"; and "Developed." Denotation of those counties that also meet the criteria for "Moratorium Counties" was also provided.

The full set of jobs tax credit ranking data is provided in Appendix 18 of this Plan.

#### **Key Findings**

- Within the comparison group, Fairfield County, Chesterfield County, and Orangeburg County are considered "Least Developed" (the 2nd lowest category).
- Richland County, Lexington County, and Kershaw County are considered "Developed."
- Berkeley County and York County are considered "Moderately Developed."
- Chester County, Colleton County, Newberry County, and Pickens County are considered "Under Developed."
- Lancaster County is considered "Distressed" (but does not meet the criteria for "Moratorium Counties").

#### Note:

The South Carolina law that established the terminology (distressed, least developed, under developed, moderately developed, and developed) for jobs tax credit rankings was amended in 2010 to establish new terminology as detailed in the paragraph below:

"The department shall rank and designate the state's counties by December thirty-first each year using data from the South Carolina Employment Security Commission and the United States Department of Commerce. The county designations are effective for taxable years that begin in the following calendar year. The counties are ranked using the last three completed calendar years of per capita income data and the last thirty-six months of unemployment rate data that are available on November first, with equal weight given to unemployment rate and per capita income as follows:

- (1) The twelve counties with a combination of the highest unemployment rate and lowest per capita income are designated 'Tier IV' counties. Notwithstanding any other provision of law, no more than twelve counties may be designated or classified as 'Tier IV' and notwithstanding any other provision of this section, a county may be designated as 'Tier IV' only by virtue of the criteria provided in this item.
- (2) The twelve counties with a combination of the next highest unemployment rate and next lowest per capita income are designated 'Tier III' counties.
- (3) The eleven counties with a combination of the next highest unemployment rate and the next lowest per capita income are designated 'Tier II' counties.
- (4) The eleven counties with a combination of the lowest unemployment rate and the highest per capita income are designated 'Tier I' counties."

#### Education

For this study, Genesis Consulting Group cataloged the colleges/universities, K-12 public schools, and the K-12 private schools that serve Fairfield County.

#### Colleges/Universities, K-12 (Public & Private)

- Colleges/Universities
  - No colleges/universities within the county lines
  - Nearby colleges/universities include:
    - University of South Carolina
    - Allen University
    - Benedict College
    - Clinton Junior College
    - Columbia College
    - Columbia International University
    - Lutheran Theological Southern Seminary
    - Midlands Technical College
    - Newberry College
    - Presbyterian College
    - South University
    - Winthrop
    - York Technical College

#### K-12 Public Schools

- 2008 2009 Enrollment: 3,325
- 1 school district
- 4 elementary schools: Fairfield, Geiger, Kelly Miller, McCrorey-Liston
- 1 middle school: Fairfield
- 1 high school: Fairfield Central
- 1 career and technology center
- 1 magnet school for math and science
- 1 odyssey academy: Cordon

#### K-12 Private Schools

- Palmetto Montessori School (K-6)
  - 2008 2009 Enrollment: 34
- Richard Winn Academy (PK-12)
  - 2008 2009 Enrollment: 305

#### **General Public Education Data**

For this study, Genesis Consulting Group compiled general public education data for Fairfield County and the other Counties in the comparison jurisdictions for the period between 2004 and 2009 based on data from the South Carolina Department of Education. Data was collected for the 23 public school districts that serve the comparison jurisdictions.

County	Public School Districts
Fairfield County	Fairfield County School District
Richland County	Richland County School District 1
	Richland County School District 2
Lexington County	Lexington County School District 1
	Lexington County School District 2
	Lexington County School District 3
	Lexington County School District 4
	Lexington/Richland County School District 5
Chester County	Chester County School District
York County	York County School District 1
	Clover School District
	York County School District 3
	Fort Mill School District
Newberry County	Newberry County School District
Kershaw County	Kershaw County School District
Lancaster County	Lancaster County School District
Chesterfield County	Chesterfield County School District
Orangeburg County	Orangeburg County School District 3
	Orangeburg County School District 4
	Orangeburg County School District 5
Pickens County	Pickens County School District
Colleton County	Colleton County School District
Berkeley County	Berkeley County School District

Specific data sets for each of the 23 public school districts for each year between 2004 and 2009 included enrollment; dollars per student; student/teacher ratio; and graduation rate.

The full set of general public education data is provided in Appendix 19 of this Plan.

### Key Findings

- Little to no change in enrollment during the past six years
- Consistent increase in the amount of dollars per student
  - From 2004 2008, Fairfield county school district ranked 1st in terms of dollars per student
  - Ranked 2nd in 2009 behind Richland 1 School District
- Student/Teacher ratio remained constant
  - Most years there were 16-18 students to every teacher
  - Only change came in 2006 when there were only 13 students to every teacher
- No graduation rate trend slight increases and decreases from year to year
  - In 2009, Fairfield county's graduation rate ranked 13th out of the 23 school districts analyzed
  - From 2005 2008, its graduation rate ranked 19th or 20th out of 23 school districts

### **SAT & ACT Scores**

For this study, Genesis Consulting Group compiled SAT and ACT data for Fairfield County and the comparison jurisdictions for the period between 2004 and 2009 based on data from the South Carolina Department of Education. Data was collected for the 23 public school districts that serve the comparison jurisdictions, as well as for South Carolina and for the United States. For the ACT data, additional information was compiled from ACT, Inc.

Specific SAT data sets for each year between 2004 and 2009 included number of test takers; number of students in senior class; % of students tested; average test score in critical reading; average test score in math; average test score in writing; and average composite score. Specific ACT data sets for each year between 2004 and 2009 included number of test takers; average test score in English; average test score in math; average test score in reading; average test score in science; and average composite test score.

The full set of SAT and ACT data is provided in Appendix 20 of this Plan.

- Percent tested relatively constant from 2004 2008, big drop in 2009 (31% in 2009, down from 45% in 2008)
- No noticeable scoring trends slight increases and decreases from year to year within each section tested
- Fairfield ranks last among the included counties based on average composite score
  - Fort Mill School District ranked first
- Comparatively, from 2004 2009, Fairfield county test scores most resemble scores from Orangeburg 3 School District and Orangeburg 5 School District
  - Fairfield county test scores least resemble scores from Lexington/Richland 5 School District and Fort Mill School District during the same time period
- Consistently below South Carolina and U.S. averages in all sections critical reading, math, writing
- Less students took the ACT in comparison to the SAT from 2004 2007
  - Slightly more students took the ACT in 2008 and 2009
- Ranked last among included counties and well below South Carolina and U.S. averages in all four subject tests (English, Math, Reading, and Science) and overall composite score

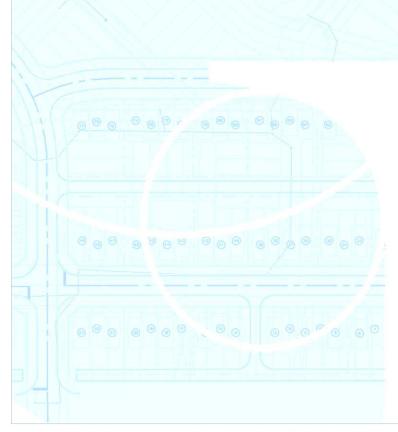

### **Educational Attainment**

For this study, Genesis Consulting Group educational attainment data for Fairfield County and the comparison jurisdictions for the period between 1980 and 2000 based on data from the U.S. Census Bureau. Specific data sets were compiled for 1980, 1990, and 2000 for each of the comparison jurisdictions. For each year, the % of persons 25 years and older in each jurisdiction in the following two categories is listed: high school graduate or higher; bachelor's degree or higher.

The full set of educational attainment data is provided in Appendix 21 of this Plan.

- Significant increase in the amount of high school graduates from 1980 2000
  - Increased from 43.3% (1980) to 67% (2000)
- In 2000, Fairfield ranked 12th out of 13 in percentage of high school graduates or higher.
- Little to no increase in the percentage of bachelor's degrees or higher
  - 9.4% in 1980
  - 9.6% in 1990
  - 11.7% in 2000
- In 2000, Fairfield ranked 9th out of 13 in percentage of bachelor's degree or higher.
- Fairfield ranked below the state and national percentages in both categories during the time period.

### Other Economic Development Information

For this study, Genesis Consulting Group compiled a listing of currently available industrial sites/parks and industrial buildings within Fairfield County based on data from the Fairfield County Economic Development Office, the Central SC Alliance, and the South Carolina Department of Commerce. The full set of information on available industrial sites/parks and industrial buildings in Fairfield County is provided in Appendix 22 of this Plan.

### Available Industrial Sites/Parks & Industrial Buildings (Fairfield County)

- Industrial Sites/Parks
  - Walter B. Brown Industrial Park II
  - McMaster Industrial Park
  - Frazier/Brown Industrial Site
  - Douglas Tract
  - Plum Creek Industrial Park
  - US 321 Rail Site
  - Averyt Industrial Site
  - Hood Tract
  - Class A Business/Industrial Park
- Industrial Buildings
  - Fairfield County Spec Building
  - Prime Metals
  - Charm
  - Perry Ellis Building

### Land Use Planning & Zoning

For this study, Genesis Consulting Group reviewed the current land uses and existing zoning within the County based on the most recent zoning maps and other geographical information.

- Fairfield is the 18th largest County by land mass (438,428 acres) in the State.
- Single largest land use is Timber (Forest) accounting for 87% of the land
- Single largest zoning classification is RD accounting for more than 75% of the land
- Timber Land is largely held by either private owners (30%) or Corporations engaged in the Timber Industry (48%)
- Developed or Urban land is less than 5% of the County
- From 1978-1992, the number of farms dropped 27% now less than 200 farms in the County
- There are only a few isolated regions with zoning beyond RD: Monticello/Jenkinsville, Winnsboro and central Fairfield including Rion and Rockton, Ridgeway, and the Lake Wateree area.
- There are only 11 I-1 parcels in the County
- The most current comprehensive plan was last updated in 1997

### Water/Sewer Infrastructure

For this study, Genesis Consulting Group catalogued the water and wastewater infrastructure that serves Fairfield County.

- Water Infrastructure
  - Water is supplied by the following providers:
    - Town of Winnsboro
    - Town of Ridgeway
    - Jenkinsville Water District
    - Mid-County Water District
    - Mitford Rural Water District
  - The Town of Winnsboro draws water from Jackson Mill Creek watershed. The other providers draw water from wells.
  - The Town of Winnsboro has approximately 3 times the water capacity of the other providers.
  - The County is also served by several private, residential water systems, operating off wells.
- Wastewater Infrastructure
  - Wastewater service is provided by the following:
    - Town of Winnsboro
    - Town of Ridgeway
  - The Town of Great Falls (Chester County) provides wastewater service to the intersection of SC Highway 200 and I-77.
  - Most rural portions of the County do not have access to wastewater service.

### Industrial/Commercial Development Activity

For this study, Genesis Consulting Group compiled a listing of industrial development activity within Fairfield County and select other comparison jurisdictions (Richland, Lexington, Newberry, Kershaw, and Orangeburg Counties) for the period between 1996 to 2010 based on available data from the Central SC Alliance. The data was based on official company announcements and included the following types of information for each County: date of announcement; name of company, type of investment (new or expansion); investment dollar value; estimated number of jobs to be created; and product/service associated with the announcement.

The full set of information on industrial development activity is provided in Appendix 23 of this Plan.

- For Counties in the comparison group where comparable data is available (Fairfield, Richland, Lexington, Newberry, Kershaw, and Orangeburg), Fairfield County had the second lowest amount of development investment (\$182,735,000) and the second fewest new jobs (1,836) from 1996 to 2010.
- Orangeburg County was lower in both categories with \$175,276,000 in development investment and 831 new jobs.
- Richland County was the highest in both categories with \$1,747,068,000 in development investment and 18,316 new jobs.
- The largest three investments in Fairfield County since 1996 are Guardian Building Products in

### **Key Findings**

2006 (\$39,000,000), Invista in 2006 (\$30,000,000), and Uniroyal Goodrich Tire Company in 1996 (\$25,000,000), which represents 51.4% of all investment over that timeframe.

- The largest increases in jobs came from PrimeSouth in 2008 (400 jobs) and Mack Trucks in 1999 (350); Mack Trucks has since closed.
- There have been no major investments or job creations in the County since October of 2008 and only 1 (PrimeSouth) since August of 2006.
- Of the 22 announcements since 1996, 10 have been new operations, and 12 have been expansions of existing operations. Lang Mekra accounts for 4 of the expansions.
- Over the past 5 years, six (6) commercial projects greater than 5,000 square feet were developed.
   One of these was the VC Summer Nuclear Plant, which consisted of multiple buildings, but is classified as one (1) commercial project.

### Residential Development Activity

For this study, Genesis Consulting Group compiled information on residential development activity within the County over the past five years primarily using data from the Central Midlands Council of Governments (CMCOG). The CMCOG has been tracking building permits since the early 1970's. The following table is a comparison of residential permits from 2005 – 2009:

Year	Fairfield	Lexington	Newberry	Richland
2005	99	2,225	150	4,289
2006	96	3,406	148	5,469
2007	106	2,880	105	3,833
2008	65	1,840	191	2,823
2009	41	1,465	199	1,781
Total	407	11,816	793	18,195

### **Key Findings**

- Over the past 5 years, four (4) residential subdivisions with more than 15 lots were developed. The average number of lots in each subdivision was 50.
- Over the past 5 years, zero (0) multi-family projects (i.e. apartments, condos, townhomes, hotels) were developed. According to the Central Midlands Council of Governments (CMCOG), Fairfield County was the only one in the region not to have a multi-family development over the past five (5) years.
- In 2009, 45 single family residential building permits were issued.
- In 2009, 35 mobile home permits were issued.

### Potential Economic Development Allies & Resources

For this study, Genesis Consulting Group developed a listing of organizations and other entities that could be considered economic development allies & resources for Fairfield County. The listing is organized by county/local level, regional in-state, state-level, and regional southern states allies and resources.

### County/Local Level Allies & Resources

- Fairfield County Government (Economic Development; Planning, Building & Zoning; Public Works; Road Maintenance; Recreation)
- Fairfield County Boards & Commissions (Aeronautics Commission; Behavioral Health Services; Board of Assessment Appeals; Construction Board of Appeals; Council on Aging; Disabilities and Special Needs Board; Historical Advisory Board; Hospital Board; Library Commission; Olde English Tourism Commission; Planning Commission; Recreation Advisory Board; Rural Fire Board; Zoning Appeals Board;
- Fairfield County Chamber of Commerce
- Fairfield County Municipalities (Incorporated) Town of Ridgeway; Town of Winnsboro; Town of Jenkinsville
- Fairfield County Municipalities (Unincorporated) Mitford; Winnsboro Mills
- Fairfield County Municipalities (Other) Blair; Lake Wateree; Longtown; Monticello; Parr; Rion;
   Rockton; Simpson; Smallwood; White Oak; Woodward
- Fairfield County Clemson Cooperative Extension
- Fairfield County Electric Cooperative
- Water/Sewer Utility Providers: Town of Winnsboro Gas, Water and Wastewater Department;
   Jenkinsville Water Co. Inc.; Mid County Water Co.; Mitford Rural Water District
- Fairfield County Airport (FDW)

### Regional In-State Allies & Resources

- Central SC Alliance
- Central Midlands Council of Governments
- Midlands Workforce Development Board
- Midlands Regional Education Center
- Midlands Education & Business Association
- Midlands Technical College (and MTC Enterprise Campus)
- University of South Carolina/Innovista/Technology Incubator
- Clemson Institute for Economic and Community Development
- Fort Jackson
- SCANA/SCE&C

### State-Level Allies & Resources

- South Carolina Department of Commerce
- South Carolina Employment Security Commission/South Carolina Department of Employment & Workforce
- South Carolina Research Authority/SC Launch!/EngenuitySC/ATI
- South Carolina Jobs-Economic Development Authority
- South Carolina Small Business Development Center
- South Carolina EPSCOR/IDeA Program
- South Carolina Power Team
- South Carolina Department of Parks, Recreation & Tourism
- South Carolina Chamber of Commerce
- South Carolina Small Business Chamber of Commerce

- South Carolina Economic Developers' Association (SCEDA)
- South Carolina Manufacturers Alliance
- South Carolina Manufacturing Extension Partnership
- Carolinas Nuclear Cluster (New Carolina: South Carolina's Council On Competitiveness)
- South Carolina Technology Alliance
- Palmetto Biotechnology Alliance
- South Carolina Advocates for Agriculture
- South Carolina Economics (formerly South Carolina Council on Economic Education)
- South Carolina Biomedical Research Infrastructure Network
- South Carolina Market Maker
- South Carolina Climate, Energy, and Commerce Advisory Committee
- Centers for Economic Excellence
- Spiro Institute for Entrepreneurial Leadership @ Clemson University
- Clemson University Advanced Materials Center
- Clemson University International Center for Automotive Research
- Swamp Fox
- Alliance for South Carolina's Future
- Citizens for Sound Conservation
- Main Street South Carolina
- Rural Crossroads Institute
- Southern Association for Financial Empowerment
- Municipal Association of South Carolina
- South Carolina Association of Counties
- South Carolina Association of Community Development Corporations

### Regional Southern States Allies & Resources

- Southern Economic Development Council
- Southern Crowth Policies Board
- Southern Rural Development Center

### County-Level Economic Development Organizations

For this study, Genesis Consulting Group catalogued the economic development organizations specifically serving Fairfield County and the comparison jurisdictions.

### **Fairfield County**

County Level: Fairfield County Economic Development Department (Public)

Regional Level: Central SC Alliance (Public/Private)

COG: Central Midlands Council of Governments

### **Quality of Life**

### **Accessibility and Location**

- Located in the Midlands region of South Carolina
- Bound by Chester, Lancaster, Kershaw, Richland, Newberry, and Union counties
- The county seat, the Town of Winnsboro, is located approximately 28 miles from the state capital
  of Columbia
- Five major interstates within an 85-mile radius
  - I-77 Five interchanges in Fairfield County
  - I-20 16 miles
  - I-26 25 miles
  - I-85 74 miles
  - I-95 83 miles
- In addition to the Fairfield County Airport, there are two major airports within a 75-mile radius
  - Columbia Metropolitan Airport 42 miles from Winnsboro with approximately 60 arrivals and departures per day
  - Charlotte Douglas International Airport 71 miles from Winnsboro with flights to 129 U.S. cities and 27 international destinations
- The Port of Charleston is 138 miles from Fairfield County (I-77 via I-26)
  - Largest container port on the U.S. Southeast and Culf coasts
  - 4th largest in the U.S. for cargo value
- County's rail system is served by Norfolk Southern Corporation

Fairfield County is located in the Midlands region of South Carolina. It is bound by Chester, Lancaster, Kershaw, Richland, Newberry, and Union counties. It has a total land area of 687 square miles that includes Lake Wateree on the eastern side of the County and Lake Monticello on the western side, which, combined, account for more than 20,700 acres. There are 11,080 acres of the Sumter National Forest located within the county. The county seat, the Town of Winnsboro, is located approximately 28 miles from the state capital of Columbia. There are five major interstates within an 85-mile radius of Fairfield County. Interstate 77 has five interchanges in the county. Other interstates nearby include I-20 (16 miles), I-26 (25 miles), I-85 (74 miles), and I-95 (83 miles). U.S. and state highways in Fairfield include US 321, SC 34, SC 200, SC 21, SC 213, SC 215, and SC 269.

The county-owned general aviation airport contains one 5,000 foot paved runway with a parallel taxiway. It is located on SC 269 seven miles west of I-77 and is operated by S&S Aviation. In addition to the Fairfield County Airport, there are two major airports within a 75-mile radius. The Columbia Metropolitan Airport, located 42 miles from Winnsboro, has approximately 60 arrivals and departures per day. The Charlotte Douglas International Airport, located 71 miles from Winnsboro, offers non-stop flights to 129 U.S. cities and 27 international destinations.

The Port of Charleston is 138 miles from Fairfield County via I-77 to I-26. It is the largest container port on the U.S. Southeast and Gulf coasts. It is the also the fourth largest in the U.S. for cargo value.

Norfolk Southern Corporation, which operates Norfolk Southern Railway subsidiary, serves the county's rail system. The subsidiary operates 21,000 routes miles in 22 states and the District of Columbia. It serves every major container port in the eastern U.S. and has the capacity to connect to western rail carriers. Norfolk Southern is the largest carrier of metals and automotive products in North America.

### Churches

- 105 churches located within the county
- Types of churches include:
  - African Methodist Episcopal
  - Apostolic
  - Associate Reformed Presbyterian
  - Baptist
  - Catholic
  - Christian
  - Church of Christ
  - Church of God
  - Church of God of Prophecy
  - Church of Jesus Christ of Latter-Day Saints
  - Holiness
  - Episcopal
  - Jehovah Witness
  - Methodist
  - United Methodist
  - Nazarene
  - Non-denominational
  - Presbyterian
  - Presbyterian Church of America
  - Seventh Day Adventist

Fairfield County is home to 105 separate churches and religious congregations. Specific religious affiliations include:

- African Methodist Episcopal
- Apostolic
- Associate Reformed Presbyterian
- Baptist
- Catholic
- Christian
- Church of Christ
- Church of God
- Church of God of Prophecy
- Church of Jesus Christ of Latter-Day Saints
- Holiness
- Episcopal
- Jehovah Witness
- Methodist

- United Methodist
- Nazarene
- Non-denominational
- Presbyterian
- Presbyterian Church of America
- Seventh Day Adventist

### Climate

- Four distinct seasons cool temperatures in the spring and fall, warm summers, cold winters
- Average Temperatures
  - January
    - high 52°F
    - low 28°F
  - April
    - high 74°F
    - low 48°F
  - July
    - high 90°F
    - low 68°F
  - October
    - high 74°F
    - low 48°F
- Average Precipitation 45 to 50 inches per year

Fairfield County, like the state of South Carolina, has a humid, subtropical climate. Winters are relatively mild with infrequent sleet/snowfall (average 2 inches of snow each year) and summers are very hot with temperatures often exceeding 90°F (32°C). The average temperature in Winnsboro is 42°F (6°C) in January, 60°F (16°C) in April, 78°F (26°C) in July, and 60°F (16°C) in October. The County experience ample rainfall with an average of 45.7 in annually in Winnsboro.

### **Entertainment Venues**

- No major entertainment venues
- White Oak Conference Center
  - 840-acre conference and retreat center

There are no major entertainment venues located within Fairfield County. A conference center, White Oak, is located in Fairfield and has the ability to host large adult and youth conferences as well as small retreats or seminars. White Oak has 140 motel rooms, a 400-seat dining hall, an 850-seat auditorium, a 230-seat lecture hall and 23 classrooms. There are also recreational activities available at a 25-acre lake, pool, gym, and picnic shelter. White Oak Conference Center allows groups affiliated with the Southern Baptist Convention, other Christian denominations, and non-profit organizations.

### Historic Districts, Structures, & Properties

- 42 locations within Fairfield are listed on the National Register of Historic Places
- Winnsboro's entire central core is listed on the National Register of Historic Places
- Fairfield County Courthouse designed and built by Robert Mills using Greek Revival style architecture
- Winnsboro Town Clock modeled after Independence Hall in Philadelphia
- Cornwallis House locally accepted fact that this is the house where Lord Cornwallis resided during the British occupation

According to the National Register of Historic Places, there are 42 churches, public facilities, sites, and homes with recognized historic value/significance throughout Fairfield County. The entire central core of Winnsboro is listed on the register. Historical sites of note in Winnsboro include the courthouse, town clock, and the Cornwallis House. The Fairfield County Courthouse was designed and built by Robert Mills using Greek Revival style architecture. The Town Clock, modeled after Independence Hall in Philadelphia, is believed to be the longest continuously running town clock in the United States. The Cornwallis House is one of the oldest and most historic buildings in Winnsboro. It is known to be one of the buildings that was occupied by the British when Lord Cornwallis established his headquarters in Winnsboro. It is a locally accepted fact that this is the house where the famous general resided during the occupation.

Other historic properties within the County include:

- Albion
- Balwearie
- Blair Mound
- Blink Bonnie (also known as Robertson Place)
- Dr. Walter Brice (House and Office)
- Camp Welfare
- Concord Presbyterian Church
- Davis Plantation
- Ebenezer Associate Reformed Presbyterian Church
- Fonti Flora Plantation

- Furman Institute Faculty Residence
- Dr. John Glenn (House)
- High Point
- Hunstanton
- Hunter House
- Ketchin Building
- Kincaid-Anderson House
- Bob Lemmon (House)
- Liberty Universalist Church & Feasterville Academy Historic District
- Little River Baptist Church
- Mayfair
- McMeekin Rock Shelter
- Monticello Methodist Church
- Monticello Store and Post Office
- Mount Hope
- Mount Olivet Presbyterian Church
- New Hope A.R.P. Church and Session Home
- Old Stone House

### **Retail & Shopping**

- No major shopping destinations
- Concentrated in the downtown areas of Winnsboro and Ridgeway
- Mainly specialty stores art, antiques, jewelry, crafts

There are no major shopping destinations in Fairfield County. Concentrated in the downtown areas of Winnsboro and Ridgeway, any retail and shopping is in the form of specialty stores (art, antiques, jewelry, crafts, etc.). The third Thursday of the month, Winnsboro hosts a special shopping night downtown with entertainment and sales from local merchants.

### Shops in Winnsboro include:

- All Things Painted
- Antiques Plus
- Boulder Ridge Studio
- Cornerstone Thrift Store
- J & J Interior Designs
- Joe Wilkes Ironworks
- Rabon's Antiques
- The Red Tree Gallery
- Winnsboro Pawn and Jewelry

### Shops in Ridgeway include:

- Beads and Buds, Inc.
- Cogan's Antiques
- Deanne's Creations
- Java Nook Books
- R.H. Lee and Company at the Cotton Exchange
- Becky's Soap Shoppe
- Laura's Tea Room
- Over the Top in Ridgeway, LLC
- The Thomas Store
- Ruff and Co. Mercantile

### Medical Care/Facilities

Fairfield Memorial Hospital is a 25-bed hospital located in Winnsboro. It is a full-service hospital and nationally accredited by the Joint Commission on Accreditation of Healthcare Organization (JCAHO) with acute inpatient care, 24-hour emergency department, full service clinical lab, rehabilitation services, and diabetic education and counseling. Other services offered include cardiac rehabilitation, Caring Neighbors Home Health, Columbia Heart Clinic, support groups/counseling, modern surgery department, outpatient clinics, radiology/nuclear medicine, respiratory therapy, and social services. Source: Fairfield Memorial Hospital

Also available to residents of the county is the Fairfield County Health Department. It provides immunizations, STD/HIV treatment and prevention, disease surveillance, environmental health, WIC, family planning, vital records, child health, tuberculosis control, partnership development, CRS and BabyNet, foreign travel, chronic disease prevention and control, tobacco prevention and cessation, physical activity focusing on Trail Development, home health services, nutrition services, social work, emergency preparedness, and newborn home visits.

Source: Fairfield County Health Department (Health Clinic)

There are also a number of private primary care physicians with offices in Fairfield County.

### Museums

- South Carolina Railroad Museum
  - Established in 1973
  - Collects and preserves historical data, materials, and equipment pertaining to railroads
  - Collection includes over 60 pieces of equipment freight cars, passenger cars, cabooses, diesel engines, and the only remaining steam locomotive built for use in South Carolina
- Fairfield County Historical Museum
  - Educates citizens and visitors about the heritage of Fairfield County
  - Identifies and documents historic properties and sites within the county
  - Collects significant artifacts and interprets personal stories of citizens to preserve the history of the county

The South Carolina Railroad Museum, the official State Railroad Museum, was established in 1973 in Fairfield County. It collects and preserves historical data, materials, and equipment pertaining to railroads with special emphasis on those railroads serving South Carolina and the southeastern United States. The collection combines over 60 pieces of equipment including freight cars, passenger cars, cabooses, diesel engines, and the only remaining steam locomotive built for use in South Carolina. The steam locomotive #44 once belonged to the Hampton and Branchville Railroad. Several of the cabooses, freight cars, and diesel engines are from CSX and Norfolk Southern.

Source: South Carolina Railroad Museum

The Fairfield County Museum, housed in the Cathcart-Ketchin building, opened in 1976. It educates citizens and visitors about the heritage of Fairfield County. The museum identifies and documents historic properties and sites within the county. It also collects significant artifacts and interprets personal stories of citizens to preserve the history of the county. The museum collection includes 19th century clothing and quilts, Victorian accessories, toys, Indian and military artifacts, tools, kitchen and sewing equipment, and banking and commerce displays. Also available at the museum and maintained by the genealogy staff is a library of wills, estate papers, cemetery records, histories of area families and land grant information. Yearly events at the museum include community and school art exhibitions and the Candlelight Open House in December.

### **Natural Resources**

- Granite
  - A resource in South Carolina mined since the 1700's
  - Martin Mariettta operates a quarry on 215 near the county line
  - Anderson Quarry and Blair Quarry
- Gold
  - The Carolina Slate Belt is a geological strata that includes Haile, Brewer Barite and Ridgeway gold mines. The Slate Belt and the adjacent (to the west) Charlotte and Kings Mountain Belts
     make up the Carolina terrane.
  - Kennecott Minerals operated the Ridgeway mine from 1988 to 1999 and produced more than
     1.4 million ounces of gold from sulfide ore bodies
  - The mine is currently in closure operation, but gold resources remain. Other mines in the area, specifically Haile, are restarting mining operations and exploration as gold tops \$1,200 an oz.

### Timber

- In 2008, Fairfield had 381,872 acres of nonindustrial private forests which accounts for 87% of the total land of the County
- 30% of the timber land owned by private individuals
- 48% of the timber land owned by corporations engaged in Timber activities
- Ranks 7th among South Carolina counties in terms of delivered value of timber

### Sand

- The emergence of the new South in the past 20 years has highlighted the value of one of our most important natural resources, Carolina sand. Its main uses are as an aggregate and fill material for the construction industry.
- A total of 55 companies produce sand at 98 mines around the state. The estimated annual production value of sand and gravel in the state exceeds \$35 million.
- Nearest Mines are Chesterfield and Sumter

### Sericite

- Sericite is a white clay mineral that is similar in appearance to the mineral kaolin. Both minerals
  are important ingredients used by the brick industry.
- Some of the sericite produced in South Carolina is electrical grade, and is used in the manufacture of electrical equipment.
- Sericite producing mines in South Carolina are located in Kershaw, Lancaster and Cherokee Counties. There are presently six active sericite operations in our state.

### Shale

- South Carolina shale is used solely by the brick industry.
- Shale mining can be found in Cherokee, Greenwood, Lancaster, Chesterfield and Marlboro counties.
- There are presently 19 active shale mines in our state.
- Shale plays a vital role in our state's brick industry with an estimated value of \$80 million annually.

Fairfield County contains an abundant supply of natural resources, both actual and potential, that represent present and future opportunities for residents. Granite, gold, and timber are present in the county and have been or are currently being mined. Sand, sericite, and shale are potential resources that could be explored in the future.

The State rock of South Carolina is the Winnsboro Blue Granite, or simply Winnsboro Blue. The stone was originally quarried at the Anderson granite quarry west of the town of Winnsboro in Fairfield County during the 1800's. The Anderson Quarry exported stone to many areas along the eastern portion of the United States until it closed in 1946. Vulcan Materials Company operates the Blair Quarry in the western part of the county. The quarry produces asphalt aggregate, base material, concrete aggregate, and manufactured sand. Martin Marietta currently operates a quarry on SC 215 near the county line. Its parent company, Martin Marietta Aggregates, is the nation's second largest producer of construction aggregates in the United States.

Granite is highly regarded as an excellent stone for monuments, but is also commonly used in kitchen tile and countertops or set as curbstone and building facing. Granite blocks with irregularities can be used in the construction of coastal jetties to prevent beach erosion. Blue Granite was used in the 1908 construction of the South Carolina Statehouse.

The Carolina Slate Belt, which runs through Fairfield County, is a geological strata that includes the Haile, Brewer, Ridgeway, and Barite Hill gold mines. The slate belt and the westerly adjacent Charlotte and Kings Mountain Belts make up the Carolina terrane. Kennecott Minerals operated the Ridgeway Mine from 1988 to 1999. The two adjacent open-pit mines in Fairfield County produced more than 1.4 million ounces of gold from sulfide ore bodies. Although the mine is currently closed, gold resources remain. Other mines in the area, specifically Haile, are restarting mining operations and exploration as the price of gold continues to rise.

According to the South Carolina Forestry Commission, in 2008, Fairfield had 381,872 acres of nonindustrial private forests that accounted for 87% of the total land in the county. Private individuals own 30% of the timber land and corporations engaged in timber activities own 48%. Fairfield ranks 7<sup>th</sup> among South Carolina counties in terms of delivered value of timber. Timber, along with granite and gold, is a natural resource present in Fairfield County with mines and materials that are readily available.

Sand, Sericite, and Shale represent natural resources that are present in Fairfield, but with no current operations in the County. Active mines in surrounding counties that are geologically similar to Fairfield indicate that these resources have the potential to be explored and put into operation. The emergence of the new South in the past 20 years has highlighted the value of one of the most important natural resources, Carolina sand. Its main uses are as an aggregate and fill material for the construction industry. A total of 55 companies produce sand at 98 mines around South Carolina. The estimated annual production value of sand and gravel in the state exceeds \$35 million. The closest sand mines to Fairfield County are in Chesterfield and Sumter.

Sericite is a white clay mineral that is similar in appearance to the mineral kaolin, both of which are important ingredients used by the brick industry. There are presently six active sericite mining operations in South Carolina located in Kershaw, Lancaster, and Cherokee counties. Some of the sericite produced in the state is electrical grade and used in the manufacture of electrical equipment.

South Carolina Shale is used solely by and plays a vital in the state's brick industry with an estimated value of \$80 million annually. There are presently 19 active shale mines in the state. Shale mining can be found in Cherokee, Greenwood, Lancaster, Chesterfield, and Marlboro counties.

### Parks and Recreation

- Fairfield County Recreation Commission
  - Adger Park
  - Blackstock Park
  - Blair Community Park/Willie Lee Robinson Park
  - Blair 99 Minipark/Eunice Shelton Thompson Park
  - Chappelltown Minipark
  - Drawdy Park
  - Garden Street Park
  - Horeb-Clenn Minipark
  - Lake Monticello Park
  - M.H. Boykin Community/Recreation Center
  - Middle Six Minipark
  - Mitford Minipark

- Ridgeway/Centerville Park
- Rufus Belton Park
- Feasterville Minipark
- Shelton Minipark
- Carolina Adventure World
- Lake Wateree State Park
- Lake Monticello
- Sumter National Forest

The Fairfield County Recreation Commission and the Town of Winnsboro offer a variety of public recreation facilities and programs for resident of the county. Within the town limits of Winnsboro, there are tennis courts, swimming pools, a ball field, and a gymnasium available for recreational purposes. Winnsboro and Ridgeway both offer brochures outlining walking tours that pass historic locations in the town. A 14,000 square foot county recreation center is located north of the town limits of Winnsboro. The center contains a full size gym, 3 multi-purpose rooms, playground facilities, and tennis courts. Baseball, basketball, volleyball, tennis, softball, and football leagues and tournaments are available through the recreation commission. Dance and gymnastics classes are also offered. The commission hosts special events throughout the year including a Halloween haunted house, Easter egg hunt, and Senior walking class. In addition to the facilities at the county recreation center, the commission also maintains facilities and parks throughout the county including:

- Adger Park
- Blackstock Park
- Blair Community Park/Willie Lee Robinson Park
- Blair 99 Minipark/Eunice Shelton Thompson Park
- Chappelltown Minipark
- Drawdy Park
- Garden Street Park
- Horeb-Glenn Minipark
- Lake Monticello Park
- M.H. Boykin Community/Recreation Center
- Middle Six Minipark
- Mitford Minipark
- Ridgeway/Centerville Park
- Rufus Belton Park
- Feasterville Minipark
- Shelton Minipark

Source: Fairfield County, Fairfield County Chamber of Commerce and the Town of Winnsboro

In addition to the parks and recreational facilities maintained by the Fairfield County Recreation Commission, county residents also have access to Carolina Adventure World. Carolina Adventure World is a 2,600 acre outdoor enthusiast destination park located in the Northeastern part of the County. Specializing in all-terrain vehicle (ATV) entertainment, it offers 100 miles of professionally designed ATV trails, a motocross course, ATV rentals, and ATV and motor bike storage facilities. The park also has a tree top zip line system, hiking/biking and golf cart trails, RV pads, rustic camping, and cabin rentals.

Source: Carolina Adventure World

### Scenic Resources

- Lake Wateree State Park
  - 238-acre park located on Lake Wateree
  - Provides access to the 13,700-acre reservoir and accompanying 190 miles of shoreline
  - Fishing, camping, trails, picnic areas, playground equipment, boat ramp, park store/tackle shop
- Lake Monticello
  - 7,000-acre lake with picnic shelters, fishing, boat ramp
  - Monticello Recreation Lake 300-acres located north of the large body of water
    - Fishing, swimming, picnic facilities
    - V.C. Summer Nuclear Station Nature Trail 1.5 mile long trail with benches, wood duck boxes, blue bird boxes, and plant identification markers
- Sumter National Forest
  - 11,080 acres are located in the Northwestern corner of Fairfield County
  - Bird watching, canoeing, hiking, hunting, camping, fishing

Two lakes in Fairfield offer scenic resources and recreational opportunities to the residents of the county. Lake Wateree, with over 13,000 acres and 190 miles of shoreline, is the largest lake in Fairfield County and the last lake of the Catawba River Basin. It is one of South Carolina's premier fishing and boating destinations. Significant populations of crappie, bream, largemouth bass, catfish and striped make it a popular fishing spot and host to numerous fishing tournaments throughout the year. Lake Wateree State Park is a 238 acre park located on Lake Wateree. In addition to fishing, the park offers 72 campsites that can accommodate large RVs, nature trails, picnic areas, playground equipment, a public boat ramp, and tackle shop/park store.

Located on the western side of the county, Lake Monticello is a 7,000 acre lake with picnic shelters, fishing, and a boat ramp. The Fairfield County Recreation Commission also operates a park, Lake Monticello Park, at the lake. A smaller Monticello Recreation Lake is about 300 acres in size and located to the north of the large body of water. This park offers fishing two days a week, swimming, and picnic facilities. Located at the boundary of the V.C. Summer Nuclear Station exclusion area on the lake, the V.C. Summer Nuclear Station Nature Trail is a 1.5 mile long trail with benches, wood duck boxes, blue bird boxes, and plant identification markers.

In addition to the lakes, there is 11,080 acres of the Sumter National Forest in the Northwestern corner of Fairfield County. Totaling 370,442 acres, the Sumter National Forest is divided into several non-contiguous sections in the western part of the state. The forest is a popular place for hikers, hunters, and outdoor enthusiasts. Some activities include:

- Bird Watching
- Canoeing
- Fishing
- Hunting
- Target Shooting
- Camping
- Picnicking

- Hiking
- Backpacking
- Horse Back Riding
- Mountain Biking
- Motorcycle and ATV Riding

### **Arts & Culture Groups**

- Fairfield County Library
  - Ridgeway Branch
  - Bookmobile serves Fairfield County residents living outside a 3-mile radius of Winnsboro or Ridgeway
- Pine Tree Playhouse non-profit, community theatre
- Olde English District
  - Located between Columbia, SC and Charlotte, NC
  - Revolutionary War and Civil battle sites, period homes and historic monuments
  - Includes Winnsboro, which features the longest continuously running town clock in the U.S.

Although Fairfield County does not have an abundant supply of arts and culture groups, there are a few opportunities that residents can take advantage of. The Fairfield County Library has two locations, the main library in Winnsboro and a branch in Ridgeway, to meet the county's literary needs. A bookmobile that runs bi-weekly is available to residents living outside a 3 mile radius of Winnsboro or Ridgeway. This service is also provided to nursing homes, day care centers, and the Fairfield County Detention Center. Special events at the library include story hours, Family Night at the Library, and the Friends of the Library Annual Book Sale. The Pine Tree Playhouse is a non-profit, community theatre located in Winnsboro. It offers a wide range of classic, eclectic, and new works in a casual, intimate space. Finally, the Olde English District is one of eleven tourism regions located in South Carolina. As the name implies, the District refers the to region's early settlement by the English in the mid-1770's and is located between Columbia, SC and Charlotte, NC. It features Revolutionary War and Civil battle sites, period homes, and monuments. The Olde English District runs through Winnsboro to highlight the longest continuously running town clock in the U.S.

### **Special Events & Festivals**

- Rock Around the Clock (Winnsboro) held in late September or early October
- River Fest (Winnsboro)
- Pig on the Ridge BBQ Cook-Off Festival (Ridgeway) held on the first weekend in November
- Christmas parades are held each year in Winnsboro and Ridgeway.
- South Carolina Railroad Museum runs a train rides with Santa during Christmas and the Easter Bunny at Easter.
- Fairfield County Historical Museum has a candlelight open house during Christmas.

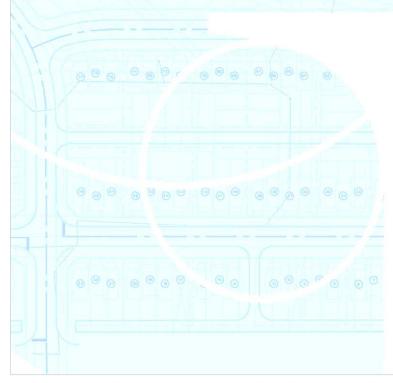

Several special events and festivals are held within Fairfield County on an annual basis. Specific events include:

- Rock Around the Clock
- River Fest
- Arts on the Ridge
- Pig on the Ridge BBQ Cook-Off Festival

Held in downtown Winnsboro, Rock Around the Clock is a celebration of life and times in Fairfield County. Usually held in late September or early October, the festival features a patriotic parade and street dance on Friday night. Saturday's activities include antique car shows, a 5K run, beauty pageant, food, and arts and crafts exhibits. River Fest also takes place in Winnsboro in the spring. It is sponsored by Duke Energy, The Wateree Homeowners Association, and the Fairfield County Chamber of Commerce. Select activities include a fish fry, antiques and yard sale items, arts and crafts vendors, face painting, and a frog jumping contest. There is also several conservation activities offered at River Fest. In Ridgeway, the Pig on the Ridge BBQ Cook-Off Festival is held every year on the first weekend in November. In addition to the BBQ and hog-calling contests, there are many children's activities available as well as craft exhibits, a street party, music, classic/antique car displays, and custom choppers/bikes displays. Also in Ridgeway, Arts on the Ridge, held the first Saturday in May, displays art work. Other annual events include Christmas parades in both Winnsboro and Ridgeway. The South Carolina Railroad Museum runs train rides with Santa Claus during Thanksgiving weekend and the first weekend in December. It also provides rides on the Easter Bunny Eggspress at Easter. And the Fairfield County Historical Museum has a candlelight open house during Christmas every year.

# STRENGTHS, WEAKNESSES, OPPORTUNITIES & THREATS (SWOT) ANALYSIS

### Overview of SWOT Analysis Process

On Wednesday, June 9, 2010, Genesis Consulting Group presented the information and data covered in the previous sections to the Steering Committee to provide a baseline and context for better determining Fairfield County's unique strengths, weaknesses, opportunities, and threats.

On June 29, 2010, Genesis Consulting Group facilitated a detailed SWOT Analysis with members of the Steering Committee in order to lay the foundation for economic development strategies and initiatives that are fully tailored and aligned with the needs and preferences of Fairfield County residents. The steps undertaken are described below.

### Strengths/Weaknesses/Opportunities/Threats (SWOT) Analysis

- 1. Overview of SWOT Analysis and Discussion of Desired Outcomes
- 2. Interactive SWOT Analysis
  - a) Categorization of Elements
  - b) Prioritization/Weighting within Categories
  - c) Preliminary Identification of Desired Economic Sectors/Types of Development Projects
  - d) Preliminary Consideration of Range of Economic Development Strategies and Initiatives (Traditional & Non-Traditional)
  - e) Identification of Items for Further Consideration
- 3. Overview of Verification/Validation Steps

At a follow-up meeting with the Steering Committee on July 15, 2010, the Steering Committee was lead through a process of prioritizing/weighting the primary strengths, weaknesses, opportunities, and threats as they specifically relate to Economic Development within the County. Based on this exercise, it became clear that these primary strengths, weaknesses, opportunities, and threats could be grouped into 4 high-level categories as follows:

- Physical Infrastructure
- Education & Workforce
- Community Coordination & Cultural Relations
- Compatible Industries & Business Development

The primary results of the prioritization process are provided on the following pages.

These results were then presented, validated, and enhanced through the conduct of a half-day planning "work session" on August 19, 2010, with more than 70 economic development stakeholders in Fairfield County's economic development. This session further provided discussion and feedback for initial development of specific recommendations and implementation strategies, tasks, and sub-tasks for consideration.

# STRENCTHS, WEAKNESSES, OPPORTUNITIES & THREATS (SWOT) ANALYSIS

### **Physical Infrastructure**

### Strengths:

- 1. Transportation Infrastructure (Interstates, Rail Lines, and Access to Ports and Airports)

  (1st highest ranked strength for all categories)
- 2. Water Service & Electric Service Capacity/Availability
- 3. Availability of Land & Availability of Some Industrial Sites/Buildings

### Weaknesses:

- 1. Lack of Water/Sewer Infrastructure at Key Locations (2nd highest ranked weakness for all categories)
- 2. Lack of "Shovel Ready" Industrial Sites/Product & Barriers to Industrial Development (Topography, Wetlands/Streams, etc.)
- 3. Sewer, Wastewater Treatment, & Broadband Availability/Capacity

### Opportunities:

- 1. Infrastructure Development Along I-77 Corridor (Water/Sewer & Other Utility)

  (1st highest ranked opportunity for all categories)
- 2. Further Development of Existing Industrial Park Sites & Buildings (3rd highest ranked opportunity for all categories)

### Threats:

 Future Water Needs will Exceed Capacity / Available Water Not Located Where Most Needed / Relatively Uncompetitive Industrial Water Prices (1st highest ranked threat for all categories)

### **Education & Workforce**

### Strengths:

- 1. Large, Relatively Skilled/Educated Regional Workforce (2nd highest ranked strength for all categories)
- 2. Access to Regional Workforce Resources (Colleges/Universities, Regional Alliances, Workforce Training Centers)
- 3. Population with High Potential

### Weaknesses:

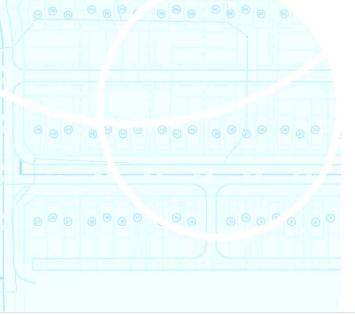

- 1. Public School System/Educational Achievement (1st highest ranked weakness for all categories)
- 2. Existing Workforce Skills (Hard & Soft Skills) (3rd highest ranked weakness for all categories)

### Opportunities:

- 1. Transformation of School System from Liability to Asset
- 2. Leverage Available Job Readiness Training Resources

### Threats:

 Superior Public School Districts & Other Government Services in Surrounding & Competing Counties

### Community Coordination & Cultural Relations

### Strengths:

- 1. Pro-Development Mindset / Willingness to Assist Existing & Potential Industries
- 2. Diversity of Population

### Weaknesses:

- 1. History of Past & Present Racial Tension & Divisive Racial Politics
- 2. Citizen Apathy
- 3. Lack of Communication Among Communities & Overall County "Mission/Vision"

### Opportunities:

- 1. Development/Implementation of Unifying Vision for County (2nd highest ranked opportunity for all categories)
- 2. Coordination of Development with Richland & Chester Counties

### Threats:

- 1. Opposition to Progress & Development Among Citizenship (Tied for 2nd highest ranked threat for all categories)
- 2. Infighting Among Leadership / Rival Political Factions (3rd highest ranked threat for all categories)
- 3. Electorate that Maintains "Status Quo" and Elects Weak Leaders

### Compatible Industries & Business Development

### Strengths:

- 1. Operating Cost Competitiveness (Low Costs of Doing Business)

  (3rd highest ranked strength for all categories)
- 2. Stable, Long-term Employer in VC Summer Nuclear Plant
- 3. Recreational Amenities
- 4. Natural Resources/Geological Features

### Weaknesses:

- 1. Significantly Lower Number of Jobs in the County vs. Available Workforce in the County
- 2. Lack of Destination Commercial/Retail Venues
- 3. Negative Demographic Trends (Decreasing Population, Aging Workforce, Loss of Youth Population to Other Areas)

### Opportunities:

- 1. Stable/Predictable Tax Revenue Generator in VC Summer Nuclear Plant
- 2. Industry Clustering Around Existing & Emerging Industries (Nuclear/Automotive/Biodiesel) & Growth of Industries Associated with Natural Resources
- 3. Entrepreneurialism (Service/Supply to Existing Industry) & Innovative New Industry

  Development
- 4. Expansion of Health Care Sector to Serve Aging Population
- 5. Recreational/Retirement Development (Particularly in Western Area of County)

### Threats:

- 1. Continued Loss of Manufacturing-Related Jobs

  (Tied for 2nd highest ranked threat for all categories)
- 2. Concentration of Jobs in Small Number of Employers / Reliance on VC Summer for Majority of

  Business Tax Revenue
- 3. Continued Decline of State-Level and Other Funding
- 4. Jobs in County Filled by Non-County Residents / Migration of Income

# PREVIOUS PLANNING EFFORTS

## PREVIOUS PLANNING EFFORTS

Several previous planning efforts relevant to Economic Development in Fairfield County have been completed in past years. As a result, this Economic Development Strategic Plan process can be viewed as a continuum of past efforts and takes into account previous recommendations and implementation steps. Relevant documentation of previous planning efforts includes the following:

- <u>Fairfield County Industrial Site Evaluation Study, Volume I & II</u> (Prepared by Harwood Beebe Company) – December 10, 1981
- Fairfield County Comprehensive Plan Update, 1997 (Prepared by Visnor & Associates, Inc.)
- <u>Fairfield County Strategic Plan</u> (as facilitated by the Community and Rural Development Division of the South Carolina Department of Commerce) – November 25, 2002
- Comprehensive Economic Development Strategy for the Central Midlands Region (Prepared by the Comprehensive Economic Development Strategy Subcommittee of the Central Midlands Council of Governments) – August 2007.
- Comprehensive Economic Development Strategy (CEDS) 2009-2010 EDA Priority Projects
- Columbia Area Transportation Study (COATS) / Midlands Tomorrow 2035 Long Range
   Transportation Plan (Prepared by the Central Midlands Council of Governments) Adopted
   December 18, 2008 (as amended on February 26, 2009; April 23, 2009; June 25, 2009; October 22, 2009; December 10, 2009)
- 2025 Rural Long Range Multi-Modal Transportation Plan (Prepared by the Central Midlands Council of Governments) – Adopted December 9, 2004
- 2006-2012 Transportation Improvement Program for Transportation Planning in the Columbia Metropolitan Planning Area (Prepared by the Central Midlands Council of Governments with assistance of the Federal Highway Administration, Federal Transit Administration and the South Carolina Department of Transportation) – Approved June 22, 2006; Amended September 28, 2006)
- 2007-2012 Rural Transportation Improvement Program for Transportation Planning in the Central <u>Midlands Region</u> (Prepared by the Central Midlands Council of Covernments with assistance of the Federal Highway Administration, Federal Transit Administration and the South Carolina Department of Transportation) – Approved June 22, 2006
- Richland County Comprehensive Land Use Plan Update: I-77 Corridor (Prepared by the Central Midlands Regional Planning Council) – Adopted May 4, 1988.
- Richland County Comprehensive Land Use Plan Update: I-77 Corridor (Prepared by the Central Midlands Regional Planning Council) Adopted May 4, 1988; Revised and Adopted April 1994.
- I-77 Corridor Infrastructure Study: Chester and York Counties, SC (EDA Project #04-06-04081)
   (Prepared by the Catawba Regional Planning Council and Williams Engineering, Inc.) December 1995

Provided below are details of various recommendations from these previous planning efforts that are relevant to this Economic Development Strategic Planning effort and could be used as baseline information for implementation of various recommendations included in this Plan.

### Fairfield County Industrial Site Evaluation Study, Volume I & II

Fairfield County retained Harwood Beebe Company (in association with the Central Midlands Regional Planning Council) to complete an Industrial Site Evaluation Study in 1981. This Study was conducted to meet the following principal objectives:

- 1. To establish appropriate industrial site selection criteria to be used to evaluate and analyze the best or option development sites in the County
- 2. To evaluate and analyze the 3 or 4 best industrial sites in the County
- 3. To conduct an in-depth development study on each of the selected sites to determine the potential development cost of each site.
- 4. To otherwise assist the County in developing a plan and program to aid in the increased industrial and economic development of the County

A total of 25 proposed industrial sites were evaluated based on 6 evaluation factors (size of site; location and access; water service availability; sewer service availability; power availability; and site usability). The top 5 ranked sites (and ties) based on the developed selection criteria were identified as the best potential sites for development. Corresponding site development plans were prepared for those top ranked sites. The table below lists the 25 industrial sites that were evaluated. Following the table are further details regarding the top ranked sites.

1	Fairfield County Proposed Industrial Sites (Evaluated Sites)			
No. Site Name		Site Location	Acreage	
1	Kennedy Site			
2	Woodward Site	5 miles south of Winnsboro on S.C. 34	270	
3	Hood Site	Off County Road 30 just west of I-77 bridge	660	
4	321 Ellison Site	2 miles south of Winnsboro, just across County Road 34 Up to 3 from JPM Site		
5	Goudelock Site	2 miles south of Winnsboro, just across from existing industrial park	70+	
6	McMaster-Shedd Site	3½ miles north of Winnsboro on U.S. 321	200 + 67	
7	Old County Airport	5 miles north of Winnsboro, just off U.S. 321 on County Road 38		
8	Strothers Site	On Broad River at S.C. 34 bridge	150+	
9	Richtex Site	On Broad River in southwestern corner of the county	370	
10	Hogfork Farm	10 miles northeast of Winnsboro on S.C. 200, near 1,00 intersection with I-77		
11	Camp Longridge	7 miles northeast of Ridgeway on S.C. 3		
12	Peay Site	1 mile south of Ridgeway on U.S. 21	25+	
13	Funderburg Site	Off County Road 30 just east of I-77 bridge	300	
14	Wright-Kennedy Site	1 mile west of Ridgeway on S.C. 34		
15	Van Exam Site	Northwest corner of S.C. 34 and I-77 60-80		
16	Simpson Site	3 miles south of Winnsboro on S.C. 34		
17	Lyles Site	6 miles southwest of Winnsboro near intersection of County Roads 30 and 63		
18	Rion Site	3 miles south of Winnsboro fronting on U.S. 321 just before intersection with S.C. 269		

	Fairfield County Proposed Industrial Sites (Evaluated Sites)			
No.	Site Name	Site Location	Acreage	
19	Rockton Site	2 miles south of Winnsboro at intersection of S.C. 213 and U.S. 321		
20	Moore Creek Site	1 mile northwest of Winnsboro on S.C. 34 50		
21	Adger Site	5 miles north of Winnsboro on U.S. 321		
22	Salem Crossroads	Northeast corner of intersection of S.C. 215 and S.C. 34		
			(2 existing buildings)	
23	Ragsdale Site	On Broad River just above confluence of Beaver Creek 530+		
24	Dawkins Site	On Broad River near Strother area 275+		
25	Wallaceville Site	On Broad River, County Road 232 bisects property 1,345		

	Fairfield County Proposed Industrial Sites			
76.56	(Top Ranked Sites)			
Rank	Points	Site Name	Description of Site from Report	
1	83	Rockton Site	This site consists of 110 acres of moderately level land, about 2 miles south of Winnsboro, along S.C. 213 and the U.S. 321 By-Pass. Water and sewer service are available from the Town, as is natural gas service. Electrical service is also available from the Town or the County Electric Cooperative. Rail service is available from the Southern Railway System, about 1,000 feet east along S.C. 34, at the Goudelock Site.	
2	79	McMaster-Shedd Site (200-acre McMaster portion is a Winnsboro Great Town Site; 67- acre Shedd site south of McMaster was added).	This site consists of 267 acres lying north of the Town of Winnsboro about 3.5 miles, along U.S. 321. The site is rolling in an industrial-agricultural area. The Southern Railway System lies along the eastern site line, near Route 222. Water and sewer services are provided by the Town of Winnsboro. Electrical service is provided by the Fairfield County Electric Cooperative. Natural gas service is accessible to the site.	
3 9	77	Goudelock Site (Winnsboro Great Town Site)	This site consists of 69.7 acres of rolling land located 2 miles south of Winnsboro along S.C. 34. The site is in an industrial urban fringe area. The Southern Railway System is at the west site line. The site has water and sewer service by the Town of Winnsboro. Electrical service is available from the Town or the Fairfield County Electric Cooperative. Natural gas service is available at the site.	
3	77	Rion Site	The Rion site of 100 acres is located about 3 miles south of Winnsboro along S.C. 269 and U.S. 321. There is no on-site rail service. The Southern Railway System line is accessible across S.C. 34. Both water and sewer services are accessible from the Mid-County Water Co. and the Town of Winnsboro, as is natural gas service. Electrical service is also available from the Town or the County Electric Cooperative.	

	Fairfield County Proposed Industrial Sites (Top Ranked Sites)			
Rank	Points	Site Name	Description of Site from Report	
4	75	321 Ellison Site	This site is located 2 miles south of Winnsboro between S.C. 34 and U.S. 321. The site has 300 rolling acres. Rail service is across S.C. 34 by the Southern Railway System. Water and sewer services are available from the Town of Winnsboro. Electric service is by SCE&C Company. Natural gas service is available to the site. This site is located just south of the County's existing industrial park location.	
5	71	Wright-Kennedy Site	This site is located along S.C. 34 about 1 mile west of Ridgeway. The site consists of two parcels of rolling land, totaling about 139 acres. Water and sewer services are available from the Town of Ridgeway on the site. Electrical service is available from SCE&C Co. and natural gas service is accessible from the Town of Winnsboro, 5 miles west along S.C. 34. Railway service is available across S.C. 34. The front of the site has a small shopping center developed.

### Fairfield County Comprehensive Plan Update, 1997

In accordance with the South Carolina Local Government Comprehensive Planning Enabling Act of 1994, Fairfield County's Planning Commission has developed (with periodic updates) a comprehensive plan for the County. The most recent adopted Comprehensive Plan Update was completed in 1997 (a newer update is currently in the process of being completed but had not been adopted within the completion timeframe for this Plan). Relevant recommendations from the 1997 Plan are listed below.

From Section V, Planning Issues and Objectives:

Issue: Growth

Objective: To accommodate projected growth in an orderly manner, and to ameliorate its impact

on existing land uses and environmental resources.

### Response:

- 1. The County may opt to continue its current "hands off" policy, relying principally on developers and market conditions to shape the future of the county, or it may adopt planning policies and land use controls to help guide the development process. If the latter, the county should start by building a Plan that recognizes market and economic influences, and channels development accordingly, in an orderly fashion enhancing rather than compromising environmental and living conditions. Elements should include a policy to encourage continued in-filling of established residential subdivisions and partially developed areas (especially where roads, water and sewer lines, etc., are in place). Also, where new industrial and commercial development is expected, these areas should be readied for development, with plans for facilities and controls.
- 2. To ensure against improper development, the county should consider for adoption standards and regulations to address a) buffering between potentially incompatible uses; b) building heights; c) building setbacks and curb cuts; d) performance and siting standards for manufacturing uses; and e) erosion and sediment control.

Issue: Quality Development

Objective: To foster quality development.

Response:

 To foster quality development, the county should a) regulate the use of land ("land use compatibility"); b) enact landscaping requirements for all non-residential and multi-family projects; and c) enact open space requirements for all multi-family and attached single-family projects.

Issue: Economic Development

Objective: To stimulate and accelerate economic development.

Response:

- 1. The county should pursue the following sub-goals:
  - a) to more aggressively seek industrial and business development with the appointment of a professional coordinator (i.e., establish a county-level economic development office).
  - b) to build upon the existing base of business and industry by using current assets to attract industries that complement these assets (i.e., create a more favorable industrial climate by protecting potential industrial sites and existing industry via land use regulations, acquisition, options, etc.).

- c) to increase the number of new firms at an annual average of three per year.
- d) to maintain or increase the current percentage of the work force in manufacturing jobs.
- e) to identify and protect industrially suited sites for future industrial development (particularly in industrially developing areas such as the S.C. 34 corridor between Winnsboro and I-77).
- f) to create a more favorable environment for existing industry by protecting them from encroachment by potentially incompatible uses.
- g) to develop a high profile industrial park (potentially at I-77 between S.C. 34 and Peach Road).
- h) to support and develop a strong agri-business environment, including forestry, farming, housing, etc.
- i) to aggressively pursue the development of programs to attract "retirees" to Fairfield County.

Issue: Aesthetics

Objective: To present and maintain an aesthetically pleasing environment.

Response:

 The county should enact aesthetic development regulations (primarily to regulate the future increased use of billboards), as well as an "Existing Building Code" and a "Standard Housing Code" to address blighted structural conditions.

Issue: Transportation

Objective: To improve access to I-77 and promote highway safety on existing and proposed

streets and roads.

### Response:

1. The county should give consideration to curb cut and setback controls to enhance safety and preserve "designed carrying capacity." Also, the county should pursue inclusion of Fairfield County transportation improvement projects within the Strategic Highway Plan for Improving Mobility and Safety (SHIMS) – particularly improvements for S.C. 34, and an additional access interchange and frontage road at the Peach Road crossing of I-77.

Issue: Housing

Objective: To make decent housing and living conditions available to all residents of Fairfield

County.

### Response:

- 1. The county should pursue implementation of the recommendations listed in the Central Midlands Comprehensive Housing Affordability Strategy (CHAS), 1991. These recommendations include:
  - utilize new federal housing programs included in the National Affordable Housing Act of 1990 (i.e., Title II Home Program; Title III Homeownership Incentives; Title IV HOPE Program; and Title VIII Housing for Persons with Special Needs.
  - b) utilize existing housing programs (i.e., Title V Housing Assistance Public, Section 8, and Foster Care Assistance; Title VI Preservation of Affordable Rental Housing; Title VII Rural Housing; Title VIII Housing for Persons with Special Needs; Title XI Community Development Block Grants)
  - c) involve local governments to a greater extent to 1) inventory available land for housing development; 2) support the cost of land planning and engineering to reduce future

improvement problems; 3) assemble land and clearing titles, including lots lost to delinquent taxes and vacant improved lots for in-fill; 4) make housing packages available to private developers on a competitive basis; and 5) support the Building Materials Bank for recycling excess materials from construction sites.

d) involve the Central Midlands Regional Planning Council, the private sector, and the banking industry to a greater extent

Issue: Infrastructure

Objective: To extend water and wastewater service and facilities to accommodate projected

growth and development.

### Response:

 Promote cooperation among water providers (Winnsboro, Ridgeway, Mitford Water District, Mid-County Water District, and Jenkinsville Water District) and among sewer providers (Winnsboro, Ridgeway, and Great Falls).

Issue: Resource Preservation and Enhancement

Objective: To conserve and protect the County's natural and historic resources.

Response:

1. The county should exercise care (through legislation/regulation) in the use and/or development of its natural and historic resources, including a) prime farmlands; b) water resources (i.e., Lake Wateree, Monticello Reservoir, Winnsboro Reservoir, the Broad River, and small creeks and ponds); c) historical buildings and places; and d) woodlands.

2. The county should a) channel development into the more urbanized areas of the county; and b) discourage the extension of public facilities into the rural areas not projected for development.

Issue: Recreation

Objective: To provide a comprehensive and balanced system of parks and recreation facilities.

Response:

1. The county should attempt to meet the demand for more parks and recreational facilities that comes with growth (within the context of the apparent luke-warm support for such parks and facilities from the citizenship).

From Section VI, Comprehensive Development Plan, 2010 (Projects and Facilities Plan Element):

### **Proposed Transportation Projects:**

Project #1: Four lane SC 34 from Winnsboro to I-77. This project is not in the SHIMS Plan, but

should be included as it meets the criteria of an "economic stimulant," in keeping with

the objectives of the SHIMS program.

Project #2: Construct an interchange at SR-20-30 and I-77. This will make accessible a large area

of the county projected for growth and development, adjacent to Richland County.

Project #3: Extend four-lane section of 321 By-pass from present terminus north of Kincaid Bridge

Extend four-lane section of 321 By-pass from present terminus north of Kincaid Bridge Road to intersection with Old U.S. 321 north of Winnsboro. More than a By-pass, this road has proven to be a developmental highway. But development opportunities to date

have not extended to the two-lane section of the By-pass, except for the new

Intermediate School at SC 34.

Project #4: Initiate "user fees" for improving county roads. Deteriorating street and road conditions

were one of the principal concerns and issues identified by county residents at the three in-put forums. And legal precedent is well established in South Carolina for initiating such a fee. County roads should then be prioritized for improvements and

scheduled accordingly.

### **Proposed Industrial Development Projects:**

Project #1: Develop additional Industrial Parks. As full development of the relatively new Walter

Brown Industrial Park approaches, planning for additional parks is underway. Based on the rate of land consumption in the Brown Park, at least two additional parks should be

planned, at strategic locations accessible to I-77.

Project #2: Extend water and sewer from Winnsboro to areas planned for Industrial Parks and

development.

### **Proposed Housing Projects:**

Project #1: Apply annually for CDBC funds to carry out a rural "Scattered Site" rehabilitation,

indoor facility and weatherization program for low and moderate income families.

Project #2: Explore other housing programs for applicability in the county.

### **Proposed Recreation Projects:**

Project #1: A community park in the Mitford Area, 3 to 6 acres in size, to include a ballfield,

basketball court and playground.

Project #2: A community park in the vicinity of the Pumphouse and Wilson Road intersection,

southwest of Winnsboro, 2 to 4 acres in size, to include basketball court and

playground.

Project #3: A golf course, south of SC 34, between Ridgeway and I-77. A facility in this location

would help spur residential development in the vicinity and open the area to golfers from the Columbia area, in addition to meeting local demands for a second course,

recommended by the Recreation Report for Fairfield County.

Project #4: Additional 3 to 6 acre community parks, as needed to facilitate growth and

development of the county, to be decided by the Recreation Commission, in

consultation with the Fairfield County Planning Commission.

#### **Proposed Fire Protection Projects:**

Comprehensive recommendations for improving and expanding fire protection in the county are contained in the county's <u>Fire Protection Master Plan, 1990</u>. Suffice it to say, the key project elements of the Plan call for constructing four new stations, one of which is now underway. Cost estimates and priorities are contained in the Plan, as well as other project details designed to improve fire protection throughout Fairfield County.

### Fairfield County Strategic Plan (2002)

In April of 2002, Fairfield County citizens worked with staff from the Community and Rural Development Division of the South Carolina Department of Commerce to prepare updates for the County's Strategic Plan. These updates were the result of information developed through three task forces: Economic Development and Infrastructure; Education; and Quality of Life. Specific goals and initiatives called out in the Plan are listed below:

#### **Economic Development and Infrastructure**

Vision: To implement a strategic plan, which will attract a diverse industrial business base,

creating new opportunities with improved earning and motivating our citizens to seek

continuous skills and life enhancement.

Goal #1: Complete the expansion of the Walter Brown Industrial Park

### Implementation Strategies:

1. Secure land and complete environmental testing

2. Purchase land

- 3. Complete engineering and design
- 4. Obtain needed permits
- 5. Advertise for construction bids
- 6. Open bids
- 7. Award contracts
- 8. Begin Construction

Completion Timeframe: December 2002

Goal #2: Zone selected areas throughout the county for industrial development

#### Implementation Strategies:

- 1. Submit appropriate industrial sites for consideration to be re-zoned.
- 2. Obtain permission to sell property and determine price from landowner.
- Submit to Planning Commission for approval.
- Submit to County Council for public hearings and readings.

Completion Timeframe: October 15, 2002

Goal #3: Qualify all industrial sites approved for re-zoning by County Council.

Implementation Strategies:

- 1. Determine availability of infrastructure to these sites.
- Prioritize top three sites.
- 3. Determine financial resources and develop partners.

4. Complete environmental assessment

Completion Timeframe: September 2003

Goal #4: Create more opportunities for development of historical, natural, cultural, tourism and

small business development.

Implementation Strategies (Encourage city and county councils to support tourism as economic development):

- 1. Form a collaborative group Infrastructure Management Plan to Accelerate County Tourism (IMPACT) to address tourism issues.
- 2. Get attention of County and City Council to support tourism.

Completion Timeframe: June 2002 & Ongoing

Implementation Strategies (Consolidate tourism development and marketing efforts):

- 1. Form one general task force from the multitude of separate organizations in the county that are criss-crossing their efforts for our general goals, tourism and business development.
- 2. Review all web sites related to Fairfield County.
- Update and link countywide web sites.

Completion Timeframe: November 2003

Implementation Strategies (Increase economic development by creating new jobs, strengthening existing business, and adding new business):

- 1. Provide information for tourists on Saturday.
- 2. Recruit and train more tour guides to meet needs of tourists/groups.
- 3. Develop the driving tour of S.C. Highway 34.

Completion Timeframe: November 2004

Implementation Strategies (Increase historic preservation activities by preserving endangered sites and county history, local heritage and cultural traditions as well as involving students in historical research):

- 1. Develop historic church and cemetery tour of the county.
- 2. Expand the presence of the South Carolina Railroad Museum.

Completion Timeframe: November 2004

Implementation Strategies (Obtain full access to the Old DSS building for renovation for a downtown marketplace):

- Obtain approval from County Council.
- 2. Develop a budget and design concept.

3. Obtain necessary funding from public and private organizations.

Completion Timeframe:

December 2003

Implementation Strategies (Develop golf and water related type of resort at Lake Wateree):

1. Determine what land can be developed.

Completion Timeframe:

November 2005

#### **Education and Workforce**

Vision:

The Education Task Force will work through involved citizens and the Fairfield County School District to produce the very best education system for all ages in Fairfield County while requiring accountability.

Goal #1:

Initiate a retreat with the Fairfield County School Board and Education Task Force members to establish the formal partnership to clarify the respective roles of the task force, school board, and district administration.

#### Implementation Strategies:

1. Define the roles and responsibilities necessary for the partnership to succeed. This would include delineating the roles and responsibility of the task force, the school board, and the district administration.

Completion Timeframe:

July 15, 2002

Goal #2:

Establish an active business/education partnership program with the Fairfield County School District.

### Implementation Strategies:

- 1. Create a survey to determine needs that business and industry can provide to schools.
- 2. Survey schools and teachers to determine needs that business and industry can provide.
- Survey business and industry to determine services that might be provided to meet school(s) needs.
- 4. Implement pilot partnership program in selected district school(s).

Completion Timeframe:

Spring 2004

Goal #3:

Establish an active business/education partnership program with the Fairfield County School District utilizing parents with and without school age children.

### Implementation Strategies:

- 1. Develop survey to assess the talents, skills, and interest that all parents in the county may be willing to share with the schools and children of Fairfield County.
- 2. Survey parents with and without school age children to determine capabilities and interest levels in assisting schools and children in Fairfield County.
- 3. Implement partnership programs.

Completion Timeframe:

Spring 2004 & Ongoing

Goal #4:

Develop exemplary programs that will bring visibility and improvement to Fairfield County.

### Implementation Strategies:

- 1. Targeted in-service and postgraduate work for district employees. Among the initiatives to be considered will be:
  - a) Develop a single gender school in the district
    - Visit existing programs to determine success of program
    - Present program strengths, success, and associated costs to Fairfield County School Board
    - Implement program in assigned school
  - b) Develop magnet schools throughout county. Focus of school to be on the arts, math, or science.
    - Visit existing programs to determine success of program
    - Present program strengths, success, and associated costs to Fairfield County School Board
    - Implement program in assigned school

Completion Timeframe:

Begin by Spring 2004 & Ongoing

Goal #5:

Create a Community Learning Center with the advantage of a full-time post secondary campus of Midlands Technical College in Fairfield County. (Twelve basic and transferable courses should be made to create a general education core.)

#### Implementation Strategies:

- 1. Sponsor a meeting with representatives of the Fairfield County Council, Fairfield County School District, Fairfield County Chamber, and Midlands Technical College to discuss partnerships necessary to carry out program.
- 2. Assist Midlands Technical College with securing an appropriate facility and location to create a Community Learning Center.
- 3. Assist Midlands Technical College with promotion of local Community Learning Center programming.

Completion Timeframe:

Fall 2004 & Ongoing

### **Quality of Life**

Vision: To be a vibrant, healthy, clean, family oriented community in which people have a

desirable place to work, play, and live productive and peaceful life through cooperation.

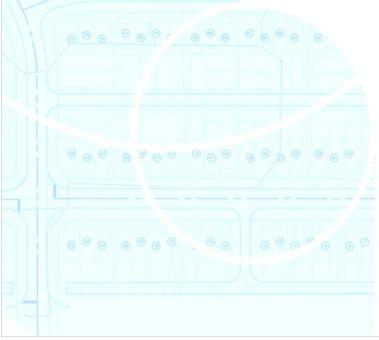

Goal #1: Instill a sense of pride in the community.

### Implementation Strategies:

1. Become citizens and county of character.

- 2. Collect facts on law enforcement of litter control, abandoned housing, junk cars, etc. Collect ordinance information and make recommendations to the Quality of Life Task Force.
- 3. To grow as a unified community through cooperation and communication. Create an umbrella organization to coordinate county calendars and activities.

Completion Timeframe: January 1, 2003

### Comprehensive Economic Development Strategy for the Central Midlands Region (2007)

The purpose of the <u>Comprehensive Economic Development Strategy for the Central Midlands Region</u> was to call attention to import issues, assess relevant trends related to the issues and advocate actions that can appropriately address those issues at a regional level. Relevant recommendations from the 2007 document are listed below.

### **Economic Development**

Goal:	Strengthen and diversify the regional economy for sustainable long-term economic development				
Objectives:	Link region's foundation of manufacturing, military and agricultural assets				
Plan of Action:	<ol> <li>Make efforts to match military needs and local business ability to respond</li> <li>Promote biofuels research and development and sustainable agriculture</li> </ol>				
Measurements:	Develop and maintain a directory of new and expanding major employers by				
	NAICS code for comparison with the economic cluster information in this document.				
	2. Develop financing for implementation of first phase of Mid Carolina Commerce Park				
Completion Date:	December 2008				

### Workforce Development

Goal:	Promote a comprehensive approach to workforce development
Objectives:	<ol> <li>Educate employers on the benefits of participating in workforce development initiatives</li> <li>Emphasize technology training in K-12 education system to ensure a competitive workforce</li> </ol>
989 989	<ol> <li>Increase access to higher education opportunities in non-metro areas</li> <li>Learn how all partners can work together to increase adult literacy</li> <li>Increase the number of high skilled, high wage jobs</li> <li>Broaden information sharing and align workforce planning throughout the workforce system</li> </ol>
	<ul> <li>7. Advocate for the development of vocational and technical training career paths</li> <li>8. Develop the region's skills based economy</li> </ul>
Plan of Action:	<ol> <li>Study the availability of higher education opportunities in non-metro areas and create an inventory of existing/planned programs and potential funding solutions</li> <li>Establish relationships between schools, higher education and businesses</li> <li>Conduct a regional survey of employers and workforce training providers to assess occupational trends and employer needs</li> </ol>
Measurements:	Monitor attendance and graduation in technical related degree programs from public and private institutions in the region and monitor reports by the Commission on Higher Education on progress in new technical degree programs being offered
Completion Date:	December 2008

### **Business Development**

Goal:	Broaden and diversify the regional economy through business development			
Objectives:	<ol> <li>Facilitate information exchange among regional stakeholders to enhance coordination of economic development activities</li> <li>Explore partnerships and resource pooling</li> <li>Support entrepreneurship and small business development across the region.</li> <li>Promote tourism assets within the region</li> </ol>			
Plan of Action:	<ol> <li>Develop an inventory of capital providers for all levels of funding to facilitate access to capital and promote information sharing among entrepreneurs in the region</li> <li>Support development of promotional and/or outreach efforts to provide information to businesses in the community that would better enable them to participate in economic opportunities with Fort Jackson installation</li> <li>Create a thorough inventory of tourism related destinations, events and festivals in the region to help promote tourism assets.</li> <li>Work with local hospitality industry and all economic development partners to develop a Regional Tourism Plan.</li> </ol>			
Measurements:	<ol> <li>An inventory of capital providers will be developed by the end of 2008</li> <li>Link regional maps of tourism destinations with the recommendations and maps in the CMCOC Green Infrastructure Plan and provide to regional and state tourism promotion agencies</li> <li>Development of a regional tourism plan will begin before the middle of 2009</li> </ol>			
Completion Date: Mid 2009				

### Transportation

Goal:	Support the re	gional transportation system and alternatives and solutions supporting
		ment of citizens and freight and economic development growth
Objectives:		urage and support greater alignment between local economic 🛴 🤍
		opment stakeholders and regional transportation organizations
	2. Conti	nue support of organizations and initiatives seeking regional alternative
000000	e trans	portation modes
	3. Work	with counties on planning and funding sustainable roadway networks
	4. Work	with local governments and business to develop dedicated funding for
	public	transit
Plan of Action:	<ol> <li>Explo</li> </ol>	re options for improving transportation links between Columbia Airport
	and d	owntown Convention Center area.
	2. Advo	cate for regional rail initiatives that focus on multimodal transportation
	plans	
0 0 0 0 0		the expansion of a deviated flex route transportation system in
		unding communities
		re and promote comprehensive planning solutions for data collection and
1/		sis to ensure that the transportation infrastructure meets the needs of
MACHET BEST		oyers and citizens.
999999	5. Facilit	ate development of van pools/bus pools to get people to work in various
	areas	
		op seamless system of transit from one community/county to another
Measurements:		mentation of recommendations in the Long Range Transportation
	Impro	vement Plan, Bike/Ped Plans, light rail study, etc.
Completion Date:	Ongoing	

### Technology

Goal:	Assess the availability of high-speed broadband communications in underserved areas				
	of the region				
Objectives:	Identify availability of high-speed broadband infrastructure in region				
Plan of Action:	Explore the creation of a regional map of high-speed communications				
	infrastructure and service availability to improve understanding of availability in rural areas in the region.				
Measurements:	Develop information on availability of high-speed telecommunications infrastructure by 2009				
Completion Date:	2009				

### **Environment**

Goal:	Facilitate collaboration among stakeholders to preserve natural resources				
Objectives:	Encourage maintenance of green space to preserve regional quality of life				
	2. Explore options for effectively addressing short-term and long-term water				
	demand and availability				
	3. Continue to encourage education on sustaining air quality and natural				
	resources				
Plan of Action:	1. Support regional initiatives to enhance collaboration and avoid duplication of				
	efforts on air quality planning				
	2. Continue region-wide green space preservation activities underway through				
	the Central Midlands Green Space Planning project				
Measurements:	1. Completion of a Joint Land Use Study (JLUS) regarding military bases in				
	Richland County for protection of areas from non-compatible uses				
	Completion of a regional green infrastructure preservation plan				
	3. Attain air quality standards required by Early Air Compact				
Completion Date: 2008 – 2009					

### **Community Development**

Coal: 9 9 9 9 7	Strengthen the quality of place through comprehensive community development			
Objectives:	Increase accessibility to higher education opportunities in rural counties			
	2. Advocate prioritizing the continued upgrading of infrastructure in the region			
	3. Attract health care services to underserved areas of the region			
Plan of Action:	1. Advocate for the expansion of or increased accessibility to higher education or			
	technical training facilities in counties without any facilities			
Measurements:	1. Monitor annual changes in number of graduates from institutions of higher			
000000	earning majoring in math and science			
	2. Apply for grants from federal and state agencies that will improve			
	infrastructure, services and housing stock in LMI areas around the Midlands			
	3. Research potential funding resources and project partners for development of			
1/2	workforce training and higher education facilities in Fairfield County			
Completion Date: 2008 & Ongoing				

### Performance Measures - Fairfield County Performance Measures for the Period from 2007 to 2012

Performance Measure:	
New Jobs	500
Number and Types of	15 new or expanded businesses and or industries in a variety of industrial and
Investments	service NAICS codes
Jobs Retained	150
Private Sector Investment	\$35 million over the five-year period
Changes in Economic	Diversification from textile related employment to industries and businesses
Environment	serving national and international markets.

### Annotation of Projects of the Fairfield County Priority List for 2007-2008

### Airport Improvements

Construction of additional hangars at the Winnsboro Airport to create an airpark to increase commerce. There are three (10) planned new hangars. In addition, a 500' extension of the runway is proposed.

**Primary Applicant Fairfield County** 

Airport Master Plan being created

U. S. Department of Transportation and State of S. C.

When Begun: 2006

#### **Sewer Facilities**

The expansion of treatment capacity of the Ridgeway wastewater treatment plant is critical if the Ridgeway area is to accommodate commercial and industrial growth. This project will have to be accompanied by a leak-proofing of old sewer lines in the town to reduce high levels of infiltration and inflow that are overburdening the Ridgeway facility. In 1989 the Economic Development Administration funded a mini-technical assistance investigation of the sewer needs of Ridgeway and confirmed that a plant expansion is necessary as well as I/I control.

**Primary Applicant** Town of Ridgeway

Addressed in Plan: Ridgeway Land Development Plan and

Mini-TA study of the sewer needs of Ridgeway

Source of Funds: State of S. C. Infrastructure

Revolving Loan Fund and local funds

When Begun: 2006

#### Water Facilities

4. Installation of a 16" raw water transmission line from the Winnsboro reservoir to parallel an existing 16" raw water transmission line to the water filtration plant in Winnsboro. The town will then have the water supply to eventually expand its daily treatment output to 8 million gallons. With this volume the Town will be able to serve the various sectors of the county with water. Ridgeway will be able to purchase additional water if it desires. Jenkinsville, Mid-County and the Mitford Water Companies in the western, central and northeastern areas of the county will have available additional sources of affordable water. They will not have to rely on wells or out-of-county sources. In addition, the Town would further extend a transmission line in order to bring water from the Broad River back to Winnsboro. This extension would provide an additional source of water.

Primary Applicant
Town of Winnsboro

Estimated Cost
\$4.0 Million

Addressed in Plan: Town Long Range Capital Improvements Plan

Source of Funds: EDA, Rural Development of the USDA, and local funds

When Begun: 2006

### Housing

5. The improvement of existing housing stock and the expansion of housing opportunities is of great interest to Fairfield County. The critical need in the county is for very low interest mortgage money for first time home buyers but even more for grants to rehab housing for the Low and Moderate Income. Moreover, the addition of indoor bathroom facilities for LMI occupied structures in western Fairfield County will promote economic activity by improving the attractiveness of that area of the county. Improving housing will encourage young citizens to develop educational skills and make them more able to find employment both inside and outside the county. The condition of housing is directly related to economic development because of the visual impact it has on prospective industrial clients investigating Fairfield County. It also affects the educability of the youth who learn better in standard condition housing. Use of the HOME program from HUD will help with scattered site rehabilitation in Fairfield County's rural areas. Livable communities and weatherization programs from HUD should also be used.

Primary Applicant Estimated Cost
Fairfield County \$2.5 Million

Addressed in Plan: Fairfield County Comprehensive Plan

Source of Funds: CDBC rehab programs, State Housing Authority

mortgage programs and state weatherization programs

When Begun: Various rehab programs already underway and

mortgage assistance now offered from S. C. Housing Finance and Development Authority

#### **Industrial Park Development**

6. Industrial site development and improvement is directed toward the development of industrial sites on the fringe of the county as well as near Winnsboro. Most truly marketable industrial sites in Fairfield County are in the Winnsboro area because that is where access, and water and sewer are best. Sites will be developed near the SC 200/I-77 interchange because of the county's involvement in the funding of a sewer line from Great Falls to the interchange near Mitford. Development of additional industrial sites away from Winnsboro can best be achieved by extending water and sewer to interchanges along I-77.

**Primary Applicant** 

Winnsboro and Fairfield County

Addressed in Plan: Fairfield County Comprehensive Plan

and Industrial Sites Survey of I-77

Source of Funds: EDA, CDBC and local funds

When Begun: 2008

#### **Sewer Facilities**

7. Development of a 500,000 gallon per day wastewater treatment plant in western Fairfield County near Jenkinsville would help maximize the demand for electricity purchases directly from the V.C. Summer nuclear station. There is no public or private sewer system in the western portion of the county and the development of such capacity would promote industrial development there. This project is of long term interest to Fairfield County which has a long standing policy interest in developing the economy and living conditions for LMI persons outside the Winnsboro urbanized area.

When Begun: 2007

12. Development of a 405 acre property near the corner of Cook Road and Peach Road. This property is contiguous to the property described in Item 11 above.

Primary Applicant Estimated Cost
Fairfield County \$3.0 million

Addressed in Plan: Fairfield County Strategic Plan Source of Funds: CDBC, EDA, local funds

When Begun: 2008

Technology/Enterprise Campus Facility and Infrastructure Development

The Midlands Technical College Enterprise Campus has been established to attract facilities dedicated to second-tier incubation, research commercialization and public-private development of 100 acres of college property in Northeast Richland County. The college, through the MTC Enterprise Campus Authority, proposes the initial development of a 32,000 square foot multipurpose building containing four 5,000 square foot bays with water, compressed air, electronic multi-power, and computer drops, along with classrooms, five

offices, storage areas, restrooms and a lobby. Infrastructure improvements for the entire 100 acres include development of water, sewer, storm drainage, streets and utility support, including connectivity to the college's phone and intranet.

**Primary Applicant** 

Estimated Cost \$6.5 Million

Midlands Technical College

Addressed in Plan: Ridgeway Comprehensive Plan Source of Funds: Office of Local Government,

S.C. Budget and Control Board, local

When Begun: 2007 Estimated Cost: \$500,000

# <u>Columbia Area Transportation Study (COATS) / Midlands Tomorrow – 2035 Long Range Transportation Plan</u>

The Central Midlands Council of Governments prepared a long-range transportation plan for the COATS region in 2008. Relevant recommendations from the 2008 Plan are listed below.

Note:

Fairfield County's southern border represents a portion of the northern edge of the current COATS Planning Boundary (since 2000). Consequently, no projects within the County borders are listed within the COATS 2035 Long Range Plan. However, the COATS Planning Boundary has grown since its inception in 1969 and could reach into Fairfield County at sometime in the future, particularly based on the more recent population growth in northeast Richland County/Blythewood. Furthermore, several projects listed in the Plan are located near the Fairfield County line, (primarily in the Blythewood area, and along the U.S. 176 corridor north of I-26 and west of Irmo) or can potentially impact economic development within Fairfield County.

#### Regional High Speed Rail

The feasibility for establishing regional high speed rail corridors is addressed in the Plan, including the Columbia to Charlotte corridor which would bi-sect Fairfield County. The projected cost associated with instituting service on the Columbia to Charlotte corridor was found to be less than the Columbia to Spartanburg corridor. Based on the projected infrastructure costs in each corridor, it appears that the Columbia to Charlotte corridor offers a more effective opportunity for connecting to the potential Southeast High Speed Rail Line. Plans for such connections are, however, in the very early planning stages.

### Road Widening Projects

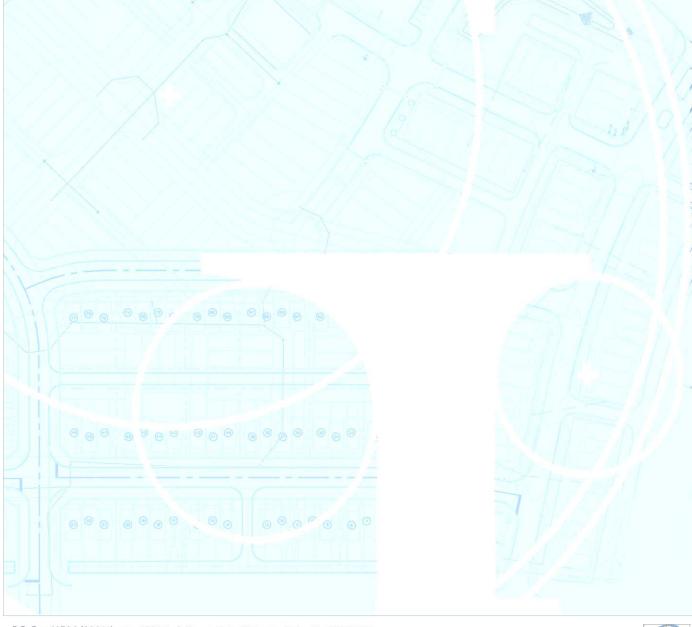

None of the road widening projects identified for completion near the Fairfield County line are considered COATS 2035 Cost Constrained Projects (projects that have been identified for funding over the next 30 years). Such projects represent the first 18 prioritized projects. The table below lists the road widening projects near the County line (and their corresponding COATS Rank).

1	Overall Project Route COATS ID Name		(70) (63)	Project Limits	Estimated Project Cost with a 2.5%	
	Rank				Inflationary Rate	
	20	63	Blythewood Road	Muller Road to Wilson Blvd.	\$14,228,140	
	32	61	Langford Road	Wilson Blvd. (US 21) to Grover Wilson Road (S-60)	\$37,467,474	
	33 77 Wilson Road			I-77 to Blythewood Road (S-59)	\$26,923,863	
1	40	60	Langford Road	Hard Scrabble Road to Heins Road	\$26,840,537	
_	42	102	Heins Road	Langford Road to Cherokee Blvd.	\$10,757,517	
	46	62	Hard Scrabble	Langford Road to Summit Parkway	\$23,432,215	
	50 64 Wilson Boulevard			Raines Road (S-2126) to Langford Road (S-54)	\$23,498,741	
_	52	76	Winnsboro Road	Koon Store Road (S-61) to Blythewood Road (S-2200)	\$53,866,346	

### Other Road Improvement Projects (Vision Plan Projects)

The COATS Plan identifies the Northwest Connector as a major new construction project in the Vision Plan. This project has a long history as a proposal in earlier plans and would provide a connection between suburban areas. It is well beyond the current or anticipated financial capabilities of the COATS program, would require environmental studies, and may be difficult to implement due to encroachments of new development on its potential route. The conceptual route for the Northwest Connector would provide an I-26 By-Pass around "Malfunction Junction" by connecting I-26 near Irmo with I-77 near Blythewood north of the I-20 Corridor.

### <u>2025 Rural Long Range Multi-Modal Transportation Plan</u> (Prepared by the Central Midlands Council of Governments) – Adopted December 9, 2004

In 2004, the Central Midlands Council of Governments prepared a Rural Long Range Multi-Modal Transportation Plan to address transportation issues in the rural areas of the Central Midlands Region (which includes Fairfield County). Relevant recommendations from this 2004 Plan are listed below.

#### **CHAPTER II - ISSUES**

### **Fairfield County**

#### Issues

The people who attended the public forum held in Fairfield County identified several issues grouped in general categories of maintenance, congestion, and safety.

Maintenance: While no specific roads were mentioned, the issue of Fairfield County not being able to

maintain paved roads and SCDOT not having enough money to maintain its system were discussed. The impact is that unpaved roads are not being paved and the paved

roads are not being maintained adequately.

Congestion: During the public meeting, congestion due to truck traffic was mentioned. Trucks

traveling to and from Newberry and Kershaw Counties pass through Fairfield County, using SC 34, with US 321 Bypass around the Town of Winnsboro. The year 2025 TransCAD model runs shows that I-77 from the Richland County line to the Chester County line would operate at a LOS of D and E, depending on the location. County Council mentioned the development near I-77 along the Richland County line and the possible congestion as a result. Also mentioned was the development expected along

Lake Monticello.

Safety: The SC 200 corridor from I-77 south to the Town of Winnsboro and the SC 269

corridor from the Richland County line to the Town of Winnsboro were also identified as safety concerns due to narrow pavement widths resulting in accidents. The intersection of SC 269 and Peach Road and the intersection of SC 215 and SC 34 were identified as safety concerns. Table below shows the top five routes in Fairfield

County according to the number of collisions.

Fairfield County Top Crash Routes  Pairfield County Top Crash Routes  Pairfield County Top Crash Routes  Pairfield County Top Crash Routes							
Route	Persons Injured						
US 321	195						
I-77	187	4	80				
SC 34	149	- 3	144				
SC 215	61	0	38				
SC 200	59	3	51				
Source: South Carolina Department of Transportation							

#### CHAPTER IV – COALS AND OBJECTIVES

#### **MAINTENANCE**

Goal: Provide maintenance to the transportation system to ensure safe and efficient travel.

#### CONCESTION

Goal: Provide a multi-modal transportation system that facilitates the efficient movement of people and goods:

Objective: Implement additional mass transit routes

Objective: Maintain a Level of Service C
Objective: Develop a major thoroughfare plan

Objective: Amend land-use ordinances to accommodate mixed-use development

Objective: Create an inventory of unpaved roads

#### **SAFETY**

Goal: Reduce the number of traffic accidents.

Objective: Identify and improve intersections that are unsafe

Objective: Identify and upgrade roads that have unsafe road design

Objective: Adopt and implement standards for bicycle and pedestrian facility design

Objective: Develop and implement a rural ITS program

### CHAPTER V - IMPLEMENTATION

#### **MAINTENANCE**

The implementation of a maintenance program is dependant upon the level of government responsible for the maintenance (i.e. municipal, County and SCDOT). As has been noted, the limitation on the various levels of government is the insufficient funding to perform the necessary maintenance. Identifying additional funding sources will vary depending on the level of government. Local governments could pursue the option of an additional user tax on vehicle registration to fund continued maintenance or a local option sales tax either for general maintenance or as part of a 7-year program to be completed once the tax ends. One option that Lexington County is considering is issuing bonds to accelerate the road-paving program.

SCDOT needs the support of the General Assembly by either changing the formula used to determine funding or by providing another source of revenue.

#### CONCESTION O

Mass Transit: Transit planning and services are constantly growing each and every day. The Central Midlands Council of Governments will work with the Central Midlands Regional Transit Authority to expand services into the rural areas; as well as work with the local jurisdictions concerning the

operating capital needed to provide these services. It should be noted that revenue generated by the transit system are often not enough to provide transit services. Local jurisdictions deciding to participate, will have to provide financial support in order for services to be expanded into their county.

Widen congested routes: Using the standard of maintained a minimum LOS C; the following routes were identified by the TransCAD model as needing improvement. The cost estimate to upgrade each route to 4 lanes with a median is also shown.

County	Route	Proposed	From	То	Estimated
		Lanes			Cost
Lexington	Pine Street/	4	Old Charleston	North Fork Edisto	\$13,200,000
	Edmund Highway		Road	River/Aiken	
	(SC 302)		(S-32-625)	County line	
Lexington	East Fifth Street/	4	Church Street/	Orangeburg	\$7,400,000
( ) 25 3	Redmund Mill		Savannah	County line	THE COLUMN TO TH
	Road (SC 692)		Highway (US 321)	Comment of the second	
Lexington	Church Street/	4	East Fifth Street	Whetstone Road	\$3,272,500
33.7.7.4	Savannah		(SC 692)	(SC 3)	71/2 11/3
	Highway (US 321)				FI /

Develop major thoroughfare plans and corridor studies: Planning funds provided by SCDOT to CMCOC, matched by the participating jurisdiction, could be used to fund thoroughfare plans and corridor studies for specific areas in the region. These should be annual activities included in the Rural Planning Work Program.

Improve alternate routes: The map of recommended facilities for each of the counties identifies alternate routes for improvement. These routes are important and improvements are recommended for several reasons, including:

- Provide greater multimodal connectivity within the region
- Important corridors for freight movement
- Preserves capacity in the transportation network.

The addition of travel lanes is not warranted based the estimated volumes and the cost necessary for that type of upgrade. The issues associated with these corridors can be addressed with the addition of wider shoulders, adequate lane widths and the addition of a center turn-lane.

The routes in each county and the cost for the improvements are listed on the next page. While the funds available in the STIP could be used to fund the improvements listed, the cost to do the improvements far outpace the funds available. Several activities could be used to supplement STIP funding:

- Using funds available to the County Transportation Committees (CTCs): Increased funding to the CTCs or the ability to bond CTC funding would help make this a more valuable alternative
- Using the 7-year local option sales tax referendum to fund specific projects: While this funding source cannot be used for maintenance programs, it can be used for capitol improvements.
   The projects would have to be specified as part of the referendum.

- Preserving right-of-way through land-use regulations: Part of the cost associated with road improvements is the cost of right-of-way acquisition. This cost is increased when structures are located in the proposed right-of-way. Local governments could help to lower the cost of right-of-way acquisition by amending their land use ordinance to include provision to preserve right-of-way of specific corridors. The first step is to amend the land-use and community facilities elements of their comprehensive plan, recognizing the need for the road improvements and identifying the specific corridors to be preserved. Then the community should amend their zoning ordinance to ensure sufficient setback from the specific corridor. The community's land development regulations should also be amended to provide for future right-of-way platting and dedication.
- User fee: One use fee option is an annual registration fee paid to the county. Richland County already collects such a fee. Another option is developing toll roads.
- Impact fees: The SC Code of Laws defines development impact fees as a payment of money imposed as "... a condition of development approval to pay a proportionate share of the cost of system improvements needed to serve the people utilizing the improvements." The procedures for adopting and administering impact fees are outlined in Title 6, Chapter 1, Article 9 of the SC Code of Laws.

The table on the below list the improvements proposed for each county and the estimated cost based on adding 4-foot shoulders at a cost of \$60,000 per mile. The total estimated cost for the projects listed is \$1 0.9 million. Other improvements such as center turn lanes or acceleration/deceleration lanes at strategic locations along a route could also be an effective means to relieve peak-hour congestion issues.

County	Route	Length	Cost	From	То
Newberry	CR Koon Hwy (US 760)	11.14	\$668,400	SC 391	Lexington Cty line

Provide for compact, mixed-use development: The State of South Carolina Planning Enabling Legislation requires at a minimum that a jurisdiction adopt the land-use element of a comprehensive plan before adopting a zoning ordinance. Additionally, the community facilities element must be adopted before adopting land development regulations. Of the four county comprehensive plans in the region, Richland County comes in the closest to endorsing the policy of compact mixed-use development. However, it does not identify future locations for these developments; only possible locations. Newberry County's comprehensive plan identifies commercial clusters at major intersections, but does not call for dense residential developments at these commercial nodes.

All of the counties would have to amend their respective comprehensive plans to establish compact mixed-use development as a land-use policy. Amendments to their zoning ordinances and land development regulations should follow to implement the policy.

Maintain rural character: The plan recommends developing a capacity analysis for unpaved roads. CMCOG and the counties should explore a cost share arrangement to fund the cost of the study.

#### **SAFETY**

Identify and improve intersections that are unsafe: Appendix B lists intersections that were identified as part of the plan development. Due to the limited funding that is available from SCDOT for system upgrades in the rural area, CMCOG has not set aside funding for intersection improvements. However, a matching program with SCDOT or the CTC would be a supplement the STIP funds.

Identify and upgrade roads that have unsafe road design: Some unsafe road segments have already been identified as part of the plan development. The need to upgrade roads due to safety concerns outpaces the federal funding available. One alternative to funding safety projects is to make safety a criterion in selecting road projects for upgrade. Another approach is to determine the corridors with the highest accident rates and determine the cause for the accidents. By identifying a specific cause, funds can be efficiently used to address the greatest need.

Adopt and implement standards for bicycle and pedestrian facility design: Providing bicycle and pedestrian facilities can reduce congestion by providing a safe and efficient alternative mode of transportation. The plan recommends several corridors for bike/pedestrian facilities that not only link major centers within each county, but also provide links between the counties and with the urban area. Below is a list of corridors in each county and the estimate cost to add 4-foot shoulders at a cost of \$60,000 per mile.

County	Route	Length	From	То
Newberry	State Bike Corridor	21.18	Fairfield Cty line	Saluda Cty line
Newberry	CR Koon Hwy (US 76)	16.5	Lexington Cty line	City of Newberry
Newberry	SC 773	5.3	US 176	CR Koon Hwy (US 76)
Newberry	US 176	19.66	Richland Cty line	Town of Whitmire
Newberry	SC 34	14.36	Fairfield Cty line	City of Newberry

Lexington	Two Notch Rd (S-32-77)	11.45	Fairview Rd (US 178)	Calks Ferry Rd (S-32-278)
Richland	McCords Ferry Rd (US 601)	24.23	Raglins Branch/Kershaw Cty	Congaree River/Calhoun
			line	Cty line
Richland	Bluff Rd (SC 48)	10.22	McCords Ferry Rd (US 601)	Sims Rd (S-40-2236)

County	Route	Length	From	То
Richland	Old Eastover Rd (SC 764)	7.87	Garners Ferry Rd (US 76/378)	Town of Eastover
Richland	Zeigler Rd S (S-40-67)/Goodwin Rd/Way (S-40-2206)	5.65	Old Eastover Rd (SC 764)	Bluff Rd (SC 48)
Richland	Poultry Ln (S-40-56)	3.95	Old Eastover Rd (SC 764)	Bluff Rd (SC 48
Fairfield	US 21	16.89	Chester Cty line	SC 34
Fairfield	Old River Rd (S-20-41)	6.57	SC 200	US 21
Fairfield	SC 200	3.03	Town of Winnsboro	Old River Rd (S-20-41)
Fairfield	River Road (S-20-55/101)	12.94	US 21	Park Rd (S-20-151)
Fairfield	Park Road(S-20-151/46)	9.27	SC 34	River Rd (S-20-101)
Fairfield	SC 34	40.51	Kershaw Cty line	Newberry Cty line
Fairfield	SC 213/215 (State Bike corridor)	25.71	Chester Cty line	Newberry Cty line

The estimated cost for all of the projects listed is \$22.2 million. Some of these facilities are identified along corridors recommended for upgrade and could be funded as a part of that upgrade. Designation as a multimodal corridor should be one criteria for prioritizing road upgrades. Other bike/pedestrian facilities could be funded using the TEA-21 Enhancement program administered by SCDOT. Another way to implement bike/pedestrian facilities is to work with developers in including such facilities as part of their development.

Develop and implement a rural ITS program: ITS is an efficient means to monitor road conditions and transmit these conditions to the appropriate agencies but also to the general public. A regional "ITS Architecture" needs to be developed to identify were the technology can be best utilized. Rural planning money provided by SCDOT to CMCOG could be used to fund this program. Once the "ITS Architecture" is in place, funding for implementation could come from the STIP.

Length (Miles): N/A Length (km): N/A County: Fairfield

Funding: Surface Transportation Program

Program Type: System Upgrade Funding Type: Guideshare

#### Projects Exempt from Guideshare

Project: I-77 @ Peach Road S-30 Interchange

Description: Construct new diamond interchange at existing I-77/Peach Road S-30 overpass just

south of SC 34 interchange (Exit 34) in Fairfield County. Project consists of 4 new ramps, widening of Peach Road for turn lanes at ramps and a new connector road

between Peach and Hood Roads.

From: Point Location
To: Point Location

Length (Miles): N/A Length (km): N/A County: Fairfield

Funding: High Priority/Demonstration

Program Type: Interstate Funding Type: Non-Guideshare

#### **Transit Projects**

Project: Transportation Services for Seniors

Description: To replace a 15 passenger ADA van to transport citizens with disabilities and special

needs to centers, to work, community activities and other day to day activities in FY

2006. Purchase one (1) passenger vehicle in FY 2007

County: Fairfield / Newberry Funding: FTA Section 5310

Program Type: Elderly & Persons with Disabilities

Funding Type: Transit

Project: Rural planning and technical assistance

Description: Provides assistance to rural region for transit planning and technical support

County: Fairfield, Lexington, Newberry, Richland

Funding: Planning Funds
Program Type: Planning Funds

Funding Type: Transit

Project: Human Service Coordination

Description: This study will coordinate transit services in the four county region to avoid duplication

of services and improve efficiency of existing services.

County: Fairfield, Lexington, Newberry, Richland

Funding: Section 5307/Local Funds
Program Type: Section 5307/Local Funds

Funding Type: Transit

Project: ITS Coordination Plan

Description: This study will examine ITS technologies to develop an ITS Architecture for the Central

Midlands Region.

County: Fairfield, Lexington, Newberry, Richland

Funding: Section 5307
Program Type: Section 5307

Funding Type: Transit

Project: Transit Model Development

Description: Development of a transit travel demand model.

County: Fairfield, Lexington, Newberry, Richland

Funding: Section 5307
Program Type: Section 5307

Funding Type: Transit

### Richland County Comprehensive Land Use Plan Update: I-77 Corridor (May 4, 1988)

In 1988, the Richland County Planning Commission chose the I-77 corridor as one of a series of three areas for updates within the existing Richland County Comprehensive Plan. The Plan Update is the county planning commission's guide for decisions and recommendations to county council concerning future growth and development in the area. Relevant recommendations from the 1988 Plan are listed below.

Note: Fairfield County's southern border represents the northern edge of the "I-77 Corridor" study area covered under this plan.

#### Plan Objectives

The I-77 Corridor Task Force identified four major concerns which it requested the planning commission to address in formulating the update of the land development plan for the I-77 Corridor study area. These were: (1) the lack of adequate zoning within the Corridor to protect substantial land investments and residential areas; (2) the lack of convenient commercial facilities to serve growing labor forces in the Corridor and residential communities nearby; (3) the present lack of apartments and medium priced homes to enable portions of the growing work force to live near their jobs sites, and (4) the lack of local codes designed to maintain the present pristine appearance of the I-77 Corridor. With this input and commission members' extensive knowledge of the area, the planning commission established the following plan objectives for the I-77 Corridor:

- 1. Accommodate projected growth and development in an orderly manner, consistent with the Land Use Plan Map.
- 2. Maintain through sound planning and zoning practices, safe and convenient access to the Northern Arterial.
- 3. Maintain through appropriate regulations the carrying capacities of all streets and roads in the
- 4. Limit strip commercial development along major streets and roads designed principally to move traffic through the area.
- 5. Regulate the placement of billboards and outdoor advertising displays along Northern Arterial and other major roads in the area.
- 6. Attract quality residential development in the area by restricting uses which would compromise the area's residential qualities.
- 7. Protect and stabilize existing residential areas having substantial quality and sound character.
- 8. Encourage the development and location of industrial uses in those areas identified by the Land Use Plan Map, and where possible, protect such areas with industrial zoning.
- 9. Protect land values through good and responsible development.
- 10. Discourage urban development of the county's prime agricultural areas.
- 11. Accommodate in certain planned higher density residential areas, a full range of housing opportunities, to meet the various needs of area residents.
- 12. Establish commercial "pockets" or clusters as needed to serve the area.
- 13. Promote open space and landscaping in new projects to enhance the aesthetic quality of the area.

# Land Development Plan Update

# Industrial

The heart of the I-77 Corridor on either side of Interstate 77 from existing state owned facilities on the south to Blythewood on the north is proposed to develop as a high technology and support services industrial corridor. Its beginnings have been established with the Carolina Research Park and Dana Corporation anchoring the southern portion, IBM's 1,700 acre purchase in its center, and Sony property, PMS and Kitchenaid farther north. In addition, several large tracts of land have been purchased and zoned industrially with the intent of providing storage and distribution facilities for supplies to future hi tech companies. Coupled with the established trend are the interstate access, rail services, existing municipal sewer and water, and large tracts of vacant, and physically suitable land which make this area attractive for quality industrial and research developments.

# Development

The area east and west of I-77 from just south of Blythewood to the Fairfield County line is proposed for "development." This is synonymous with a Richland County zoning district, used when the character of the land has not been established and any number of uses may be acceptable under certain conditions. Since this area has shown no particular development trend but has potential for various uses, identifying it as "development" in the long range plan will maximize its future ability to satisfy a particular land use need within the area.

# Residential

The majority of the remainder of land within the study area is proposed for residential uses. Most existing residential neighborhoods are projected to remain stable over the next twenty years at their present densities. These include Crickentree, Meadowlake, State Park Acres, Lake Elizabeth Estates, Highland Forest, Pine Valley and Hollywood, among others. Several small, older residential areas near I-77 are slowly expected to succumb to the pressures of industrial development along the interstate, however. Development of Longcreek Plantation is expected to proceed to eventual build-out, but because of emerging market demand for a mix of housing types, some portions are proposed to develop at higher densities than at present.

Most land in the northeastern portion of the study area is proposed to remain in low density rural residential and farming uses. The lack of public utilities and easy access, coupled with large areas which are flood-prone, make the demand for intense development in this area quite low.

Slightly higher density (4-8 dwelling units per acre) residential uses are proposed to develop in portions of the study area over the next twenty years to satisfy the needs of an emerging work force. Two of these areas are located north of the Northern Arterial at its intersection with U.S. 21 and with S.C. 555 while a third area extends southward from Blythewood to Longcreek Plantation. Smaller pockets of medium density residential development are proposed for additional portions of the study area as shown on the land development plan map.

Relatively few areas of high density development within the Corridor are presently envisioned by the planning commission. They include areas directly north and south of the Northern Arterial, which have municipal sewer and water service as well as excellent road access, and the previously mentioned areas within Longcreek Plantation.

# Commercial

Construction of the Northern Arterial has opened a direct link between residential areas in Richland Northeast and the 1-77 Corridor. Limited commercial development along the arterial was projected in the Land Use Plan Update for the Northeast Area, due to the desire to protect new, subdivisions with higher priced homes along the arterial from commercial intrusion. This is not the case in the 1-77 Corridor study area as much land along the Northern Arterial is undeveloped. Due to its link with the northeast residential areas, its ease of access and public sewer and water service, large scale commercial developments are projected to develop along this portion of the arterial as demand warrants. Additional small areas of commercial uses catering to nearby residents are proposed at scattered intersections throughout the study area. Finally, additional commercial development along U.S. 21 at the study area's southern boundary is anticipated.

# Institutional

Present state owned and operated facilities are expected to remain during the next twenty years.

# Potential Protection Areas

Potential protection areas, which include natural recreation areas, environmentally sensitive areas, prime farmlands and flood plains graphically depicted on Exhibit 18 were not specifically identified on the Land Development Plan. This is due to the present inability of land use codes and regulations to provide incentives or mandates for developing or preserving these types of land uses. It is hoped that some of these areas can be kept natural or sparsely developed through the normal subdivision review process. Except for prime farmlands, the areas shown as potential protection or natural recreation areas are generally unsuitable for development due to topography, soils and flood plain conditions. As development proceeds, these areas can be pointed out in the hope that they can be reserved as a recreational amenity.

### Implementation

Several mechanisms exist to implement the adopted development policies and land use plan map over and above the normal rezoning process. For example, land use regulations designed to carry out the policies of the plan can be developed, adopted and enforced. Under the sponsorship of the Greater Columbia Chamber of Commerce, a model sign ordinance was developed for presentation to all affected local governments within the Central Midlands Region. If adopted by Richland County Council, the ordinance will help implement the plan's policy of maintaining good aesthetics within the 1-77 Corridor. An Appearance Committee has also recently been established which will formulate, among other items, a model landscape ordinance. This, too, will help implement a portion of the land development plan's policies if adopted by Richland County Council. Planning staff has also been requested to develop a curb cut ordinance which would maintain the carrying capacities of roads, another stated policy of this plan. The Richland County Planning Commission pro-posed a new zoning district, Light Industrial Research Park (LIRP) which was subsequently adopted by county council. This zoning district was designed to be used along the 1-77 Corridor for and by developments of a hi tech nature with special requirements. Richland County Council is slowly proceeding with building connector roads within the county, some of which are located within the 1-77 Corridor study area. All of these individual and group efforts are leading to plan implementation as envisioned in this update.

# Richland County Comprehensive Land Use Plan Update: I-77 Corridor (April 1994)

In 1994, the Richland County Planning Commission completed revisions to its 1988 I-77 Corridor Plan, which were intended to further refine the County's development objectives. Relevant recommendations from the 1994 Plan Update are listed below.

Note: Fairfield County's southern border represents the northern edge of the "I-77 Corridor" study area covered under this plan.

# III. COALS AND OBJECTIVES

The following goals and objectives were taken from the 1988 Plan which the Planning commission has re-affirmed as part of the adoption of this revised document, and that these goals and objectives remain valid as the prevailing view of the plan area has not changed substantially. Specifically, the goals and objectives reveal generalized conclusions regarding how community issues and concerns should be addressed. They are organized into four major categories with some overlap occurring, as many of the issues are interrelated.

# LAND USE

THE GOAL IS TO PROMOTE A PATTERN OF DEVELOPMENT WHICH IS COMPATIBLE WITH EXIST'ING NEIGHBORHOODS, REFLECTS THE NATURAL- CHARACTER OF THE ENVIRONMENT AND ACKNOWLEDGES THE PLAN AREA AS A PRIME DEVELOPMENT CORRIDOR FOR GROWTH.

# Objectives:

- Attract quality residential development in the area by restricting uses which would compromise the area's residential qualities.
- Encourage the development and location of industrial uses in those areas identified by the Plan, and where possible, protect such areas with industrial zoning.
- Discourage urban development of the County's prime agricultural areas.
- Accommodate in certain planned higher density residential areas, a full range of housing opportunities, to meet the various needs of area residents.
- Establish commercial pockets or clusters as needed to serve the area.

# **TRANSPORTATION**

THE GOAL IS TO LINK TRANSPORTATION AND LAND USE PLANNING TO ENSURE PROPOSED AND EXISTING DEVELOPMENTS ARE ADEQUATELY SERVED BY THE HIGHWAY SYSTEM.

# Objectives:

- Maintain through appropriate regulations the carrying capacities of all streets and roads in the area.
- Limit strip commercial development along major streets and roads designed principally to move traffic through the area.
- Residential areas should not be penetrated by major streets.

# NATURAL RESOURCES

THE GOAL IS TO PROTECT THE QUALITY OF THE NATURAL LANDSCAPE BY PREVENTING THE POLLUTION OF THE AIR, WATER AND LAND FROM INCOMPATIBLE USES.

# Objectives:

- Promote appropriate land use practices to prevent damage to wetlands, water quality and quantity.
- Encourage zoning decisions which minimize negative environmental impacts from traffic and land use changes on sensitive land and water habitats.
- Recognize scenic rural areas as sensitive lands worthy of limited development.

# **COMMUNITY SERVICES**

THE GOAL IS TO DEVELOP AND MANAGE USE OF PUBLIC SERVICES IN AN EFFICIENT AND EQUITABLE MANNER AND IN ACCORDANCE WITH LAND USE POLICIES SET FORTH IN THE PLAN.

# Objectives:

- Ensure capital improvement priorities are consistent with the policies of related land use plans and the overall capital improvement program.
- Discourage patterns of development which require costly or inefficient extension of services, or threaten the integrity and character of rural areas.
- Recognize public health, safety and welfare improvements as top priority within the capital improvement programming process.

# IV. PLAN RECOMMENDATIONS

### LAND USE

In 1988, the Richland County Planning Commission prepared and adopted the I-77 Corridor Plan. The Plan was developed from discussions of an ad hoc task force that identified major issues affecting the plan area. Those issues the task force identified continue to be the foundation of the current Planning Commission's view of development for the corridor. Coupled with the Goals and Objectives listed in section III, the following concerns are reprinted here from the 1988 document for acknowledgement by this Plan.

"The I-77 Corridor Task Force identified four major concerns which it requested the Planning Commission to address in formulating the update of the land development plan for the I-77 Corridor study area. These were: (1) the lack of adequate zoning with the corridor .to protect substantial land investments and residential areas; (2) the lack of convenient commercial facilities to serve growing labor forces in the Corridor and residential communities nearby; (3) the present lack of apartments and medium priced homes to enable portions of the growing work force to live near their job sites/ and (4) the lack of local codes designed to maintain the present pristine appearance of the I-77 Corridor".

These concerns were translated into land use and infrastructure recommendations which took the form of the recommended land use map. The 1988 Map expressed "land use themes" which this Plan has held valid and subsequently refined to reflect the separation between the urban and rural landscape.

To apply this concept for the plan update, the plan area was divided into three broad districts which reflect the dominant character of the landscape: the rural area, developing urban area, and established urban area. Within each district, selected recommendations will apply relating compatible development standards with the character of the area. The goal and character of each district is defined below.

### PLAN AREA THEMES:

<u>Established Urban Area</u>: This area consists of established subdivisions, commercial areas and several institutional complexes, with scattered vacant parcels. Development opportunities are generally limited to redevelopment or infill of large single owner tracts as the State is a principal land holder in the area. Public infrastructure is considered adequate. The theme for this district is to encourage infill development where possible and preserve existing stable areas from decay through intrusive incompatible land uses.

Developing Urban Area: This area represents the center or core of the plan area. It contains large open tracts mixed with varying forms of development in use and intensity. This area has an uneven level of services which are provided by Richland County, city of Columbia and a number of special purpose districts. Land development has followed a typical pattern of suburban growth as commercial and high density residential uses have migrated toward major intersections and roadways. Lower density residential uses are found in buffered areas secured from traffic and noise. Industrial uses are heavily favored as the Interstate and utilities provide prime opportunities for development. The theme for this area is to attract and support industrial and commercial development along I-77 and direct residential growth into planned areas where infrastructure in already in place or immediately expected.

Rural Area: This area-is largely undeveloped, comprised of woodlands and open spaces. Existing development consists of farms, small scale commercial uses and low density residential lots. A few large industrial sites also fall within this district. Infrastructure and service delivery levels range from sufficient to non-existent. The theme of this district is to maintain its current rural and open character, preserving the natural setting and sense of space.

### ESTABLISHED URBAN AREA RECOMMENDATIONS

# Residential

The Established Urban Area should contain overall higher density levels than the remaining two districts and should conform to the Proposed Land Use Map. Compatible zoning classifications include:

- A. High Density (9 dwellings/acre or greater): RS-3, RG-l, RG-2, PUD-l, PUD-2 and PDD.
- B. Medium Density (5 to 9 dwellings/acre): RS-2, RS-3, RG-I, RG-2, PUD-1, PUD-2 and PDD.

# Additional provisions where they apply:

- 1. Established residential areas should be protected against penetration or encroachment from higher or more intensive development.
- 2. Within single-family areas, higher density development is appropriate where it completes a block face and is oriented toward developments of similar density.
- 3. Where single-family development occurs adjacent to higher intensity uses, multifamily development, at a compatible density, may be used as a buffer.

# Commercial/Office

In general, commercial and office activities should be confined to existing zoned areas and/or proposed locations where the following apply:

- Areas identified on the Proposed Land Use Map;
- 2. Sites that don't encroach or penetrate established residential areas; and
- 3. Sites of major traffic junctions and cluster locations as opposed to strip development.

# Industrial

In general, industrial activities should be confined to areas identified on the Proposed Land Use Map, and that meet the following provisions:

- Industrial uses which employ noxious chemicals, wastes or material residues should not be located near the floodway or floodplain, reducing contaminated runoff and groundwater pollution.
- 2. Industrial uses that produce noise, smoke odors, glare or pollutants that go beyond the lot line should not be located adjacent to residential uses, or commercial uses without adequate buffering, setbacks or screening.
- 3. Proposed industrial areas should consider the following criteria where they apply:
  - A. Land not having more than five percent (5%) slope;
  - B. Access to major transportation facilities (highway, water, air or rail) with a highway access of at least a collector class road or higher;
  - C. Large tract sites suitable for facility expansions;
  - D. Provision of adequate infrastructure to the site; and
  - E. Compatibility with surrounding land uses.

# Public/Institutional

- Neighborhood schools (elementary and preschool) are best located in conjunction with neighborhood parks and sited on the edge of established neighborhoods while remaining within easy walking distance.
- 2. High schools, middle schools, cultural facilities and large churches requiring substantial acreage for parking and related facilities should be centrally located and sited near major intersections or be accessible by a major highway.
- 3. For purposes of applying location guidelines, the following public service facilities should be treated accordingly:
  - Commercial/Office police and fire stations, transit terminals, government offices, libraries
    - and schools.
  - Industrial water works, sewerage works, garbage and refuse disposal, power and gas facilities .

### Recreation

- 1. Recreation uses are best located in areas of unusual natural features where these features can be incorporated into the design of the facility where possible.
- 2. Neighborhood parks should avoid locations directly underneath or adjacent to power lines or substations, large storm drainage structures and high-traffic roads.
- 3. Small scale neighborhood parks (one-acre minimum) adjacent to residential areas should try to be conveniently located and linked with neighborhoods by sidewalks or walkways, providing safety for children to and from homes, play areas and schools.

4. Large parks, major recreational areas or large spectator sport arenas requiring substantial acreage for parking and related facilities should be centrally located and sited near major intersections or be accessible by a major highway.

### **DEVELOPING URBAN AREA RECOMMENDATIONS**

### Residential

Mixed residential densities are appropriate within the Developing Urban Area and should conform to the Proposed Land Use Map. Compatible zoning classifications by density are recommended as follows:

- A. High Density (9 dwellings/acre or greater): RS-3, RG-I, RG-2, PUD-I, PUD-2 & POD.
- B. Medium Density (5 to 9 dwellings/acre): RS-2, RS-3, RG-1, RG-2, PUD-1, PUD-2 & POD.
- C. Low Density (4 dwellings/acre or less): RU, RS-I, RS-IA, PUD-I, PUD-2 & POD.

# Additional provisions where they apply:

- 1. Established low-density residential neighborhoods should be protected against penetration or encroachment from higher or more intensive development.
- 2. Within single-family areas, higher density development is appropriate where it completes a block face and is oriented toward developments of similar density.
- 3. Where single-family development occurs adjacent to higher intensity uses, multifamily development, at a compatible density, may be used as a buffer.
- 4. In environmentally sensitive areas, the Plan encourages the use of large land tract site design and planning in conjunction with PDD or PUD zoning.

# Commercial/Office

In general, commercial and office activities should be confined to or expanded at existing clusters, and/or locations as identified on the Proposed Land Use Map.

- Areas identified on the Proposed Land Use Map;
- 2. Sites that don't encroach or penetrate established residential areas; and
- Sites of major traffic junctions and cluster locations as opposed to strip development.

# Industrial

In general, industrial activities should be confined to areas identified on the Proposed Land Use Map, and that meet the following provisions:

- 1. Industrial uses which employ noxious chemicals, wastes or material residues should not be located near the floodway or floodplain, reducing contaminated runoff and groundwater pollution.
- Industrial uses that produce noise, smoke odors, glare or pollutants that go beyond the lot line should not be located adjacent to residential uses, or commercial uses without adequate buffering, setbacks or screening.
- 3. Proposed industrial areas should consider the following criteria where they apply:
  - A. Land not having more than five percent (5%) slope;
  - B. Access to major transportation facilities (highway, water, air or rail) with a highway access of at least a collector class road or higher;
  - C. Large tract sites suitable for facility expansions;
  - D. Provision of adequate infrastructure to the site; and

# E. Compatibility with surrounding land uses.

# Public/Institutional

- Neighborhood schools (elementary and preschool) are best located in conjunction with neighborhood parks and sited on the edge of established neighborhoods while remaining within easy walking distance.
- 2. High schools, middle schools, cultural facilities and large churches requiring substantial acreage for parking and related facilities should be centrally located and sited near major intersections or be accessible by a major highway.
- 3. For purposes of applying location guidelines, the following public service facilities should be treated accordingly:

Commercial/Office - police and fire stations, transit terminals, government offices libraries

and schools.

Industrial - water works, sewerage works, garbage and refuse disposal, power and

gas facilities.

# Recreation

- 1. Recreation uses are best located in areas of unusual natural features where these features can be incorporated into the design of the facility where possible.
- 2. Neighborhood parks should avoid locations directly underneath or adjacent to power lines or substations, large storm drainage structures and high-traffic roads.
- 3. Small scale neighborhood parks (one-acre minimum) adjacent to residential areas should try to be conveniently located and linked with neighborhoods by sidewalks or walkways, providing safety for children to and from homes, play areas and schools.
- 4. Large parks, major recreational areas or large spectator sport arenas requiring substantial acreage for parking and related facilities should be centrally located and sited near major intersections or be accessible by a major highway.

# **RURAL AREA RECOMMENDATIONS**

### Residentia

The purpose of the rural area designation is to maintain the open character and natural setting of the landscape. Residential development density is recommended to be four (4) dwellings per acre or less. While this density is important to how the overall area should be developed, it does not preclude a case by case review of new development at a higher residential density provided:

- A. The development is planned in a manner that is in keeping with the character of the surrounding area;
- B. Any development proposed should utilize where possible site design applications, taking advantage of the flexible design techniques offered by the PUD and PDD zoning classifications;
- C. The use of setbacks, landscaping and buffering be employed to mitigate incompatible effects of the proposed use; and
- D. Adequate infrastructure (roads, utilities and public facilities) be available to meet demand for service created from development.

# Commercial

In general, commercial activity is recommended in the areas identified on the Proposed Land Use Map, and specifically:

- Commercial uses should be located on sites convenient to residential areas while not creating an adverse impact.
- 2. Small scale commercial uses located on site with residences are appropriate within the Rural Area provided adequate buffering is available and the use is in keeping with the character of the area.

# Industrial

No industrial uses are recommended within the Rural Area, except where the request fulfills a public purpose on behalf of the County.

# Public/Institutional

- Neighborhood schools (elementary and preschool) are best located in conjunction with neighborhood parks and sited on the edge of established neighborhoods while remaining within easy walking distance.
- 2. High schools, middle schools, cultural facilities and large churches requiring substantial acreage for parking and related facilities should be centrally located and sited near major intersections or be accessible by a major highway.
- 3. For purposes of applying location guidelines, the following public service facilities should be treated accordingly:
  - Commercial/Office police and fire stations, transit terminals, government offices, libraries
    - and schools.
  - Industrial water works, sewerage works, garbage and refuse disposal, power and
    - gas facilities.

### Recreation

- 1. Recreation uses are best located in areas of unusual natural features where these features can be incorporated into the design of the facility where possible.
- 2. Neighborhood parks should avoid locations directly underneath or adjacent to power lines or substations, large storm drainage structures and high-traffic roads.
- 3. Small scale neighborhood parks (one-acre minimum) adjacent to residential areas should try to be conveniently located and linked with neighborhoods by sidewalks or walkways, providing safety for children to and from homes, play areas and schools.
- 4. Large parks, major recreational areas or large spectator sport arenas requiring substantial acreage for parking and related facilities should be centrally located and sited near major intersections or be accessible by a major highway.

### **TRANSPORTATION**

The I-77 Corridor continues to be the primary target location of industrial development efforts by Richland County and the City of Columbia. The linkage of the I-77 Corridor to the remaining portions of the County and surrounding counties is vital to maintaining its market attractiveness. Subsequently, as large tracts of land are highlighted for industrial uses in the Plan, the need for recommendations on transportation issues as they relate to land use are important to the overall planning scheme.

This area of the County is rapidly changing in character, requiring the construction of new roads and the rehabilitation of older roads. Improvements along the Interstate, frontage roads, and secondary roads are key to insuring the adequate movement of traffic. To this purpose, the County has adopted a Long Range Master Street Plan to direct new construction in areas of need. Concurrently, this Plan lists recommendations addressing transportation:

### PLAN RECOMMENDATIONS:

- To the extent possible, rezoning decisions should be made with consideration of the Long Range Master Street Plan so that improvements are concurrent with new development.
- Layouts for subdivision street patterns should be sensitive to the existing land topography, minimizing to the extent possible alteration of the natural landscape.
- Through the subdivision review process, sufficient rights-of-way should be reserved for the
  extension of streets, where appropriate and/or in accordance with the Long Range Master
  Street Plan.
- Where a request for a change in land use will reduce traffic movement below a "C" level of service, additional highway improvements should be made to mitigate the effects.

Note: Level of service "C" represents a stable, continuous flow of traffic but which does restrict drivers in their freedom to select speed, change lanes or pass. Marginal degrees of congestion are acceptable at interchanges, turn lanes or along roadways.

# WATER AND SEWER

The timing and location of development is dependent on the availability and coordination of private and public infrastructure, particularly with water and sewer. In its absence, where development does occur, it is often haphazardly located and results in harming the environment as leaky septic tanks or industrial pollutants often contaminate water supplies. Water and storm water drainage systems are especially sensitive to development, requiring regional planning to protect the quality and quantity of the water supply.

The plan area is partially served by water and sewer with the city of Columbia and Wildewood Utilities as the largest providers. The City of Columbia is the sole provider of public water with the area supplemented by several private systems and individual wells. Sewer is provided by the city and Wildewood utilities which collectively have active service in approximately one-third of the plan area. At present, the city has expectations of extending water northward toward the County line along the Interstate. Extension of sewer would generally follow water lines northward along the Interstate to prime industrial sites.

The Plan encourages the extension of lines within the Developing Urban area as this targets prime industrial locations for development and serves high growth residential areas.

# PLAN RECOMMENDATIONS

- Discourage through the rezoning process new developments using private wells and septic
   tanks in areas of poor water quality and inadequate percolation rates.
- Promote logical land uses in environmentally sensitive areas, reducing pollution from development runoff, poor drainage and onsite toxic hazards.
  - Promote growth in a manner that conforms with proposed line extensions in accordance with the proposed Land Use Map, particularly in areas where ground water contamination exists.

### **COMMUNITY IMPROVEMENTS**

Community improvements are important components to the development of the County as a whole and specifically to small communities or locales. They create a sense of place while providing needed services. Police and fire stations, libraries and schools become land use anchors where residents congregate and develop links with their community and government. The placement of these facilities is key to establishing land use patterns as neighborhoods, commercial and recreational activities cluster around them. Their value in creating a sense of place and providing services should be recognized and planned for the benefit of an area. Listed below are recommendations addressing their placement.

### PLAN RECOMMENDATIONS:

- Public and private facilities which fulfill broad community needs should be accommodated through the rezoning process.
- Facilities that are related to public health, safety and welfare should be given priority consideration in the capital improvements planning process and where rezoning of land is required.
- Where a public need (police, fire or health satellite facility, library or school) is the subject of a land use request, consideration of the overall community benefit should be weighted significantly.

# SUPPLEMENTAL RECOMMENDATIONS FOR PARK AND SCHOOL SITES

# **Parks**

The Plan through its land use recommendations recognizes the Richland County Recreation Commission's 1993 Needs Assessment as the primary planning document for identifying generalized areas deficient in recreational services. Where the Recreation Commission proposes a facility that conforms with its adopted master plan, the Planning Commission should weigh appropriately the Recreation Commission's request while balancing land use compatibility of surrounding properties.

### Schools

In the treatment of proposed school sites, the Plan recommends:

- Generally, elementary school sites can be located within residential areas but should be compatible with surrounding land uses; and suggests, but is not limited, to the following potential locations for facilities:
  - A. Area adjacent Longtown Road East and Rimer Pond Roads.
  - B. Area adjacent Rimer Pond and Hardscrabble Roads
  - C. Area adjacent Killian Road and Highway 555.
- 2. Generally, middle or high schools should be located in commercial (C-1, C-2 or C-3), planned development district (PDD) or planned unit development (PUD) district zones, and front along a major roadway (minimum of collector class). The Plan suggests, but is not limited, to the following potential locations for facilities:
  - A. Area adjacent Rice Elem. on Hardscrabble Road.
  - B. Area adjacent Rimer Pond and Hardscrabble Roads.
  - C. Area adjacent Langford and Hardscrabble Roads. .
  - D. Area adjacent Town of Blythewood.

# V. PUBLIC IMPROVEMENTS

A capital improvements program is viewed as the implementation tool of long range, comprehensive planning. While much community growth depends upon non-governmental decisions, local government itself inevitably becomes involved because public improvement must necessarily precede, accompany, or follow private development. Therefore, the timing and location of public improvements can provide the link between private developments and the comprehensive planning process.

This Plan completes the first step toward the development of a capital improvements program by identifying broad, areawide needs. Drawn from previous public discussions, and a review of existing and proposed facility improvements, a composite listing of projects are recommended. The following references those projects by category.

<u>Function</u>	Project Area	Management Agency	Project Scope
Transportation	I-77 Corridor	County Delegation Transportation Committee	Implement 1993 Long Range Master Street Plan
Recreation	I-77 Corridor Area	Richland County Recreation Commission	Implement 1993 Master Facility Plan
Schools	Richland County School District Two	Richland County School District Two	Implement five year capital improvements plan
Water	I-77 Corridor	City of Columbia	Extend water lines to serve Blythewood Area
Sewer	I-77 Corridor	City of Columbia	Extend sewer lines to serve industrial grade lands along I-77 to Fairfield Co.

Note: No additional satellite EMS, Fire Station, Library or Sheriff/s station is planned for construction within the next five years based upon current growth patterns.

# I-77 Corridor Infrastructure Study: Chester and York Counties, SC (EDA Project #04-06-04081)

In 1995, the Catawba Regional Planning Council and Williams Engineering, Inc., prepared an I-77 Corridor Infrastructure Study to identify investments that need to be made in the I-77 corridor of York and Chester Counties (north of Fairfield County) to provide the level of utility services necessary to produce attractive sites for new development. Relevant recommendations from this 1995 Study are listed below.

Note: Fairfield County's northern border represents the southern edge of the "I-77 Corridor" study area covered under this report. Consequently, the recommendations related to I-77 interchanges located in Chester County, particularly at Exit 55 of I-77, are relevant to economic development in Fairfield County.

III. I-77 CORRIDOR UTILITY REVIEW

# **CHESTER COUNTY**

The water and sewer availability in Chester County along 1-77 from north to south is as follows:

# S.C. 9 (Exit 65)

All sites in the immediate vicinity of the S.C. 9 interchange are currently served or are in close proximity to water and sewer utilities. Sewage pump stations and minor waterline extensions costing on the order of \$200,000 per site would be necessary to serve the sites approximately 0.5 miles to the south and 0.5 miles to the east of the interchange.

# S.C. 56 (Exit 62)

All sites in the vicinity of S. C. 56, including the immediate interchange and the sites in and east of Richburg, are in close proximity to ample water sewer capacity. This area is served by sewer utilities constructed in the mid 1980s. It is anticipated that adequate capacity will be available for at least 5 years. A 24" diameter waterline runs along S. C. 9 and S. C. 901 near this interchange and 8" lines are on most streets in Richburg.

To serve the area located immediately around the S.C. 56 interchange with water and sewer, some minor water and sewer lines will need to be added: The cost for serving the interchange with water is approximately \$45,000. To serve the interchange with sewer, a short length of gravity sewer, a pump station, and approximately 3,000 linear feet of force main is required. The order of magnitude cost associated with this sewer addition is \$140,000.

# S.C. 97 (Exit 55)

All identified sites associated with S.C. 97 are clustered together very near the interchange. It is obvious that both water and sewer service should be provided by extensions from existing utilities in Great Falls. Chester Metropolitan District provides water service in this portion of Chester County. The Town of Great Falls is designated as sewer service provider. In order to serve the area a new 8" waterline and a new 8" gravity sewer line will be required.

The order of magnitude cost for the 8" waterline is \$400,000. The order of magnitude cost for the 8" gravity sewer line, pump station and 6" force main to Great Falls is \$450,000.

# IV. ANALYSIS OF THE INTERCHANGES IN THE CORRIDOR

10. S.C. 9 (Exit 65)

# **Existing Development**

The area surrounding this interchange has developed rapidly in recent years. The presence of full water and sewer service has helped to generate a number of travel-oriented businesses, such as motels, truck stops, convenience stores, and restaurants. There also is a major distribution center to the west of the interchange, and two business parks are being developed. Additional industrial development has occurred to the east along S.C. 9. There also is some single-family residential development along side roads off of S.C. 9.

# **Existing Utilities**

This area currently is served by a 36" water main and a combination of 8" gravity and force mains along with some lesser sized force mains.

# Service Providers

The water service in the area is provided by the Chester Metropolitan District. Sewer service is from the Chester Sewer District. Natural gas is available from the Chester Natural Gas Authority.

# Zoning

There currently is no zoning in Chester County.

# Soils

The soils in this area are of the Cecil-Pacolet-Appling association which are well drained, gently to moderately sloping with a deep clay base that is moderately acidic.

### Traffic

The SCDOT's 1994 annual average daily traffic flow was 21,700 for this area of 1-77.

### Potential for New Development

The area around this interchange should continue to develop. Two business parks have been proposed by private developers, and they should attract new industries and distribution businesses. Further retail development is likely to occur along S.C. 9 as well.

# 11. Road 56 (Exit 62).

# Existing Development

This interchange probably is the least developed in the study area. The Town 'of Richburg is just to the east. However, there has been no development in the immediate area of the interchange.

### **Existing Utilities**

There currently is no utility service at this interchange. There is a sewer pump station nearby on the eastern side of the interchange which provides service to a portion of the Town of Richburg via a 6" force main and 8" gravity sewer line. Eight inch water lines could be extended from nearby lines in Richburg to the interchange at a cost of \$45,000, while a 4" force main could be extended for approximately \$140,000.

# Service Providers

The interchange is in the service area of the Chester Metropolitan District and the Chester Sewer District.

# Zoning

There currently is no zoning in Chester County.

# Soils

The soils in this are of the Cecil-Pacolet-Appling association which are well drained, gently to moderately sloping with a deep clay base that is moderately acidic.

# Traffic

The SCDOT's 1994 annual average daily traffic flow was 21,700 for this area of 1-77.

# Potential for New Development

The potential for development in this area is limited due to the lack of utilities. Scattered residential uses may continue in the area.

# 12. S.C. 97 (Exit 55).

# **Existing Development**

The interchange is in a rural area. The only development in the immediate area is a large convenience store at the northeast corner of the interchange.

# **Existing Utilities**

There currently are no public water and sewer services in the area. The cost of extending an 8" water line from outside of Great Falls would be approximately \$400,000, while the cost of extending a combination of 8" gravity and 6" force main would be approximately \$450,000.

### Service Providers

Water service would be provided by the Chester Metropolitan District while sewer service could be provided by the Town of Creat Falls.

# Zoning

There currently is no zoning in Chester County.

# Soils

The soils in this area are of the Wilkes-Winnsboro-Mecklenburg association which are well drained, gently sloping with a deep clay subsoil that is moderately acidic.

### Traffic

The SCDOT's 1994 annual average daily traffic flow was 21,800 for this area of I-77.

# Potential for New Development

The potential exists for limited development in the area. Without water and sewer service, the development which can be expected will be scattered and oriented to the traveling public.

# RECOMMENDATIONS & OBSERVATIONS

# **RECOMMENDATIONS & OBSERVATIONS**

As a culmination of the overall economic development strategic planning process described in this plan, Genesis Consulting Group, in close coordination with the Steering Committee, has developed various recommendations/observations (with associated initiatives, tasks, responsible parties, and other implementation measures) for Fairfield County to help guide the region's economic development over the next five to ten years. The recommendations have been grouped into the major categories as identified during the SWOT analysis: Physical Infrastructure; Education & Workforce; Community Coordination & Cultural Relations; and Compatible Industries & Business Development. An additional "Organizational Recommendations" category has been added to capture further recommendations that have emerged based on the data and input presented during the project, as well as Genesis Consulting Group's professional expertise. Each of these strategies is intended to help fulfill the County's economic development mission as formulated through the planning process:

The mission of the Fairfield County Economic Development Department is to provide an enhanced quality of life for all citizens of Fairfield County by fostering and encouraging responsible and sustainable economic development activities that promote job creation, support our existing businesses, and strive to increase and diversify the County's tax base.

It should be noted that these recommendations are made within the context of a continuum of economic development efforts throughout Fairfield County over many years. Several of these recommendations are not necessarily new ones as they have appeared in various forms within multiple planning documents (as addressed earlier in this Plan) and have already reached some stages of implementation. In those cases, the recommendations presented here are primarily geared toward building on the previous successful work in the County and focusing the direction of future tasks in support of the previously established objectives.

All of the recommendations are geared toward spurring Economic Development for Fairfield County in accordance with the definition of Economic Development described on the following page.

# **Definition of Economic Development**

Traditionally, Economic Development for an area or region consists of three components:

- 1. Private Investment/Spending
- 2. Maintenance/Expansion of Tax Base
- 3. Job Retention/Creation & Wealth Generation

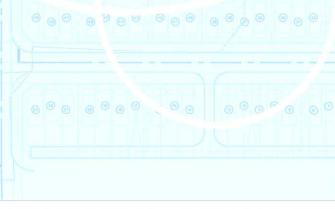

<u>Manufacturing</u>, <u>Distribution</u>, and <u>Other Industrial</u> operations (that serve markets beyond the region) satisfy all three components of Economic Development.

Offices (Corporate/Regional), Call Centers, and Research & Development Facilities that are affiliated with companies that serve markets beyond the region also satisfy all three components. Offices used for personal and business services to serve local markets only typically result in re-distribution of wealth within the region and therefore aren't typically considered Economic Development.

Retail & Commercial operations are also not typically considered Economic Development since most of these operations serve local populations only (resulting in wealth re-distribution). However, Retail & Commercial operations that attract shoppers and capture retail "leakage" from adjacent, underserved areas can meet all three components of Economic Development.

Retail and commercial dynamics also apply to <u>Tourism</u> in that such attractions/events that are predominantly community-oriented only cause wealth distribution within the region. However, major man-made or natural <u>Tourism</u> attractions and events that draw tourists from beyond the region can bring considerable new spending into a region – without requiring significant expenditures for additional government services.

Residential Development is typically NOT considered Economic Development. While there is an investment in the region, and the local tax base is expanded, the construction jobs generated are considered temporary, and the cost of ongoing local government services to serve the new residents more often than not exceeds the generated new tax revenue. However, Retiree Residential Development brings new investment and expands the tax base without requiring the higher costs for local government services (primarily due to the lack of school-aged children). Furthermore, the "new wealth" and spending of retirees that relocate to the region can significantly support new increases in retail and service jobs within the region.

# Organizational Recommendations

### Recommendation #1

- Create a Fairfield County Economic Development Board
  - Funding from County with Participation of Private Sector
  - Better Continuity in Addressing Long-Term Issues & Opportunities
  - Private-Sector/Community Validation & Buy-in for ED Decisions & Incentive Recommendations

### Recommendation #2

Create a Private-Sector Committee to Raise Private Funds for Exclusive Support of ED Board

Rationale: Generally in South Carolina County offices of economic development are structured in two (2) ways. In some (but not all) smaller and more rural counties economic development offices function directly under the auspices of the county council and work directly under the supervision of the county administrator. The other method of organization is to create an economic board or commission and have the office of economic development under the direct supervision of the board. These boards are funded principally by the county with supplemental funding coming from the private section. These boards with heavy participation from the private sector generally enjoy more success in retaining and growing existing business and in recruiting new business than those offices that are county operated. Additionally, there is a greater probability of continuity in addressing long term issues and opportunities than with an elected body whose members and priorities could change with every election. Members of county council can take greater comfort in policy issues for economic development and incentive decisions knowing that they have had the careful scrutiny of the economic development board and come with their recommendation.

As the initial priority, Fairfield County Council should create a Fairfield County Economic Development Board that would be responsible for establishing and maintaining an economic development office charged with the responsibility of developing those programs and activities aimed at growing the economy, increasing employment opportunities and ultimately raising per capita income in Fairfield County. The majority of members of the board should come from the private sector with ex-officio voting members from Fairfield County Council, town councils, the Fairfield County School Board and Midlands Technical College. The staff of the office will be selected by and supervised by the board. However they would be on the county payroll with insurance and all other benefits available to county employees.

It must be noted that for rural counties face a key obstacle to obtaining significant private-sector funding for economic development efforts due to the relatively small number of potential contributors. Fairfield County is no exception as there are not a large number of major employers within the County. Although the make-up of the newly created Economic Development Board should include heavy representation from the private sector, Fairfield County would be best served by understanding that a move to create an Economic Development Board would not necessarily entail a lower level of public funding. Since the potential contributors from the private sector are relatively few in number, the County should be prepared to continue to be the primary funding source for the activities of the Economic Development organization both initially and into the foreseeable future. Private sector funds that are raised would be used to supplement public funds (and would be targeted for specific organization functions as detailed below).

As a subsequent priority, the Fairfield County Economic Development Board shall cause to be created a private-sector committee for the purpose of raising funds for the exclusive support of the work of the Economic Development Board.

Although it is anticipated that most funding for the County's economic development organization would still come from public funds, there are important functions of the organization that should be carried out using private-sector funds. Such funds would be used for entertainment of prospects and/or allies and other initiatives where public funds can not be appropriately used. Specific areas that would benefit from private sector funds include marketing expenses, entertaining prospective business/industry representatives, salary supplements and other such other expenses as may be needed to support the work of the board.

# Entities Responsible for Implementation: Fairfield County Council

To implement the above recommendations, Fairfield County Council would approve via ordinance a change in organizational structure that establishes and Economic Development Board and places the economic development office under the Board's supervision. An example ordinance is included as Appendix 24. The County Council would also approve all associated bylaws and policies (composition, membership, duties, etc.) needed for the continued operation of the Board. Example by-laws for an ED Board are included as Appendix 25. The responsibility for formulating the by-laws/policies can be delegated by County Council to the County Administrator in coordination with the County Attorney.

The establishment of a private-sector committee for the purpose of raising funds would be the responsibility of the newly created Board (with the approval of County Council) and could be one of the Boards initial actions.

Completion Timeframe: 90-120 Days from Adoption of Plan (Rec #1)
4 months from the Approval of Board Creation (Rec #2)

The process for establishing an Economic Development Board by vote of Fairfield County Council could be initiated immediately (by motion at an official County Council meeting). Approval for creation of the Board (with its associated by-laws) via ordinance would require the standard three readings and could take from 90-120 days from the adoption of this Economic Development Strategic Plan.

Once the establishment of a Board is approved, the establishment of the private-sector committee for raising funds could take up to 4 months. The exact timeframe, however, should be determined by the Board.

# Anticipated Costs & Funding Sources: See Below

The development of the ordinance that creates the Economic Development Board and its associated by laws could be completed using existing County personnel resources. Consequently, the costs to the County would be \$0.00.

Estimated costs to the County for Year 1 of the new Economic Development Organization are provided below. It should be noted that the costs allocated by the County for its current Economic Development Organization would be re-allocated for the operation of the new Economic Development Organization.

Estimated First-Year Budget for Fairfield County Economic Development Organization (FY 2011)				
Expenditure	Cost Estir	nate (Low)	Cost Est	imate (High)
Staff		` '	74.4	
Executive Director	\$	75,000.00	\$	95,000.00
Director of BRE / Project Manager		55,000.00		70,000.00
Administrative Assistant		25,000.00	1. 1	35,000.00
Benefits		38,400.00	1 2 7	48,000.00
Sub Total	\$	193,400.00	\$	248,000.00

# Recommendation #3:

- Complete a Formal Target Industry Study that Dovetails with Research/SWOT Analysis of ED Plan
  - Leverage Transportation Infrastructure & Utilities
  - Leverage Natural Resources (Timber, Gold, Sand, Granite, etc.)
  - Leverage Clustering Opportunities (Nuclear/Automotive Supply/Biodiesel)
  - Explore Innovative New (Small) Industries (Organic Farming, Wood Briquette Fuel, etc.)
  - Coordination with County's existing and future BAR efforts

Rationale: The County would benefit from the preparation of a detailed Target Industry Study" that could dovetail off of the research and SWOT Analysis work of this ED Strategic Plan. The results of a completed Target Industry Study should be coordinated with the specific elements of the County's existing and future Business Attraction and Retention (BAR) efforts.

The County ED Department should aggressively target specific companies and industries that would most benefit from the County's transportation infrastructure (Interstates, Rail Lines, and Access to Ports and Airports). The most obvious targets would be distribution facilities. Similarly, companies and industries that could most benefit from available water and electric capacity should be targeted. Other natural targets would include material/service providers for existing industry clusters to promote "organic growth." Considering the "weaknesses" identified in the education/skill levels of the

workforce, businesses and industries that are less labor intensive may be more attractive near-term targets.

Other targets could leverage the County's natural resources (mining operations and/or additional harvesting of timber) or take advantage of the by-products of those industries. For example, the development of emerging support industries (wood chip or wood briquette fuel) for biomass steam and electric generation plants such as is being constructed at the University of South Carolina Columbia campus. This plant is designed to use 20,000 pounds of wood chips (wood debris such as pine bark and trimming formerly discarded in the forest industry from harvested trees) per hour during maximum power generation operations. Other similar plants are slated for construction in Kershaw and Dorchester counties (and a third undetermined site) to support Santee Cooper's renewable energy program. Other emerging markets include forest management projects that establish and monetize carbon off-set credits that can be traded as commodities and sold to companies for use to comply with proposed federal limits on greenhouse-gas emissions.

Entities Responsible for Implementation:

Fairfield County Economic Development Board Fairfield County Economic Development Organization Fairfield County Council (Funding)

The newly created Fairfield County Economic Development Board, in coordination with the new Economic Development Organization, would develop the parameters for the TIS and provide its recommendations to County Council for funding approval. The County would be best served by retaining an outside consultant to complete the TIS.

**Completion Timeframe:** 

6 months from the Establishment of ED Organization

Anticipated Costs & Funding Sources:

\$25,000 to \$30,000.00

### Recommendation #4

- Develop for County ED Organization a Comprehensive "Marketing Plan" to Brand County in Relation to ED Efforts
  - Based on ED Mission/Vision
  - Dovetails with County Vision Statement
  - Dovetails with Target Industry Study
  - Includes Key "Messaging" Regarding Education/Workforce
  - Includes Recommendations for Website, Marketing Materials, Marketing/Advertising Campaigns, Multi-Media Materials, Trade Show Collaterals, etc.

Rationale: As a potential longer-term initiative, the County ED Department should consider the development of a comprehensive "Marketing Plan" that helps brand the County's ED efforts based on the established ED Mission/Vision and on the County's Vision Statement. Such a plan must reach out to site location consultants, corporate decision makers, and economic development allies. The objective of the plan would be to promote the County's "brand" through the internet, digital media, print media, e-mails, testimonials, and person-to-person interaction.

This plan would cover review and recommendations for the County's website, marketing materials, marketing/advertising campaigns, multi-media materials, trade show collaterals, etc. The plan would further dovetail with any completed Target Industry Study to ensure the appropriate messaging is used

to reach the desired targets. Specific emphasis of the marketing plan needs to be placed on the County's economic development website presence and web interface/information portals. The web presence needs to be closely coordinated with other information portals that can include the County GIS department, the Town of Winnsboro, the Fairfield County Chamber of Commerce, the Fairfield County School District, the Central SC Alliance, and the South Carolina Department of Commerce, among others.

Entities Responsible for Implementation:

Fairfield County Economic Development Board Fairfield County Economic Development Organization Fairfield County Council (Funding)

A separate recommendation included in this economic development strategic plan is the conduct of a County-level strategic planning effort that would include the adoption of a "vision statement" for the County. Also recommended is the completion of a Target Industry Study as discussed above. The County-level vision statement, the TIS, and the mission statement developed for the economic development department are key starting points for the eventual completion of the Marketing Plan for the economic development department.

The Economic Development Board, in coordination with the new Economic Development Director and Staff, would develop the parameters for the Marketing Plan and provide its recommendations to County Council for funding approval. The County would be best served by retaining an outside consultant to complete the Marketing Plan.

Completion Timeframe:

3 months after completion of TIS and County Vision

**Anticipated Costs & Funding Sources:** 

\$15,000.00

# Recommendation #5

- Maintain Existing Strong Relationship and Financial Commitment to Central SC Alliance
  - Continued Access to Regional Marketing Organization working on behalf of Multiple lurisdictions
- As Part of Relationship & Financial Commitment, Verify and Ensure Central SC Alliance Marketing Efforts Dovetail with County ED Mission and Future Developed County-Wide Vision Statements

Rationale: Fairfield County is a member of the Central SC Alliance in order to better position the County for marketing to a range of potential industrial prospects. Among other services, the Alliance provides a marketing umbrella for several other South Carolina counties (including Calhoun, Clarendon, Kershaw, Lexington, McCormick, Newberry, Orangeburg, Richland, and Sumter) and the City of Columbia. Membership in the Alliance potentially enhances Fairfield County's presence in the industrial marketplace in a cost-effective, sustainable manner.

Consequently, the County should maintain its existing relationship and financial commitment to the Central SC Alliance as a means to access a regional marketing organization working on behalf of multiple jurisdictions. The County should also verify that the marketing efforts of the Alliance dovetail with the ED Mission/Vision of the County and any future developed County-wide Vision Statements.

Entities Responsible for Implementation: Fairfield County Council
Fairfield County Council would be responsible for approving annual funding

**Completion Timeframe:** 

**Annual Renewal** 

**Anticipated Costs & Funding Sources:** 

\$82,000.00/Annually

The current financial commitment for inclusion in the Central SC Alliance is \$82,000.00. This figure could increase or decrease in future years. The effort to verify and ensure Central SC Alliance Marketing Efforts dovetail with County ED Mission and County-Wide Vision Statements would be completed by the ED Director and Staff resources and would not entail additional costs.

# Other Related Organizational Recommendations

# Recommendation:

- Establish Long-Term Parameters for Suitable Office Location for ED Efforts
  - Location & Ease of Access
  - Adequacy and Quality / Overall Impression on Prospects & Potential Investors
  - Cost & Maintenance

Rationale: The Economic Development Board should evaluate the current office space dedicated to ED efforts in terms of location and ease of access, adequacy and quality of existing space, cost, and overall impression on prospects and potential investors. The Board should decide on the best long-term office location for ED efforts and present those recommendations to County Council as part of the operating budgets for the ED Organization.

Entities Responsible for Implementation:

Fairfield County Economic Development Board
Fairfield County Economic Development Organization

**Completion Timeframe:** 

1 Year from Establishment of ED Organization

Anticipated Costs & Funding Sources:

\$24,000.00 Per Year for Class A Space

Note that the anticipated costs for office space were included in the estimated Year 1 budget for the new Economic Development Organization.

### Recommendation:

- Promote "Sub-Regional" Alliance with Richland / Lexington Counties (and the Town of Blythewood) for Targeted ED Initiatives
  - Multi-County Industrial Parks (with fair and reasonable tax revenue sharing)
  - Shared Infrastructure Improvement Projects
  - Joint Funding Applications
- Promote Cooperative Relationship with Chester County (and Charlotte Regional Partnership)

Rationale: The County could evaluate additional regional alliances or cooperative relationships with neighboring Counties (most notably Chester County) for additional regional marketing exposure. To the extent possible, this evaluation could include the Charlotte Regional Partnership. Also for consideration would be "sub-regional" relationships/alliances with Richland and Lexington Counties (i.e., multi-county industrial parks, shared infrastructure improvement projects, and joint funding applications). Further

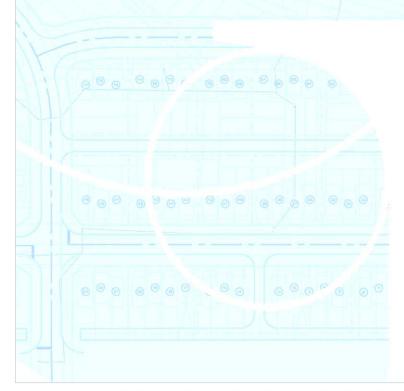

alliances should be pursued with the Town of Blythewood associated with surrounding land uses and Chester County (focused on I-77 corridor development and/or water/sewer infrastructure). Potential models for regional cooperation include the Ten at the Top "Regional Vision Summit" series of community forums in the ten-counties in the Upstate designed to launch initiatives aligned with shared regional objectives.

Entities Responsible for Implementation: Fairfield County Economic Development Organization The Economic Development Director in consultation with the County Administrator would spearhead the efforts to pursue cooperative alliances/relationships with other jurisdictions.

# Completion Timeframe: Immediately upon Establishment of ED Organization The scheduling of initial meetings with each of the above-listed jurisdictions and entities to discuss potential relationships can commence immediately upon the establishment of the ED Organization. Conduct of these meetings should occur within 9 months. Continued coordination and contact would be an ongoing task.

Anticipated Costs & Funding Sources: \$0.00

Promotion of cooperative relationships would be performed by existing County personnel resources and would not entail additional costs. Potential projects and initiatives that come under consideration based on these relationships would need to be considered on a case-by-case basis regarding costs.

# Physical Infrastructure Recommendations

### Recommendation #1:

Establish a Water/Sewer Coordinating Council to Spearhead Water/Sewer Master Plan (w/ Commensurate Priority Areas such as I-77 Corridor; Lake Monticello Area, etc.)

Rationale: As is true for many rural Counties and communities across the State, water and sewer utility service is provided via multiple smaller system operators that do not offer coverage for all areas. The County needs to establish a continuing means to coordinate water/sewer provision across all areas of the County through various water/sewer providers that are not under direct County control. The first step should be the completion of a comprehensive planning effort for water/sewer systems help identify areas that would benefit from increased capacity, prioritize spending on new projects, and identify requisite funding plans. A key area for specific planning would be the I-77 Corridor. Other water/sewer projects identified as priorities in previous planning efforts should be accounted for in the planning documents.

### Entities Responsible for Implementation: Fairfield County Council

Fairfield County Council would initiate the establishment of the coordinating council by identifying and contacting representatives of utility providers for participation on the council.

The coordinating council would develop the parameters for the Water/Sewer Master Plan and provide its recommendations to County Council for funding approval. The County would be best served by retaining an outside consultant to complete the Water/Sewer Master Plan.

# Completion Timeframe:

4 months from Adoption of ED Plan;

6 months from Establishment of Coordinating Council

The establishment and make-up of the water/sewer coordinating council should be complete within 4 months of the adoption of the ED Plan. Once the council is in place, the council would complete the Master Planning within 6 months.

### Anticipated Costs & Funding Sources: \$50,000 to \$75,000

There would be minimal or no costs to the County associated with establishing the coordinating council. The \$50,000 to \$75,000 costs represented an estimate to retain a consultant for the preparation of a water/sewer Master Plan. Any additional costs to the County for specific water/sewer infrastructure improvements projects would be identified as part of that planning process.

### Recommendation #2:

- Establish yearly "set-asides" for general economic development uses
  - ED Prospect "Closing Fund"
  - General Land Acquisition for Industrial Uses
  - Land Acquisition of 1-2 Rail Sites
  - General Infrastructure Improvement Fund (Water/Sewer)
  - "Site Certification" / Site Infrastructure Information Program
  - "Virtual" Spec Building / Real Estate Development Program

Rationale: The V.C. Summer Nuclear Station's current operations are already a major contributor to Fairfield County's tax revenues (approximately \$20M per year, with approximately \$12M to the School

District). SCE&G is in the process of expanding the Nuclear Station by adding two new reactors – a project that represents a \$9.8 billion investment in construction activities within Fairfield County. In addition to the expenditure associated with building the reactors, Fairfield County will realize considerably increased tax revenues once the reactors come on line (one in 2016 and one in 2019). These tax revenues are anticipated to total approximately \$80-110 million per year for County and School District operations.

With the significant influx of tax revenues from future VC Summer operations, the County has a unique opportunity to establish various "set-asides" for specific economic development uses rather than a default position of allowing all new revenues to go to the County general fund. Two areas of key importance would be the "set-aside" of certain dollar amounts on a yearly basis to establish a "Closing Fund" and a "Targeted Infrastructure Improvement Fund" to assist the County in convincing prospective businesses/industries to undertake capital investments and job creation within the County.

Similarly, revenue "set-asides" could be established to tackle specific infrastructure deficiencies that are more County-wide and less site specific. Such deficiencies include a lack of sewer infrastructure serving key areas (primarily along and in proximity to I-77) and lack of rail access to industrial sites. Another key area of concern is the lack of broadband/internet access in large areas of the County.

The County should consider using other set-aside money for compiling generally needed site information for each industrial site owned (or under the control of) the County. This information gathering wouldn't necessarily need to be to the level of "site certification" under the existing S.C. Department of Commerce "Certified Sites Program" per se, but to at least compile data on know environmental, infrastructure, and geotechnical features, etc., that would aid in development decisions.

Other considerations could be the financing/funding of design/permitting for a "virtual" speculative building at existing sites, as well as other elements of a formal Real Estate Development Program. Such a program could help prevent the loss of potential business/industrial properties to other uses, coordinate efforts for water/sewer and other utility providers, and establish private sector incentives for development of "shovel ready" properties and/or virtual spec buildings.

**Entities Responsible for Implementation:** 

Fairfield County Council

Fairfield County Economic Development Director

Fairfield County Council would establish set-asides for general ED uses via ordinance. The implementation of uses of general ED funds would be based on recommendations of the ED Director with County Council approval.

Completion Timeframe:

See Table Below

**Anticipated Costs & Funding Sources:** 

See Table Below

Set-Aside Type	Total Cost	Yearly Commitment	Timeframe	Notes
Closing Fund	\$250,000.00	\$50,000.00	5 Years	Council would be responsible for replenishing fund to \$250k level through yearly commitments as funds are used.
Land Acquisition	\$1,000,000.00	\$200,000.00	5 Years	Council would be responsible for replenishing fund to \$1M level through yearly commitments as funds are used.
Rail Site	\$1,000,000.00	\$200,000.00	5 Years	Assumes completion of only 1 rail access site.
Water/Sewer Infrastructure Improvement	Unknown	\$600,000.00	Yearly	Assumes continuous need for infrastructure improvements year after year.
Site Certification/ Site Info Program	Unknown	\$35,000.00	Every 4 Years	Assumes "certification" of 1 new site every 4 years.
Virtual Spec Bldg	Unknown	\$85,000.00	1st & 3rd Year	Assumes \$85k for design of spec building in Year 1 and another \$85k for design of spec building in Year 3 with the intent to maintain an inventory of 2 virtual spec buildings.
"Bricks & Mortar" Spec Bldg.	\$600,000.00	\$600,000.00	1 Year	As an option, the County could construct a new spec building of approximately \$150,000.00 square feet at a one-time cost of \$600k.

# Recommendation #3:

As a key element of general economic development "set-asides," create a local-level public/private partnership to undertake critical need infrastructure improvements for broadband initiatives (in accordance with existing models such as the "Connect South Carolina" State Broadband Data and Development (SBDD) Program and/or the Rutherford County (NC) "Foothills Connection Broadband")

Rationale: It should be noted that addressing the lack of broadband in the County may be of a higher priority in order to spur small and large business development than other "physical" infrastructure improvements. However, there are obstacles to directly contributing public funds for use by private internet service providers to construct infrastructure. Innovative strategies may need to be deployed to address this need. Potential resources would be Connect South Carolina (the designated entity for broadband mapping in the State) and its State Broadband Data and Development (SBDD) program,

which was recently awarded a \$2.3 million grant from the U.S. Department of Commerce National Telecommunications and Information Administration to further implement broadband initiatives in South Carolina. As another example, Rutherford County, NC, recently forged a local-level public/private partnership ("Foothills Connection Broadband") that could be used as a model for undertaking infrastructure upgrades in Fairfield County.

Entities Responsible for Implementation: Fairfield County Council

Fairfield County Economic Development Organization

Fairfield County Chamber of Commerce

**Fairfield County School Board** 

Lead responsibility for addressing lack of broadband would fall to Fairfield County Council, which would be well served by appointing a "broadband czar" to coordinate with the Economic Development Organization, the Chamber of Commerce, and the School Board to for an ad hoc public/private group specifically tasked with determining the best means for establishing broadband service to all areas of the County.

# **Completion Timeframe:**

3 months from Establishment of ED Organization; 1-3 Years

The Council should appoint a "broadband czar" shortly after (within 3 months) the establishment of the new ED Organization. The ad hoc group should remain in place until an appropriate solution for establishing broadband throughout the County is identified.

# **Anticipated Costs & Funding Sources:**

\$10,000/Annually;

Unknown

Although the "broadband czar" position would be an unpaid appointed position, the County Council should appropriate up to \$10,000 per year to offset costs/operational expenses for the ad hoc group. The group would ultimately be responsible for determining the best means for establishing broadband service, along with identify the requisite infrastructure costs for implementation. Until the group completes its work, however, the magnitude of these potential costs is not easily determined. The Council will need to evaluate the solutions determined by the ad hoc group in order to determine any funding to be made available.

# Recommendation #4:

- Establish yearly "set-asides" for specific economic development uses
  - Pre-Grade Existing Industrial Sites
  - Retro-fit Existing Industrial Buildings for Adaptive Re-use
  - Demolition of Obsolete Building Structures
  - Revolving Loan Program for Private Land Owners (Curb Appeal, Facades, Landscaping, Other Improvements)

Rationale: For existing industrial sites owned by (or under the control of) the County, the County should consider investing in "pre-grading" to mitigate the County's topography. The County should consider also investing in retro-fits of existing industrial buildings that can be adaptively re-used and/or demolition of building structures that are obsolete. Retro-fits could include energy efficiency and/or low-impact environmental measures in addition to physical improvements to meet current industry needs. A further initiative should include establishing a revolving loan program for private land owners that would provide attractive financing for improvements geared toward spurring economic

development. These improvements could include increasing curb appeal or facades or landscaping to make properties more attractive for sale. For any funding made available to private land owners, the County would need to establish specific agreements with the owners to ensure public funds are adequately reimbursed either through loan payments or via reimbursement open property sales.

Entities Responsible for Implementation:

Fairfield County Council

Fairfield County Economic Development Director

Fairfield County Council would establish set-asides for specific ED uses via ordinance. The implementation of uses of specific ED funds would be based on recommendations of the ED Director with County Council approval.

**Completion Timeframe:** 

See Table Below

**Anticipated Costs & Funding Sources:** 

See Table Below

Set-Aside Type	Total Cost	Yearly Commitment	Timeframe	Notes
Pre-Grade Existing Industrial Sites	Unknown	\$600,000.00	Every 3 Years	Assumes pre-grading of 1 site approximately every 3 years.
Retro-Fit Existing Industrial Buildings for Adaptive Re-Use	\$100,000.00	\$20,000.00	5 Years	Council would be responsible for replenishing fund to \$100k level through yearly commitments as funds are used.
Demolition of Obsolete Building Structures	\$35,000.00	\$7,000.00	5 Years	Council would be responsible for replenishing fund to \$35k level through yearly commitments as funds are used.
Revolving Loan Program	\$75,000.00	\$15,000.00	5 Years	Council would be responsible for replenishing fund to \$75k level through yearly commitments as funds are used.

### Recommendation #5:

- Validate/Verify Existing Listing/Inventory of Available Industrial Properties & Buildings Represented on County ED Website & Develop New Future Inventory
  - Compare Inventory with Central SC Alliance & SC Department of Commerce Listings
  - Develop Inventory of Available Commercial Real Estate
  - Develop Comprehensive "Inventory" of Attractive Sites for Potential Industrial Development
  - Aggressive Zoning/Land-Use Planning Zoning Changes
  - Target Individual Sites for Purchase (or Purchase/Lease Options)

Rationale: National and international site selection consultants and their clients often begin the process for narrowing down the potential locations for new operations through preliminary "due diligence" and information gathering of which Counties under consideration may not even be aware. Much of this upfront research is completed via the internet to determine the availability of potentially suitable locations. Consequently, it is critically important that Fairfield County have accurate, up-to-date, and consistent information about available industrial sites/buildings within each database where such information is provided.

Currently, there are multiple website sources for industrial sites/buildings information for Fairfield County, including the County's economic development office webpage and the web pages for the Central SC Alliance and the South Carolina Department of Commerce. The County needs to validate and verify the existing listing/inventory of available industrial properties and buildings as represented on the County's ED website. This listing/inventory should be compared with the listings/inventories available on the Central SC Alliance website and the SC Department of Commerce site to ensure consistency and accuracy. Additional attention could be given to an inventory of available business/retail real estate, which is currently unavailable on the site.

Over the years, Fairfield County has made several successful efforts to increase the availability of potential industrial property within the County lines. Notable more recent properties include the Walter B. Brown Industrial Park II, as well as the new 600-acre industrial site located in the southern portion of the County (this site has recently been master planned for use as Class "A" business/industrial usage). However, the dearth of both completely "shovel ready" sites and sites that offer rail access in Fairfield County were noted as obstacles to current development for many potential industrial prospects.

As an ongoing measure to ensure adequate industrial site product well into the future, the County should develop and continually update a comprehensive "inventory" of attractive sites for future industrial development throughout the County with an identification of which sites could potentially come under County control. The inventory should include basic details such as size, location, infrastructure, ownership, purchase price, etc. Specific emphasis should be placed on sites that could accommodate rail access. This inventory of potential sites would not necessarily be made public; rather it would be used as a starting point for ensuring adequate inventory into the future as sites come under County control.

Where possible, the County should embark on more aggressive zoning/land-use planning changes to accommodate industrial development at the most suitable sites, as well as help ensure compatible adjacent uses. The County should also pursue purchase or lease options on such land, or consider purchasing property outright to continually support a robust inventory of product.

Entities Responsible for Implementation: See Table Below

Completion Timeframe: See Table Below

Task	Responsible Entity	Timeframe
Compare Existing Inventory with	ED Director	3 months from adoption of ED
Central SC Alliance and SCDOC		Plan; Annually thereafter
Listings		
Develop Inventory of Available	Chamber of Commerce Director	3 months from adoption of ED
Commercial Real Estate		Plan; Annually thereafter
Development Comprehensive	ED Director	6 months from adoption of ED
Inventory of Attractive Sites for		Plan; Annually thereafter
Potential Industrial Development		
Aggressive Zoning/Land Use	County Planning Director	9 months from adoption of ED
Planning Zoning Changes		Plan; Annually thereafter
Target Individual Sites for	ED Director & County	6 months from adoption of ED
Purchase (or Purchase/Lease	Administrator	Plan; Annually thereafter
Options)		

# Anticipated Costs & Funding Sources:

Validation of inventory and identification/targeting of new potential inventory, as well as measures to implement aggressive zoning changes would be completed by existing County personnel resources and would not entail additional costs. Specific costs for acquiring targeted sites would be covered by the Land Acquisition set-aside discussed in an earlier recommendation.

### Other Related Physical Infrastructure Recommendations:

- Pursue Regional (Beyond County Borders) Alliances or Cooperating Relationships to Pursue State/Federal Grant Funding
- Pursue Inclusion of Fairfield County (or portion thereof) in COATS Planning Boundary
- Identify Specific Secondary Roadway System Improvement Projects & Actively Lobby to Include Projects in COATS and Other CMCOG Planning Documents
- For Key Projects Already Included in COATS / CMCOG / SCDOT Planning Documents, Actively Lobby to Move Them Up in Priority

Rationale: As part of the comprehensive water/sewer infrastructure planning effort, the various water/sewer providers in the County should consider forming alliances or cooperating relationships in order to pursue available State or Federal grant funding on a more regional rather than individual system basis. These alliances could extend beyond the borders of the County as necessary.

Fairfield County's southern border represents a portion of the northern edge of the current Columbia Area Transportation Study (COATS) Planning Boundary (since 2000). However, the COATS Planning Boundary has grown since its inception in 1969 and could reach into Fairfield County at sometime in the future, particularly based on the more recent population growth in northeast Richland County/Blythewood.

The County should actively lobby and support projects already included in COATS that are in close proximity to the County border, as well as identify specific secondary roadway projects throughout the

County that need to be championed in future planning documents – particularly those projects that would support increased industrial uses.

Entities Responsible for Implementation: See Table Below

Task	Responsible Entity	
Pursue Regional (Beyond County Borders) Alliances or	ED Director & Water/Sewer	
Cooperating Relationships to Pursue State/Federal Grant	Coordinating Council	
Funding		
Pursue Inclusion of Fairfield County (or portion thereof) in	Legislative Delegation	
COATS Planning Boundary		
Identify Specific Secondary Roadway System	County Engineer & COATS	
Improvement Projects & Actively Lobby to Include	Representative or County	
Projects in COATS and Other CMCOC Planning	Administrator; Legislative Delegation	
Documents		
For Key Projects Already Included in COATS / CMCOG /	Legislative Delegation	
SCDOT Planning Documents, Actively Lobby to Move		
Them Up in Priority		

# **Completion Timeframe:**

1 Year from Establishment of Water/Sewer Council;15 months from Adoption of ED Plan

The pursuit of regional alliances for water/sewer infrastructure planning would be part of the purview of the newly established Water/Sewer Coordinating Council. Such potential alliances should be identified and developed within 1 year of the establishment of the Council.

The recommendations that cover roadway/transportation infrastructure should be completed within 15 months of the adoption of this ED Plan. Note that these transportation issues could be addressed through the development of a "Transportation Plan" element of the County's overall strategic plan, as detailed in a separate recommendation of this ED Plan.

Anticipated Costs & Funding Sources: \$

\$2,500,000.00

Te pursuit of regional alliances and planning for transportation infrastructure improvements would be completed by existing County personnel resources and would not entail additional costs. County Council should, however, be prepared to establish County-level funding (or matching funds) for specifically identified roadway projects.

Set-Aside Type	Total Cost	Yearly	Timeframe	Notes
		Commitment		- H = 1/1
Roadway Project	\$2,500,000.00	\$500,000.00	5 Years	Council would be responsible
Funding (or		9-60		for replenishing fund to \$2.5M
Matching Funds)	9 9 9 9	9 9 6 9 9		level through yearly
				commitments as funds are
				used.

# **Education & Workforce Recommendations**

### Recommendation #1:

 Establish a "Curriculum Advisory Committee(s)" of Business/Industry Leaders for the Career & Technology Center

Rationale: There appears to be a disconnect between the curriculum of the existing Career & Technology Center and the skills/training required to serve existing (and potential) business in industry in the County. A common theme has been that students of the C&T Center require too much on-the-job (OJT). Further, these students do not possess adequate "soft skills" suitable for the workforce.

A "Curriculum Advisory Committee" should be established comprised on leaders of existing business and industry in Fairfield County. The members of the committee should have term limits, and each member must be of and up-to-date in current and new technologies associated with their respective industries. The Committee should review the various vocational tracts offered in the C&T Center to ensure relevance and applicability to business and industry. Of potential importance is a focus on core skills such as trigonometry/geometry and/or reading comprehension in conjunction with specific training on relevant technologies. A model for such a committee can be found at MTC for their career curriculum. Separate committees could be considered for each technology area (automotive, electrical, welding, etc.).

# Entities Responsible for Implementation: Fairfield County School Board

The Fairfield County School Board should establish each Curriculum Advisory Committee in consultation with both the Fairfield County ED Organization and the County Chamber of Commerce.

Completion Timeframe:

120 Days from Adoption of ED Plan

# **Anticipated Costs & Funding Sources:**

\$0

Tasks to implement this recommendation can be completed with existing School Board/District personnel resources and would not entail additional costs.

# Recommendation #2:

- Establish yearly "set-asides" for targeted efforts aligned with ED (using this Plan's "Suggestions") to enhance accountability for results
  - School District to work with ED community to identify specific program requirements
  - Set-Asides to be taken from the additional VC Summer Revenues

Rationale: Similar to increases in general County tax revenue from VC Summer, the School District stands to benefit from a significant influx of funding. The School Board should prioritize areas to specifically target (such as those suggested in this report) with "set-aside" funds.

Entities Responsible for Implementation: Fairfield County School Board/Superintendent
The School Board and School Superintendent would be responsible for evaluating any new initiatives
for implementation such as those provided as "suggestions" within this ED Plan. Such initiatives in
general would fall outside of the purview of this ED Plan. However, in order to ensure that some
initiatives are geared toward supporting economic development within the County, the School Board
and Superintendent should consult with the ED Organization and Chamber of Commerce in the

determination of which specific programs would be most useful and how much funding would need to be set aside.

Completion Timeframe: 6 to 9 months from Adoption of ED Plan

Anticipated Costs & Funding Sources: TBD

### Recommendation #3:

- Selectively Market via Specific "Talking Points":
  - Education/Workforce Themes that Highlight Availability, Educational Attainment & Workforce Skills Represented by Entire Region (Particularly Richland/Lexington Counties)
  - Education/Workforce Themes that Highlight Upper Quartile of Fairfield County Students
- Prepare scripted answer to RFI's for regional Education/Workforce Themes

Rationale: The education attainment and workforce skills of Fairfield County residents alone are not competitive as differentiators and are not strengths for attracting potential businesses and industries. However, considering the workforce on a more inclusive "regional" basis — particularly the inclusion of Richland and Lexington County residents — can be marketed as a significant strength. The County should use multiple avenues to selectively "market" certain aspects of the educational attainment and workforce availability/skills.

For example, the ED Office should establish specific "talking points" and education/workforce themes for all information provided prospective businesses and industries that highlight the availability, educational attainment, and workforce skills represented by the region regardless of County borders.

Similarly to the above-mentioned "selective marketing" initiative, the ED Office should make efforts to highlight the upper echelons of County residents (e.g., the top 25%). The Office should develop "talking points" and education/workforce themes that focus on this top 25% as a much stronger cohort than the overall County population.

Entities Responsible for Implementation: Fairfield County Economic Development Organization The Fairfield County ED Organization should lead the effort to obtain relevant education data through coordination with the Fairfield County School Board and School District Staff. The specific means for using this information to "market" the County would be determined by the ED Organization. Scripted answers to RFI's would further be the responsibility of the ED Organization. The results of this recommendation should also be reviewed as part of the ED Organization "Marketing Plan" as detailed in an earlier recommendation. All methods for selectively marketing the County from an ED standpoint should be shared and coordinated with the Central SC Alliance to ensure consistent messaging and branding of the County.

Completion Timeframe: 3 months from Adoption of ED Plan

Anticipated Costs & Funding Sources: \$0

The tasks under this recommendation can be completed with existing County personnel resources and would not entail additional costs.

# Other Related Education & Workforce "Suggestions":

- Long-Term Concerted Effort of School Board & Faculty (in concert with ED Community) to Change Culture to Expect and Demand Better Performance from All Students
- Implement Corollary Programs Aligned with Rigorous but Realistic "Baseline" Expectations
  - Honors/Cifted Programs & AP Course Offerings
  - Continuation of "Magnet" Programs in Higher Grades
  - "TRIO" Program for 1st Generation 4- & 2-yr College Students
  - After School Programs for "At-Risk" Students
- Fully Incorporate Soft Skill Training in all C&T Center Tracts ("University 101" / "Life Skills 101" / "WorkEthic Certification")
- Establish/Enhance Close Alliance Among School Board & C&T Center with MTC, MWIB, MEBA and MREC
- Implement Programs Specifically Targeted to Attract/Recruit and Retain Highly Qualified & Motivated K-12 Faculty

**Rationale:** In order to improve the available workforce in Fairfield County over the long-term, students within the public school system need to reach higher educational achievement. A significant obstacle is a prevailing apathy among the population about the school system. There are basically low expectations for the quality of the school system. This issue can only begin to be addressed through a concerted effort at the school board and faculty level to expect and demand better performance from all students.

The challenge is to re-establish "baseline" expectations that are rigorous but realistic. Expectations of higher achievement that are unrealistic can have a deleterious effect on morale – but an instilled philosophy of higher achievement can result in significant overall improvement.

A corollary to the low expectations issue – the public school system does not currently offer many higher level classes (Honors/Gifted Programs; Advance Placement Courses, etc.) Further, the current Magnet School for Math and Sciences serves only Grades 1-4 or 1-6 without follow-on afterwards to build on accelerated progress in earlier grades. The School Board should consider establishing higher level programs into the High School to build on the progress of earlier education gains.

The public school system could potentially benefit from a program that develops the expectations (and helps prepare potential students) for continuing education at the college level by students that would be "first generation" college students. Something along the lines of a "TRIO" Program – or program for "potential first generation 4-yr or 2-yr students."

Other steps to be considered include enhancement of After School Programs to cater to "at-risk" or academically struggling students.

Curriculum efforts also need to be closely coordinated with many initiatives being undertaken at the post-secondary education level — for example, the recent establishment of TechReadySC "Dream It Do It" workforce development initiative. TechReadySC is a collaboration of five upstate South Carolina technical and community colleges (and the South Carolina Technical College System office) and the South Carolina Manufacturers Alliance that has launched the "Dream It Do It" workforce development initiative developed by the National Association of Manufacturers. The first major charge of the collaboration was to develop a standardized curriculum among the partner colleges leading to specialty certificates and associate degrees in the area of mechatronics technology (an interdisciplinary field that

includes mechanical, instrumentation, electronics, robotics, automation, computer components, and control systems). Coordination of efforts with the technical college system can help ensure Fairfield County students are aware of available programs in existing/emerging careers and are adequately prepared for succeeding in further academic pursuits following high school graduation.

Further, the C&T Center should consider incorporating "soft skill" training as part of all tracts – possibly on a model such as "University 101" or "Life Skills 101" or "WorkEthic Certification." It is of critical importance that such a Committee remain active over time to ensure C&T Center curriculum continues to meet existing and potential business/industry needs.

In general, there has been a history in the County of relatively poor teacher qualification and teacher retention. The School Board should take steps to ensure the best qualified applicants are selected for available faculty/administration positions. Further, the Board should consider launching a specific program targeted at retaining qualified teachers within the system.

The South Carolina Department of Education has recently received federal funding to help train, reward, and support effective teachers and principals in high-need and hard-to-staff areas of the state as part of the Teacher Incentive Fund. This grant funding is intended to build on the state's existing Teacher Advancement Program that features four components:

- Multiple career paths
- Performance-based accountability
- Ongoing applied professional development
- Performance-based compensation

#### Entities Responsible for Implementation: Fairfield County School Board

The School Board and School Superintendent would be responsible for evaluating any new initiatives for implementation such as those provided as "suggestions" within this ED Plan. Such initiatives in general would fall outside of the purview of this ED Plan. However, in order to ensure that some initiatives are geared toward supporting economic development within the County, the School Board and Superintendent should consult with the ED Organization and Chamber of Commerce in the determination of which specific programs would be most useful and how much funding would need to be set aside.

Completion Timeframe: TBD

**Anticipated Costs & Funding Sources:** 

**TBD** 

#### Community Coordination & Cultural Relations Recommendations

#### Recommendation #1:

- Implement a Community Improvement Council to Address Key Issues Head On
  - Led by County Chamber
  - Chaired by Member of Private Sector
  - Include Representatives from County/Municipal Councils, School Board, Recreation Commission, Sheriff's Department, Private Sector, Churches, and Citizenry, etc.

Fairfield County needs to address its current racial and cultural divisiveness and defensiveness in order to stake out common ground and to establish common causes that galvanize the community.

The County should establish and implement a Community Improvement Council (led by the Fairfield Chamber of Commerce) that includes up to 20 members. The Council should be chaired by a member of the private sector (chosen by the Chamber Board of Directors). Other members should include County Council and Municipal Council members, School Board Members, Recreation Commission Members, the Sheriff's Department, and Other Representatives of the Private Sector. Specific issues that affect progress in the County that would logically fall under the purview of the Community Improvement Council would be:

- Race relations
- School improvement
- Intergovernmental affairs and relations
- Quality of life
- Public awareness of important issues related to County improvement
- Promotion of positive aspects of the business community
- Promotion of positive community improvement efforts.

# Entities Responsible for Implementation: Fairfield County Chamber of Commerce Fairfield County Council (Funding)

The Fairfield County Chamber of Commerce would be responsible for identifying and assembling representatives from the community to participate in the Community Improvement Council.

Completion Timeframe: 4 months from Adoption of ED Plan

#### Anticipated Costs & Funding Sources: \$5,000.00

Although the Improvement Council could and should include elected officials, the Council should be community based rather than an offshoot of County operations. However, the County should provide nominal funding for the start-up and maintenance of the Improvement Council (postage, refreshments, meals, etc.) so that additional financial burdens aren't placed on the Chamber.

#### Recommendation #2:

- Formal Initiative by County Council to Develop & Adopt a "Vision Statement" for the County (as part of overall "Strategic Planning Effort"
  - Key to Galvanizing Community and Garnering Broad-Based Support for Key Improvement Initiatives

- Dovetail a "Strategic Planning Effort" Covering Wide Range of Government/Community Planning
  - Water/Sewer Infrastructure; Recreation (completed); Transportation; Economic Development (completed), etc.

Rationale: Fairfield County Council should develop and adopt a "Vision Statement" for the County – much like the mission/vision developed for ED efforts – in order to secure broad community support for key initiatives. Such a "Vision" can help galvanize the County residents to back key improvement initiatives, whether they address public school issues, infrastructure upgrades, or other areas requiring broad-based support.

As an off-shoot of the Vision Statement, the County Council should consider developing a strategic plan that covers multiple individual aspects of governmental/community planning. Areas of particular interest for planning would include Water/Sewer Infrastructure; Recreation; Transportation; Economic Development, etc. These elements do not have to be completed in isolation – rather, key elements such as the ED strategic plan could serve as one "chapter" of the plan. Similarly, the recently completed Leisure Services & Community Enhancement Plan could serve as the Recreation "chapter."

Entities Responsible for Implementation: Fairfield County Council

Completion Timeframe: 6 months from Adoption of ED Plan (Vision Statement);

1 year from Adoption of Vision Statement (Other Plans)

Anticipated Costs & Funding Sources: \$10,000.00 (Vision Statement)

\$75,000.00 (Other Plans)

The County would be best served by obtaining the services of an outside consultant as a "facilitator" for leading the process to develop an effective Vision Statement, as well as other consultants for later development of the individual elements of the Strategic Plan not already completed. Note that the County could chose to embark on developing the elements of the Strategic Plan not already completed by using (partially or fully) existing County personnel resources, which would reduce the costs for outside consultants.

#### Other Related Community Coordination & Cultural Relations Recommendations:

- Concerted Effort to Publicize/Communicate Schedules and Key Issues Under Consideration by County Council & School Board
  - Mailings, Web Postings, Newspapers, Flyers, e-Mail Blasts, Church Announcements, TV News, Parent Notices
  - Institute "Mobile" Meeting Rotation and Day/Evening Scheduling to Accommodate
     Participation
  - Convene a "Public Summit" and "Roll-Out" Meeting (with other communication means) to present initiatives/strategies in ED Plan (and other future key initiatives such as the "Strategic Planning Effort")

There appear to be inadequate mechanisms for communicating/advertising what policies and ideas are being considered by the various political & administrative entities within the County, as well as an inadequate vehicle for obtaining public input. This lack of communication hampers buy-in for a myriad of initiatives at the County, Municipal, and School Board level.

Each political and administrative entity should consider or continue a "mobile" meeting rotation in order to hold meetings in local communities throughout the County. Meetings should also include a schedule of day-time and evening meetings to accommodate community participation (particularly that of "working parents").

A concerted effort to publicize and communicate meeting schedules and agendas to the larger community should be made by each political & administrative entity. Such communication should employ multiple means to reach the larger audience possible and could include:

- Regular mailings
- Public postings (on websites)
- Newspaper announcements
- Flyers/hand-outs
- e-Mail blasts
- Church announcements
- TV news announcements
- Notices to parents

Clear communication of strategies and initiatives is one of the best means for mitigating citizen opposition and inspiring community buy-in. The County should consider some sort of "public summit" or "roll-out" meeting (or other communication means) to present the initiatives and strategies presented in the ED Plan to the general public. Such informational meetings (or status meetings) should further be used to communicate progress as strategies and initiatives are implemented in the future.

**Entities Responsible for Implementation:** 

Fairfield County Council
Fairfield County School Board
Municipality Councils

Each entity would be responsible for determining the means and methods for communicating initiatives to the community at large by tasking the appropriate Information Officer (or equivalent).

Completion Timeframe:

1 month from Adoption of ED Plan;Ongoing

A "roll out" meeting to present the results of this ED Plan should occur shortly after the Adoption of the Plan to maintain the momentum of the Public Input session used as part of the planning process. All other communication efforts need to be ongoing.

Anticipated Costs & Funding Sources:

\$2,500.00

County-level communication efforts would require nominal costs to the County. Other entities such as the School Board and municipalities would be responsible for funding of any of their own communication efforts.

#### Compatible Industries & Business Development Recommendations

#### Recommendation #1:

- Re-Energize the "CEO Round Table" of C-Level Leaders for Industrial/Commercial Enterprises in Fairfield County (and surrounding Counties)
  - Inclusion of SC Dept of Commerce & Central SC Alliance
  - Commitment to Regular Meetings
  - Narrow Focus on Matching Existing/Future Labor Needs w/ Existing Resources in County & Region

To help focus the alignment of existing industry current (and future) needs (and open job positions) with the resources available in the community, the Chamber of Commerce should help spearhead the "re-energization" of the "CEO Round Table." The make-up of the Round Table should be C-Level leaders of Industrial and Commercial Enterprises in the County (not necessarily Retail Operations). The Round Table could also include leaders of Industrial and Commercial Enterprises from surrounding Counties and representatives from the SC Department of Commerce. This entity needs to commit to meeting on a regular basis and should establish a narrow focus to ensure that to the extent possible existing and future labor needs can be met by County residents (through matching of skills, communicating needed training programs, etc.). The focus could also be of a "regional" nature.

The CEO Round Table should also establish communication with USC President Harris Pastides to leverage his recent appointment to the Steering Committee of the Manufacturing Competitiveness Initiative formed by the Washington, DC-based Council on Competitiveness. This initiative's main goals include bringing together private sector leaders and universities in the U.S. to develop a vision for manufacturing in the current economy/society and to understand changes within the global economic environment that affect U.S. manufacturing competitiveness.

#### Entities Responsible for Implementation: Fairfield County Chamber of Commerce

The Chamber of Commerce Director in close coordination with the ED Organization Director should spearhead the assembly of the CEO Round Table and ensure its schedule of regular meetings is maintained.

Completion Timeframe: 90 Days from Adoption of ED Plan

Anticipated Costs & Funding Sources: \$1,500.00

The County should provide nominal funding for an initial "Breakfast Meeting" to get the process started again.

#### Recommendation #2:

Implement through ED Organization a Formal BRE Program w/ Regular Visitation Schedule

Also, the County's ED Department should further develop and formalize the elements of its Business Retention and Expansion (BRE) program, with a specific emphasis on regular, ongoing communication and visits with existing business and industry in the County. Such a formal program is vital for ensuring the County is aware of and supporting to the extent possible the needs and requirements of existing business/industry operations. Not only is existing industry typically the catalyst for approximately 75% of new jobs and investments within a community, but the success and satisfaction of existing industry

can significantly foster new business attraction and recruitment. A formal BRE program will help the County identify 1) specific opportunities for expansion, 2) companies in danger of closing or relocating, 3) business climate issues such as taxes/regulation, and 4) opportunities for forging partnerships among allies and resources. The framework for a formal BRE program is the identification of strategic businesses in the County (manufacturing, professional and scientific, energy, health care, insurance, and financial sectors, etc.), development/maintenance of contact information; and conduct of regularly scheduled meetings (perhaps bi-annually) in order to assist companies with their expansion needs, help prevent business closings and/or relocations, and provide support with any County, state, or federal regulatory issues. The program could also include participation from partners/allies such as Midlands Technical College, the Fairfield County Chamber of Commerce, and the Central SC Alliance.

Entities Responsible for Implementation: Fairfield County Economic Development Board
The newly established ED Board should task the ED Director (through staff operations) to develop and implement the BRE program.

#### **Completion Timeframe:**

6 to 9 months from Adoption of ED Plan

Following the development and initial implementation steps of the BRE program, consistent follow-up with existing businesses should be completed on a regular schedule.

**Anticipated Costs & Funding Sources:** 

\$0.00 (Cost Included in ED Organization Budget)

#### Recommendation #3:

- Establish Specific Liaison(s) Between the County's Quick Jobs Center and VC Summer for Ongoing Identification and Matching of Labor Needs
  - Identification of "Pre-Training" Requirements
  - Forward-Looking New Technical Areas (such as Health Professionals for the Nuclear Industry)
  - Links to Other Resources (Outside the County if Necessary)

**Rationale:** As the VC Summer facility continues to expand, it is expected that numerous new local job positions will be created. It is estimated that between 400 – 700 full-time permanent jobs are created per constructed nuclear plant, with an emphasis on jobs requiring engineering specialties (mechanical, civil, and electrical engineering), as well as other technical specialties (welding and fabrication). These jobs would be in addition to general temporary and ongoing construction-related jobs.

The County's "Quick Jobs Center" should establish a specific liaison with VC Summer in order to continue to identify industry needs in conjunction with matching available candidates for those positions. This should include identification of "pre-training" needs for certain positions and forward-looking needs such as increased numbers of Health Professionals for the Nuclear Industry that would be required based on future operations at the plant.

The Quick Jobs Centers across the State already conduct pre-employment "Training Fairs" targeted for specific job training opportunities (such as recent fairs in Anderson, Oconee, and Pickens counties that focused on job opportunities in advanced manufacturing or truck driving). Such "Training Fairs" should be used for targeted "job opportunity" areas as they arise at VC Summer (and other major employers within the County). These Fairs would offer information about needed certifications, as well as prescreening interviews with potential employers, among other assistance.

VC Summer and Midlands Technical College must also continue their coordination efforts – particularly to ensure that MTC's newly established Nuclear Systems Technology program fully addresses the critical need for nuclear operators and other energy industry-related specialties. This program has already received funding support from the Nuclear Regulatory Commission for curriculum development and scholarships, and VC Summer would be a key partner in ensuring that curriculum is well aligned with real-world nuclear industry opportunities.

Entities Responsible for Implementation: Fairfield County Quick Jobs Center

Midlands Technical College

Completion Timeframe: 6 months from Adoption of ED Plan;

Ongoing

The County's Quick Jobs Center Director would be responsible for identifying a specific liaison from existing staff to coordinate with VC Summer. Initial contact and coordination meetings should be completed within 6 months, with regularly scheduled follow-up as an ongoing task. Midlands Technical College staff is responsible for the continuation of efforts with VC Summer.

#### Anticipated Costs & Funding Sources: \$0.00

The tasks under this recommendation can be completed with existing personnel resources from each responsible entity and would not entail additional costs.

#### Other Related Compatible Industries & Business Development Recommendations:

- Chamber as "Clearinghouse" / Coordinator for understanding and facilitating "linkage" to small business development entities (regionally)
  - SBA, SCORE, SCSBDC, MBDC, SCLaunch!, SCRA, CIECD, etc.
- Establish a County government "Business Service Center" that clusters administrative functions
  pertaining to starting/operating businesses in the County
  - Planning, Codes, Zoning, Mapping, Business Licensing, Utilities, and Other Permitting
- Implementation through County Chamber of Target Advertising/Public Information Campaign
  - "Shop Locally" / "Support Local Events"
  - Targeted to Steer Residents, In-coming Workforce, and Tourists to support local existing (and new) merchants/businesses
- Leverage Fairfield Memorial Health Care System to target businesses/industries that serve aging population
- Increase Coordination with New Carolina "Innovative Economies" pilot program
- Focus on Immediate/Lower-Cost Improvements for Existing Assets but Understand Lower Priority Level and Specifically Spearhead through County Museum Board efforts for Increased Visibility and Eye Appeal of the SC Railroad Museum / Winnsboro Town Clock
  - Painting/Cleaning/Landscaping
  - Signage & Publicity
- Identify and Catalog "Quality of Life" Attributes on a Regional Basis (Beyond County Borders)
  - Attractions/Destinations, Natural Features, Historical Features, Events, etc.
  - Use as Additional "Selling Point" Similar to "Regional Education/Workforce"
  - Marketing Blast of Fairfield's Retirement Possibilities

Rationale: Throughout South Carolina, there are a myriad of local, regional, statewide, and multi-state organizations/entities whose mission is to assist in various aspects of economic development. A

relatively comprehensive listing of these organizations was compiled for this report. The Fairfield Chamber of Commerce should build on this listing by serving as a "Clearinghouse" / Coordinator for disseminating information about these organizations/entities, particularly for existing small businesses and potential entrepreneurs in the County.

From a County administration standpoint, the County should establish a one-stop "Business Service Center" that clusters administrative functions pertaining to starting/operating businesses in the County. Recent examples of Business Service Centers have been formed by the Town of Lexington and the City of Columbia. These centers are intended to make it easier for individuals to start or operate a business by creating a "one-stop shop" for government-level business programs and resources, including various bureaucratic functions such as business licensing, building permits, etc. Other useful tools that could be made available through the "Clearinghouse" and/or "Business Service Center" would be printed (or electronic) materials similar to the <a href="Small Business Resource Cuide">Small Business Resource Cuide</a> recently developed by the Anderson Area Chamber of Commerce. This guide covers topics such as:

- Ten Steps to Starting A Business
- Checklist for Entrepreneurs
- Business Consulting & Counseling Resources
- Financial Resources
- Regulatory/Government Resources
- International Trade Resources
- Technology Resources and Incubators
- Internet Resources
- Clossary of Relevant Business Terms

The Chamber of Commerce should consider developing and implementing targeted advertising or public information campaigns toward steering residents, in-coming workers, and tourists to support local merchants and business. A "shop locally" and "support local events" initiative could serve to keep existing dollars within the community and capture dollars from residents outside the County borders. Successful programs such as the "Certified SC Grown" initiative could be replicated to some extent at the local County-level to encourage workers/tourists coming into the community (as well as existing residents) to support the local economy. Other such initiatives that could be modeled is the South Carolina small Business Chamber of Commerce "BuySC" campaign.

The Chamber may have an opportunity to target businesses/industries that serve an aging population as County demographics trend that way. The Chamber could leverage the existing (relatively strong) Health Care system – Fairfield Memorial. Also, the opportunities could go beyond merely the provision of medical care services and include recreational/retirement opportunities as well as development of certain types of housing to serve the aging demographic (i.e., assisted living facilities/nursing homes, retirement communities, and "lower maintenance" patio or multi-family homes). Such opportunities could be further explored through participation in events geared towards serving aging populations. For example, the National Active Retirement Association (NARA) holds annual conferences that offer advice on how to design, build, and market housing for the 55+ age group, as well as how to market other products and services to that group. These conferences further address strategies for attracting retirees to invest in individual communities.

The Chamber could also consider closer coordination with South Carolina's Council on Competitiveness (New Carolina) efforts to match state small business to the nuclear industry. New Carolina recently received an SBA Innovative Economies grant geared toward helping more small businesses in the state become nuclear suppliers through identifying gaps in the global nuclear supply chain; determining which business can fill those gaps; and connecting those businesses with the available opportunities. Other objectives include identifying new technologies being developed at the state's universities and technical colleges that could be leveraged to create start-up companies. This pilot program is being spearheaded through New Carolina's "Carolinas' Nuclear Cluster," a group of 37 North and South Carolina-based industry organizations. A consortium led by New Carolina has also embarked on other projects to promote the growth of entrepreneurial firms in South Carolina through funding by the U.S. Department of Commerce Economic Development Administration. The scope of these projects include generating market research on South Carolina's high growth entrepreneurial firms; developing an inventory of the State's entrepreneurship-related service providers; developing a plan for sustaining a state entrepreneurship initiative.

In general, tourism initiatives are not likely to spur significant economic development for the County and should be on the lower listing of priorities. However, a prevailing emotion within the County is that the SC Railroad Museum could and should serve as a key tourist attraction. To optimize its benefits, though, the Museum will require several initiatives to increase its visibility and to enhance its eye appeal. The Fairfield County Museum Board should consider spearheading initiatives to better maintain the RR Museum (painting/cleaning/landscaping, etc.) and to increase signage to publicize the Museum's existing attractions (particularly along I-77). There is similar sentiment about the Winnsboro Town Clock.

The County should identify and catalog the attributes throughout the Region (i.e., not necessarily confined to within County borders) that contribute to the perceived "quality of life" in order to augment the traditional local economic development marketing initiatives. These would include attractions/destinations, historical features, and events, etc. The County's "quality of life" offerings alone are likely not differentiators for business/industry relocations, but the regional attributes could be used as an additional "selling point" for potential businesses/industries.

Also, although current infrastructure and support retail/services are not fully available to all areas, the continued encouragement of "retiree" or second home development near the County's recreational lakes should be a longer-term goal. Successful communities that could serve as a model include the Saluda River Club community in Lexington, SC.

Entities Responsible for Implementation: Fairfield County Chamber of Commerce

Fairfield County Council

Fairfield County Economic Development Organization

Completion Timeframe: TBD

Anticipated Costs & Funding Sources: TBD

# STATE OF SOUTH CAROLINA COUNTY OF OCONEE ORDINANCE 2005-15

AN ORDINANCE REPLACING ORDINANCE 79-19 AND ORDINANCE 95-3, AN ORDINANCE REORGANIZING THE OCONEE COUNTY ECONOMIC DEVELOPMENT COMMISSION AND PROVIDING FOR THE FUNCTION, POWERS AND DUTIES THEREOF.

By Oconee County Council in Session duly assembled with a quorum present and voting, BE IT ORDAINED:

WHEREAS, Ordinance 79-17 created the Oconee County Planning and Development Commission and set forth the name, function, powers and duties of said Commission; and

WHEREAS, in Ordinance 95-2, the Oconee County Council established and created the Oconee County Planning Commission, whose duties, powers and functions include the development of a planning process and advising the governing bodies of Oconee County concerning planning matters as provided in Title VI, Chapter 29 of the South Carolina Code of Laws, Annotated; and

WHEREAS, Ordinance 95-3 amended Ordinance 79-17 whereas to create the Oconee County Economic Development Commission and provide for the functions, powers and duties of said Commission; and

**WHEREAS**, the governing body of Oconee County, upon recommendation of the Oconee County Economic Development Commission, wishes to replace Ordinance 95-3,

**NOW THEREFORE, BE IT ORDAINED,** that Ordinance 79-17 and Ordinance 95-3 are hereby rescinded and replaced by Ordinance 2005-15 as follows:

# Section 1: Name, Purpose, Effective Date

This Ordinance shall be known, in addition to its number, as "An Ordinance Reorganizing the Oconee County Economic Development Commission and Providing for the Function, Power and Duties Thereof" and shall be effective upon Third and Final reading. The purpose of this Ordinance is to make changes to Ordinance 95-3 and thereby replace said Ordinance.

# Section 2: Membership

The membership of the Oconee County Economic Development Commission shall be composed of five (5) members. Each County Council member will

appoint one (1) member from their respective district to the Commission. The Commission will elect one of the appointed members to serve a two year term as Chairperson. If after an appointment of a member to represent a particular Council District of Oconee County to this Commission, such District is altered then such member shall continue to serve thereon for the remainder of the term to which he/she is appointed. In the event the County be further divided into additional districts, additional appointments of members to the Commission to represent the newly created district(s) may be made by County Council without further action.

Should any member of this Commission move and establish residence outside the County or the District where such member was residing at the time of the appointment to the Commission, such moving shall constitute a resignation by the Member and a replacement Member shall be appointed to fill the unexpired term of such resigned Member.

Non-voting Ex-Officio Members from the following agencies and organizations shall be invited to serve on the Economic Development Commission by virtue of their positions of importance to the County:

Oconee County Administrator

President, Tri-County Technical College

Superintendent, School District of Oconee County

President/CEO, Oconee Memorial Hospital

(Officer/BOD), Clemson University (Or as specified by the President of Clemson University)

Oconee County Sewer Commission Superintendent

Director, Oconee County Planning Commission

Representative, Oconee Alliance

Additional Ex-Officio Members may be added by a majority vote of the Oconee County Council.

## Section 3: Term of Members

Each appointed Member shall serve for a term of four (4) years, EXCEPT that the individual term of those members selected to represent Districts Two (2), Four (4) and Five (5) shall be for a period of two (2) years and for Districts One (1) and Three (3) shall be for a period of four (4) years, and thereafter all members shall serve for a four (4) year term or until their successors in office are duly appointed. No Members will serve more than 12 consecutive years on the Commission and no Member will hold the same office for more than six (6) consecutive years.

If or in the event any Member of the Commission shall fail to attend fifty (50%) percent of the regularly scheduled meetings within a period of twelve (12) calendar months, he/she shall be deemed to have resigned his/her position and

may be replaced without notice by action of Oconee County Council. If absences are excused by the Chairperson of the Commission, this provision may be waived.

### Section 4: Removal of Members

Appointed Members of the Oconee County Economic Development Commission may be removed at any time by a majority vote of the Oconee County Council for cause, conflict of interest, or any action or activity that discredits the County and/or Commission.

# Section 5: Training

Each member of the Oconee County Economic Development Commission shall be encouraged to attend the South Carolina Economic Developers' School, "Introduction to Economic Development" Session I. Tuition, food, travel and lodging expenses for the training is to be compensated through the Economic Development Commission Fiscal Year Budget.

# Section 6: Organizations, Meetings, Officers

The Oconee County Economic Development Commission shall meet at the call of the Chairperson and at such times as the Chairperson or Commission may determine.

The Director of the Oconee County Economic Development Commission shall be an employee of the County and shall serve at the pleasure of the County Administrator. He shall not have the right to vote.

At the January meeting of each even-numbered year, there shall be elected a Chairperson and a Vice Chairperson from the appointed Commission Members, together with such other officers as the Commission may deem necessary, and these officers will serve for a period of two (2) years or until their successors are duly elected and qualified. Vacancies in any such office by reason of death, resignation or replacement shall be filled for the unexpired term of the officer whose position becomes vacant. The Director or the Administrative Assistant of the Economic Development Commission shall serve as Secretary of the Commission.

The Commission shall adopt rules of organizational procedure and shall keep a record of its resolutions, findings, determinations and recommendations to the Oconee County Council. The media and public shall be notified of all meetings. The Economic Development Director may purchase equipment and supplies and may employ or contract for such staff and such experts as he/she considers necessary and consistent with funds appropriated by the County Council and approved by the County Administrator.

#### Section 7: Powers and Duties

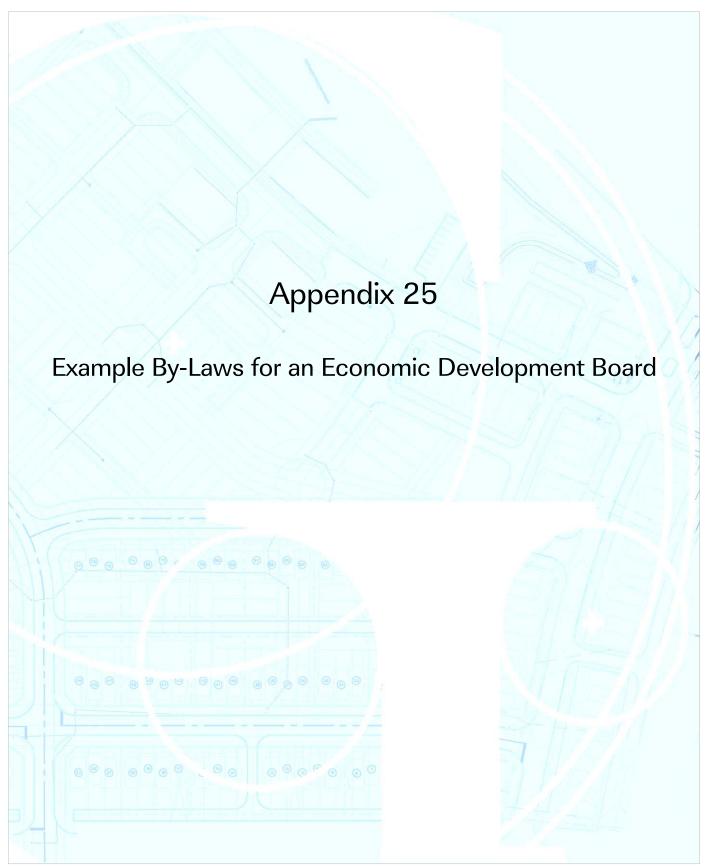

The duties of the Oconee County Economic Development Commission shall be, interalia, as follows:

- (a) To advise Oconee County Council on any matter affecting the industrial and/or economic development of Oconee County. Such advice shall be made in the form of a written report to Council. Reports shall be presented to the Chair of Oconee County Council, and the County Administrator or their designees within a reasonable time.
- (b) To participate in the formulation of the budget and budgetary appropriations affecting the area of concern of this Commission.
- (c) To prepare plans and recommendations to Oconee County Council and the County Administrator in the area of its activity, with recommendations for the implementation of such plans.
- (d) To advise and recommend the employment of or the removal of Commission employees to the County Administrator.
- (e) To perform such additional duties and functions as shall be prescribed by the County Administrator and/or County Council.
- (f) To institute a program for the encouragement of current industries to remain and expand when the economy permits and for new industrial operations to locate in the County, so as to provide additional jobs and places of employment for County citizens.
- (g) To recommend ordinances of county-wide application that would encourage planning and growth of the County, both in population and in business and industrial base.
- (h) To confer and cooperate with other local, regional, state and federal agencies in the development and improvement of industrial and economic development in Oconee County to the extent such cooperation is authorized by this Ordinance.

Any advice or recommendations to Oconee County Council may be prepared and presented orally by the Chairman of the Commission at a regularly scheduled meeting of Council after due notice for agenda purposes, or in writing forwarded to the Chairman of the Oconee County Council and the County Administrator for dissemination to Council Members.

### Section 8: Reimbursements

Each member of the Oconee County Economic Development Commission shall be reimbursed for expenses for out-of-county travel, food, lodging and registration at Economic Development related events. Any expense for same shall be first approved by the County Administrator of the County, unless the same is made by the Chairperson of the Commission and submitted for approval and payment to the County Council. In no event shall any member of the Commission be entitled to any other compensation, direct or indirect, for services on the Commission. Members of the Commission shall not provide any services to the Commission nor provide any services, materials, products, goods or equipment to the County unless the same is sold or offered for sale in accordance with existing County and State purchasing procedures.

# By-Laws of

# **Orangeburg County Development Commission**

Adopted on October 27, 2009

#### ARTICLE I

# Name

The name of this organization shall be Orangeburg County Development Commission (OCDC).

#### ARTICLE II

#### Purpose

The purpose of this Commission is to promote, implement and support activities designed to improve the economic development of Orangeburg County and to maintain and enhance a quality climate of business and industry.

## ARTICLE III

# Location

The principal office shall be such place as the Commission may hereafter designate.

### ARTICLE IV

#### Commissioners

Section 1. Selection of Commissioners. Orangeburg County Council created a Commission in and for the county to be known as the Orangeburg County Development Commission. The Commission shall be composed of thirteen (13) members to be appointed by a majority of the members of the Orangeburg County Council. County development commission members shall be residents of Orangeburg County. Members of the Commission shall be four (4) members appointed at-large, one member appointed from the residents of western Orangeburg County, one member appointed from the residents of eastern Orangeburg County, and one (1) member from each County Council District. The terms of the office of members of the Commission shall be two (2) years and/or until there successors are appointed and qualified. Any vacancies existing in membership of the Commission by reason of death, resignation, or otherwise, shall be filled for the un-expired term by appointment in the same manner as the original term.

11/6/2009 Page 1 of 5 (Orangeburg County Code of Ordinances, Section 26-31(b), or any related Sections.)

Section 2. <u>Authority and Number</u>. The Commissioners shall manage the business and affairs of the OCDC. Commissioners shall set the number of committees. They shall be authorized to fix or change the committee structure.

Section 3. Ex Officio Members of the Commission. The Commission may appoint certain members as ex officio members of the Commission. Ex officio members of the Commission shall be entitled to attend meetings of the Commission, but shall not have any right to vote at such meetings. Ex Officio members serve at the pleasure of the Commission.

Section 4. <u>Compensation and Expenses of Commissioners</u>. Commissioners shall receive no compensation for their services as Commissioners, but may be reimbursed for their out-of-pocket expenses incurred in carrying out the business and affairs of the Orangeburg County Development Commission.

Section 5. <u>Meetings</u>. The Commission shall hold meetings at such place or places as it may determine; and will meet monthly unless otherwise determined by the Commission.

Section 6. Quorum and Required Vote. At each meeting of the Commission, the presence of fifty percent (50%) of the full number of commission members then serving shall constitute a quorum sufficient for the transaction of business. Except otherwise specifically provided by these by-laws, any action of a majority of the Commission present at a meeting at which a quorum is present shall be the official act of the Commission.

## ARTICLE V

#### Officers

Section 1. <u>Number and Election of Officers</u>. The officers shall be elected by the Commission at its regular planning meeting prior to the beginning of the fiscal year in accordance with Article V, Section 5. The Officers shall be a Chair, Vice-Chair, and Secretary/Treasurer. There may be, in addition, such other officers, as may be appointed from time to time by resolution of the Commission.

Section 2. <u>Chair</u>. The Chair shall preside as chairperson at meetings of the Commission; shall coordinate and supervise all activities; shall be an ex officio member of all Commission committees and, as such ex officio member, shall have the right to attend the meetings of such Commission committees and to vote at such meetings; and shall perform such further duties which usually pertain to the office of the Chair and/or as may be delegated by the Commission from time to time.

Section 3. <u>Vice-Chair</u>. The Vice-Chair shall act for and in the place of the Chair in the event of sickness, disability or absence of said Chair or the failure of said Chair to act for any reason, and when so acting, shall exercise all the powers of the Chair in accordance with such designation. The Vice-Chair shall have such other duties as may be required of, or assigned to, him or her by the Commission or the Chair. The Vice-Chair shall act as Parliamentarian.

Section 4. Secretary/Treasurer. The Secretary/Treasurer shall act for and in the place of the Chair and the Vice Chair in the event of sickness, disability or absence of said Chair or the failure of said Chair to act for any reason, and when so acting, shall exercise all the powers of the Chair in accordance with such designation. The Secretary/Treasurer shall have such other duties as may be required of, or assigned to, him or her by the Commission or the Chair. The Secretary/Treasurer will be responsible to facilitate the financial portion of all Board Meetings, and will work on a weekly basis with the Executive Director, his/or her staff, and the accountant to continuously review and monitor the financial statements, be responsible for overseeing the monthly expenditures, work on developing an annual budget, with the assistance of the Executive Director, and the Executive Committee. The Secretary/Treasurer will be responsible for reviewing and approving minutes for submittal to the Commission at their regular meetings.

Section 5. <u>Term of Office</u>. Each officer shall serve for a period of two years beginning July 1, and until his/her successor is duly elected and qualified or, if earlier, until his/her death, resignation, or removal. Officers may serve successive terms.

Section 6. <u>Compensation of Officers</u>. All officers shall serve without compensation, except such reasonable compensation as may be authorized by the Commission.

## ARTICLE VI

#### Vacancies

Section 1. <u>Removal of Commissioners</u>. The Commission, by a two-thirds vote of the Commission, may recommend, for cause, the removal of any member of the Commission to the Orangeburg County Council, who has the final authority over such matters.

Section 2. <u>Attendance</u>. Attendance shall be in accordance with Orangeburg County Council Ordinance 91-11-16, Section 1, and any related Sections.

Section 3. <u>Removal of Officer</u>. Any officer may be removed at any time, with or without cause, by an affirmative vote of two-thirds (2/3) of all persons elected.

Section 4. <u>Resignation of Officer</u>. Any Officer may, at any time, resign as an officer by giving, in writing, notice of resignation to Chair or Vice Chair. Such resignation shall take effect at the time specified therein or, if no time is specified, at the time of receipt thereof. No action by the Commission shall be necessary to cause a resignation to be

effective. Any vacancy in an office shall be filled by a majority affirmative vote of all Commission Members at the next following regular meeting of the Commission or at a special meeting of the Commission called for such purpose.

#### ARTICLE VII

# Expenditures / Bank Accounts

Section 1. <u>Expenditures</u>. All checks, drafts, and other orders for the payment of monies out of the funds shall be approved and signed by the officers only in accordance with the financial policies of the Commission as in effect from time to time.

Section 2. <u>Bank Accounts</u>. All funds not otherwise employed shall be deposited from time to time in such banks, trusts companies or other depositories as the Commission may select or as may be selected by any officer or agent of the Commission to whom such power may, from time to time, be delegated by the Commission; and, for the purpose of such deposit, any officer, agent or employee to whom such power may be delegated by the Commission may endorse, assign and deliver checks, drafts and other orders for the payment of moneys which are payable to the order.

Section 3. <u>Accounting Services</u>. The Commission will engage the services of a certified public accounting firm to assist in the preparation of the Commission's financial statement.

Section 4. <u>Annual Audit.</u> The Commission will engage the services of a certified public accounting firm to prepare an annual audit of the Commission's financial records. The Commission will not use the same firm that provides day-to-day accounting services referenced in Section 3 above.

#### ARTICLE VIII

# Committees

Section 1. The Commission may appoint standing and ad hoc Committees, composed of Commissioners and/or other interested parties to perform such functions as, to the extent authorized by law, and may be determined by the Commission.

Section 2. <u>Executive Committee</u> The Executive Committee shall be a standing committee and shall be comprised of the elected officers and the Executive Director. The Executive Committee shall have the authority to set and make decisions in accordance of a majority vote of the commission.

#### ARTICLE IX

## Fiscal Year

The fiscal year shall commence on July 1 and end on June 30 of each year.

# ARTICLE X

#### Rules of Order

Section 1. The rules contained in the most current edition of "Robert's Rules of Order" shall govern the Commission in all cases to which they are applicable and in which they do not conflict with the provisions of these By-Laws, the Ordinance, and any of its amendments or with County, State, and National Law.

Section 2. The Commission is the final authority on interpretation of parliamentary procedure by majority vote of the required quorum.

#### ARTICLE XI

#### Amendments

These by-laws may be amended, altered or repealed, in whole or in part, at any regular or special meeting of the Commission, duly called and held, upon a vote of a majority of the persons then serving as Commissioners; provided, however, that a supermajority voting requirement in a by-law may only be reduced by amendment by the affirmative vote of a percentage of persons then serving as Commissioners equal to the supermajority (2/3) voting requirement in such by-law.
